BESTSELLER • Barack
Obama's lucid vision of
America's place in the
world and call for a
new kind of politics
that builds upon our

shared understandings
as Americans, based
on his years in the
Senate "In our
lowdown, dispiriting
era, Obama's talent for
proposing humane,
sensible solutions with
uplifting, elegant prose
does fill one with
hope."—Michael Kazin,
The Washington Post In
July 2004, four years
before his presidency,
Barack Obama

electrified the Democratic National Convention with an address that spoke to Americans across the political spectrum. One phrase in particular anchored itself in listeners' minds, a reminder that for all the discord and struggle to be found in our history as a nation, we have always been guided by a dogged optimism in the future, or what Obama called "the audacity of hope." The Audacity of Hope is Barack Obama's call for a different brand of politics—a politics for those weary of bitter partisanship and alienated by the "endless clash of armies" we see in congress and on the campaign trail; a politics rooted in the faith, inclusiveness, and nobility of spirit at

the heart of "our improbable experiment in democracy." He explores those forces—from the fear of losing to the perpetual need to raise money to the power of the media—that can stifle even the best-intentioned politician. He also writes, with surprising intimacy and self-deprecating humor, about settling in as a senator, seeking to balance the demands of public service and family life, and his own deepening religious commitment. At the heart of this book is Barack Obama's vision of how we can move beyond our divisions to tackle concrete problems. He examines the growing economic insecurity of American families, the racial and religious tensions within the

body politic, and the transnational threats—from terrorism to pandemic—that gather beyond our shores. And he grapples with the role that faith plays in a democracy—where it is vital and where it must never intrude. Underlying his stories is a vigorous search for connection: the foundation for a radically hopeful political consensus. Only by returning to the principles that gave birth to our Constitution, Obama says, can Americans repair a political process that is broken, and restore to working order a government that has fallen dangerously out of touch with millions of ordinary Americans. Those Americans are out there, he

writes—“waiting for Republicans and Democrats to catch up with them.”

A #1 New York Times Bestseller A Wall Street Journal Bestseller A USA Today Bestseller The creators of the New York Times bestselling picture books *Rosie Revere, Engineer* and *Iggys Peck, Architect* are back with a story about the power of curiosity in the hands of a child who is on a mission to use science to understand her world. Ada Twist, Scientist, from powerhouse team Andrea Beaty and

David Roberts, is a celebration of STEM, perseverance, and passion. Like her classmates, builder Iggy and inventor Rosie, scientist Ada, a character of color, has a boundless imagination and has always been hopelessly curious. Why are there pointy things stuck to a rose? Why are there hairs growing inside your nose? When her house fills with a horrific, toe-curling smell, Ada knows it's up to her to find the source. What would you do with a problem like this? Not afraid of failure, Ada embarks on a fact-finding mission and conducts scientific experiments, all in the name of discovery. But, this time, her experiments lead to even more stink and get her into

trouble! Inspired by real-life makers such as Ada Lovelace and Marie Curie, Ada Twist, Scientist champions girl power and women scientists, and brings welcome diversity to picture books about girls in science.

Touching on themes of never giving up and problem solving, Ada comes to learn that her questions might not always lead to answers, but rather to more questions. She may never find the source of the stink, but with a supportive family and the space to figure it out, she'll be able to feed her curiosity in the ways a young scientist should. Iggy Peck and Rosie Revere have earned their places among the most beloved children's characters, and they have inspired

countless kids and adults to follow their dreams and passions. Now in her own charming and witty picture book, *determined Ada Twist*, with her boundless curiosity for science and love of the question “Why?,” is destined to join these two favorites. The book is the perfect tool to remind both young girls and women that they have the intelligence and perseverance to achieve their dreams.

The Warmth of Other Suns Harper Collins
#1 NEW YORK TIMES BESTSELLER • The former First Lady, author of *Becoming*, and producer and star of *Waffles + Mochi* tells the inspirational story of the White House Kitchen Garden and

how gardens can transform our lives and the health of our communities. Early in her tenure as First Lady, despite being a novice gardener, Michelle Obama planted a kitchen garden on the White House’s South Lawn. To her delight, she watched as fresh vegetables, fruit, and herbs sprouted from the ground. Soon the White House Kitchen Garden inspired a new conversation all across the country about the food we feed our families and the impact it has on the nutrition and well-being of our children. In *American Grown*, Mrs. Obama invites you inside the White House Kitchen Garden, from the first planting to the satisfaction of the seasonal harvest. She

reveals her early worries and struggles—would the new plants even grow?—and her joy as lettuce, corn, tomatoes, collards and kale, sweet potatoes and rhubarb flourished in the freshly tilled soil. She shares the stories of other gardens that have moved and inspired her on her journey across the nation. And she offers what she learned about planting your own backyard, school, or community garden. *American Grown* features:

- a behind-the-scenes look at every season of the garden's growth
- unique recipes created by White House chefs
- striking original photographs that bring the White House garden to life
- a fascinating history of

community gardens in the United States From a modern-day vegetable truck that brings fresh produce to underserved communities in Chicago, to Houston office workers who make the sidewalk bloom, to a New York City school that created a scented garden for the visually impaired, to a garden in Winston-Salem, North Carolina, that devotes its entire harvest to those less fortunate, *American Grown* isn't just the story of a single garden. It's a celebration of the bounty of our nation and a reminder of what we can all grow together.

#1 NEW YORK TIMES BESTSELLER • Michelle Obama's worldwide

bestselling memoir, *Becoming*, is now adapted for young readers. Michelle Robinson was born on the South Side of Chicago. From her modest beginnings, she would become Michelle Obama, the inspiring and powerful First Lady of the United States, when her husband, Barack Obama, was elected the forty-fourth president. They would be the first Black First Family in the White House and serve the country for two terms. Growing up, Michelle and her older brother, Craig, shared a bedroom in their family's upstairs apartment in her great-aunt's house. Her parents, Fraser and Marian, poured their love and energy into their children.

Michelle's beloved dad taught his kids to work hard, keep their word, and remember to laugh. Her mom showed them how to think for themselves, use their voice, and be unafraid. But life soon took her far from home. With determination, carefully made plans, and the desire to achieve, Michelle was eager to expand the sphere of her life from her schooling in Chicago. She went to Princeton University, where she learned what it felt like to be the only Black woman in the room. She then went to Harvard Law School, and after graduating returned to Chicago and became a high-powered lawyer. Her plans changed, however, when she met and fell in love

with Barack Obama. From her early years of marriage, and the struggle to balance being a working woman, a wife, and the mom of two daughters, Michelle Obama details the shift she made to political life and what her family endured as a result of her husband's fast-moving political career and campaign for the presidency. She shares the glamour of ball gowns and world travel, and the difficulties of comforting families after tragedies. She managed to be there for her daughters' swim competitions and attend plays at their schools without catching the spotlight, while defining and championing numerous initiatives, especially those geared toward

kids, during her time as First Lady. Most important, this volume for young people is an honest and fascinating account of Michelle Obama's life led by example. She shares her views on how all young people can help themselves as well as help others, no matter their status in life. She asks readers to realize that no one is perfect, and that the process of becoming is what matters, as finding yourself is ever evolving. In telling her story with boldness, she asks young readers: Who are you, and what do you want to become?

Dreams from My Father Ten Speed Press
Every president has had some experience as a parent. Of the 43 men who have served in the nation's highest office, 38 have fathered biological children and the other five adopted children. Each president's parenting style reveals much about his beliefs as well as his psychological make-up. James Garfield enjoyed jumping on the bed

with his kids. FDR's children, on the other hand, had to make appointments to talk to him. In a lively narrative, based on research in archives around the country, Kendall shows presidential character in action. Readers will learn which type of parent might be best suited to leading the American people and, finally, how the fathering experiences of our presidents have forever changed the course of American history.

A Promised Land Simon and Schuster

This book examines the recent evolution of online spaces and their impact on networked democracy. Through an illuminating mix of theoretical and methodological analysis, contributors

provide an understanding of how a range of individuals and groups, including activists and NGOs, governments and grievers, are using digital technologies to influence public debates. Contributions consider these phenomena in a global contemporary context, providing within the same volume rigorous examinations of the design of digital platforms for deliberation, users' attempts to manipulate those platforms, and the ways activists and governments are responding to emerging threats to democratic discourse. Providing diverse, global case studies, this collection is a valuable tool for academics within and beyond the fields of

new media, communication, and information policy and governance.

Delacorte Press
Now an eight-part docuseries on Apple TV+ Hillary Rodham Clinton and her daughter, Chelsea, share the stories of the gutsy women who have inspired them—women with the courage to stand up to the status quo, ask hard questions, and get the job done. She couldn't have been more than seven or eight years old. "Go ahead, ask your question," her father urged, nudging her forward. She smiled shyly and said, "You're my hero. Who's yours?" Many people—especially girls—have asked us that same question over the years. It's one of our favorite topics.

HILLARY: Growing up, I knew hardly any women who worked outside the home. So I looked to my mother, my teachers, and the pages of Life magazine for inspiration. After learning that Amelia Earhart kept a scrapbook with newspaper articles about successful women in male-dominated jobs, I started a scrapbook of my own. Long after I stopped clipping articles, I continued to seek out stories of women who seemed to be redefining what was possible. CHELSEA: This book is the continuation of a conversation the two of us have been having since I was little. For me, too, my mom was a hero; so were my grandmothers. My early teachers were

also women. But I grew up in a world very different from theirs. My pediatrician was a woman, and so was the first mayor of Little Rock who I remember from my childhood. Most of my close friends' moms worked outside the home as nurses, doctors, teachers, professors, and in business. And women were going into space and breaking records here on Earth. Ensuring the rights and opportunities of women and girls remains a big piece of the unfinished business of the twenty-first century. While there's a lot of work to do, we know that throughout history and around the globe women have overcome the toughest resistance imaginable to win victories that have made progress

possible for all of us. That is the achievement of each of the women in this book. So how did they do it? The answers are as unique as the women themselves. Civil rights activist Dorothy Height, LGBTQ trailblazer Edie Windsor, and swimmer Diana Nyad kept pushing forward, no matter what. Writers like Rachel Carson and Chimamanda Ngozi Adichie named something no one had dared talk about before. Historian Mary Beard used wit to open doors that were once closed, and Wangari Maathai, who sparked a movement to plant trees, understood the power of role modeling. Harriet Tubman and Malala Yousafzai looked fear in the face and

persevered. Nearly every single one of these women was fiercely optimistic—they had faith that their actions could make a difference. And they were right. To us, they are all gutsy women—leaders with the courage to stand up to the status quo, ask hard questions, and get the job done. So in the moments when the long haul seems awfully long, we hope you will draw strength from these stories. We do. Because if history shows one thing, it's that the world needs gutsy women.
