First date. Hot coffee. What could possibly go wrong? Derrick's not really into dating, so when his coworker sets him up on a new app that promises to match him with another shifter, he's ready to delete the profile and be done with it. He didn't expect to get matched with the adorable, nerdy guy on the other side of the screen. When curiosity gets the best of him and he decides to meet the man at Café Seuil in Southeast Portland, will hot coffee and the cold, snowy weather make him give up on dating altogether?  I had my blind date  
 with Luke Winters, or  
 rather LW (Luke Warm)  
 as he was known in the  
 office. He was far from  
 warm when I went on a  
 blind date with him.  
 More like stone-cold  
 mean. Then again, I  
 couldn't blame him.  
 After all, I was  
 homeless. He had two  
 homes, a penthouse  
 and a house. I was  
 soaking wet, and  
 dressed as if I was on  
 to my shift at the local  
 diner. He was formally  
 dressed. I flooded the  
 bathroom of one of the  
 most prestigious  
 restaurants in the city,  
 and at that point, he  
 walked out. Like a

stray dog, I followed him, hoping he would give me a lot more than a bone. I didn't expect him to give me an opportunity to work in his office and fifty thousand big ones. I had to work for him and pretend to be his girlfriend. Piece of cake! I took a deep breath. Promised I could do the job and not only did I try to make an impression at work, but I found myself no longer wanting to pretend. I soon realized why they called him LW, because it was far from a piece of cake. More like a walk in the park during a hurricane.

### **The Nick of Time**

Amy Jo Cousins  
"Go on a date," she said. "You'll love it," she said. She was wrong! It had been one year, two months and

seventeen days since my last date. So my best friend Abby decided to sign me up for a dating app. She guaranteed that she could get me the best date of my life within one week. I didn't really want to do it, but I figured what did I have to lose? Turns out that I had: 1. \$500 2. My dignity 3. My patience and 4. My innocence to lose OK, so I didn't really have my innocence to lose, but believe you me, Jack Morrison was my worst date ever. And I've been on a lot of bad dates. Trust me when I say that that was the longest ten hours and 33 minutes of my life. I never wanted to see or speak to him again. But it turns out you don't always get what you want in life, because

Jack showed up the very next day at a family gathering I was attending as a fake plus one. As you can imagine that was a real pickle, Jack wanted to know why I went on a date with him when I'm dating someone else. But he can't know the whole complicated truth of the matter. I'm in a fake relationship and now I'm being blackmailed by the worst date ever. That's not even the worst part. I decided to log onto this new app called "confession board" to seek some advice, but it turns out Jack Morrison is absolutely everywhere and he's not going to leave me alone until I submit to his demands. The world's first time traveler embarks on a multiverse misadventure in this madcap novel from "one of SF's distinctively nutty voices!" (Chicago Tribune). Time travel: been there, done that ... or at least Frank

Mihalik has. On February 17, 1996, Frank discovers the secret to time-travel, or at least he thought he had. He must embark on a voyage through time and space in order to set things right. He must survive parallel universes in which--Oh my!--Shirley Temple plays the awesome role of Dorothy in "The Wizard of Oz"! Only his love, Cheryl, can save him, but he is almost tricked by a parallel-dimension Cheryl and potentially wrecks his love life. How will Frank survive this wild jerk through these dark counter-universes? And will our universe ever be the same?

His Perfect Wife Rodger k. Johnston

The town of Kearsley, between Bolton and Manchester, has a rich

and fascinating history. With around 500 pictures and 70,000 words this book attempts to convey how it has grown from a sparsely populated area comprising of no more than a few dozen farms and cottages to the busy and industrious town of today. Early township records show many interesting details, such as land ownership and how relief was administered to the poor and needy, but also how some unfortunate souls were removed to the dreaded workhouse. The earliest known written record of Kearsley is also shown which dates from around the year 1222, and special permission had to be granted for it to be photographed for reproduction in this

book. Kearsley and the surrounding area became a hotbed for manufacturing as the industrial revolution took hold, with many factories and mills springing up, particularly beside the overworked River Irwell. There are numerous pictures, maps and documents to illustrate how these developed then declined during the twentieth century as post war Britain could no longer compete in these traditional industries. The coal industry is described along with its dangers, and details of several local mining disasters are given. A large section is dedicated to the Unity Brook colliery disaster, which to this day remains as the single worst tragedy in the history of Kearsley.

Unique pictures that were drawn by a local artist at the scene of the disaster during the rescue operation have been uncovered and feature in this compelling section as well as evidence from the inquests that followed. There is a wealth of information on the schools, Churches, public houses, roads, bridges, tram-systems, railways, canals, farms and the former Kearsley Power Station. The neighbouring towns of Farnworth and Clifton are also largely featured, as is the district once referred to as Halshaw Moor, which took in parts of both Kearsley and Farnworth. Again, there are numerous rare and unique pictures, maps and documents to accompany all of these

chapters and areas.

For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa "currently just over one million per year" are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called "artemisinins" are available, they are unaffordable for the

majority of the affected population, even at a cost of one dollar per course. *Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and

transmission will intensify.

Chronic homelessness

is a highly complex

social problem of

national importance.

The problem has

elicited a variety of

societal and public

policy responses over

the years, concomitant

with fluctuations in the

economy and changes

in the demographics of

and attitudes toward

poor and

disenfranchised

citizens. In recent

decades, federal

agencies, nonprofit

organizations, and the

philanthropic

community have

worked hard to

develop and

implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-

effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

There are plenty of contenders for the worst year in history,

whether measured by environmental catastrophe, human suffering, or economic collapse. 536 AD deserves its place at the top of the list of worst years ever for good reason. It's okay if 536 wasn't the first year to jump to mind when ranking the worst ever years in history, but its relative lack of notoriety hides a pretty grim reality. Some estimates suggest that 50% of the Earth's global population died in the decades following 536 as a direct result of the events of that year. That's right, nearly 50% of everybody died because of what happened in 536. What happened to our ancestors 1500 years ago? How did their lives change? Does

that even matter to us today? If so, why? The Worst Year Ever - 536 AD covers all these questions and more, including: ?The miniature ice age that wiped out crops and made eking out an existence more difficult than ever before. ?The emperor who tried to keep his coffers full by taxing the dead.?The plagues of rats that toppled empires.?The lessons history can teach us and what we should be doing about it.?How the actions of some resulted in a much higher survival rate. 536 serves as an example of how humanity has faced terrible crises and, instead of buckling under the pressure, found a way through to the other side.With current environmental and economic

challenges just as, if not more, serious than the challenges of the past, it's valuable to read examples of the past-when the challenges were great and the struggles to overcome them even greater. If you're morbidly curious about a disastrous era in human history, or you're looking for examples to help you put modern challenges into perspective, then The Worst Year Ever - 536 AD is a fascinating place to start.
