A DAILY TELEGRAPH and IRISH TIMES BOOK OF THE YEAR The must-read music book of the year, now with a brand new chapter covering the death of Taylor Hawkins and his massive Wembley memorial concert. In *Bodies*, author Ian Winwood explores the music industry's many failures, from addiction and mental health issues to its ongoing exploitation of artists. Much more than a touchline reporter, Winwood also tells the story of his own mental health collapse, following the shocking death of his father, in which extinction-level behaviour was given perfect cover by a reckless industry. 'This is such a shrewd, funny, psychologically perceptive, frank, well-written, jawdropping book. Absolutely buy and read the hell out of this.' DAVID STUBBS 'Winwood makes a compelling argument and overturns some long-held notions about "rock and roll excess" by deftly tying together a vast amount of information . . . and liberally lacing it with dark, self-deprecating humour.' In this inspirational memoir, Grey's Anatomy actor Isaiah Washington explains how filling in the gaps of his past led him to discover a new passion: helping those less fortunate. DNA testing revealed that Washington was descended from the Mende people, who today live in Sierra Leone. For many people, the story would end with the results of the search; for Isaiah, it had just begun. Discovering his roots has given him a new purpose, to lead an inspirational life defined by faith and charity. After visiting Sierra Leone, and researching the country and its needs, Washington forged a strong relationship with the Mende people, and was inducted as Chief Gondobay Manga in May 2006. He established The Gondobay Manga Foundation to institute many improvements suggested by the country's people, addressing educational concerns, practical issues (road building, water supply, and electricity), and rehabilitative projects. Dual citizenship has been a dream of African-Americans such as W.E.B. DuBois, Martin Luther King, Jr. and Malcolm X, but Washington became the first to realize that honor in 2008. A twofold milestone, it was also the first time an African president granted citizenship based on DNA.

New York Times Bestseller The beloved actress and star of One Tree Hill, White Collar, and Lethal Weapon, Hilarie Burton Morgan, tells the story of leaving Hollywood for a radically different kind of life in upstate New York with her husband Jeffrey Dean Morgan—a celebration of community, family, and the value of hard work in small town America. While Hilarie Burton Morgan's hectic lifestyle as an actress in New York and Los Angeles gave her a comfortable life, it did not fulfill her spiritually or emotionally. The imagining of disaster has intensified across a wide range of media entertainment formats and genres in recent years and themes of disaster are regularly deployed in fictional films, television drama series, drama-documentaries, comic books and video games. This being the case, it is therefore vital that film and media scholars pay attention to the ways in which disaster is presented to us, to the figurative strategies employed, to the representational history of disaster in media, to the metaphorical resonances of disaster themes, and even to the ways in which entertainment media texts might be understood as part of a broader discourse of disaster within certain historical and cultural contexts. *Dramatising Disaster* presents new and innovative research from both early career and more established academics. Some of the chapters in this edited collection are based upon papers originally presented at a highly successful conference study day held by the School of Film, Television and Media at the University of East Anglia in 2011, while others are specifically solicited contributions. Distinct from previous, more particularised film and media studies in this area, this edited collection is focused not upon a specific disaster or specific disaster context, but upon the wider topic of disaster in popular culture. *Simon & Schuster Mega Crossword Puzzle Book #22* Kensington Publishing Corp.

Often overlooked in the history of broadcast television, The CW

became a top-rated cable network in primetime during the mid-2000s, at a moment when many critics predicted the death of the medium. Launched as a joint venture and successor to The WB and UPN, The CW focused programming on an 18 to 34-year-old, predominantly female audience and soon won over viewers with shows like *Gossip Girl*, *Jane the Virgin* and the DC Arrowverse franchise. Nimble adapting to the streaming services era, the network has strengthened new series development and its innovative distribution system. This collection of new essays examines The CW's business model, marketing strategies and most popular series.

A distinction is drawn between two very similarities based on the two types of characters that the same type of society produced. Orie, Puzo and Nmaku who hail from Angwa and the adjoining Ocha remained back in the village and made their lives almost permanently there rarely knowing what was going on in the outside world but being nonetheless greatly influenced by the latter. Their daily chores are dictated by the daily basic necessities of the moment and they have little to worry perpetually about. A lot of their life is controlled by the dictations and predictions of the traditional medicine man who occasionally misfires in his predictions which have no scientific basis supporting them. His situation is often taken advantage of by the political class who have little or nothing to lose even if the polity collapses. But Livinus on the other end of the spectrum emerges from the civil war and through a dint of luck and hard work studies hard and becomes a doctor. He even proceeds overseas despite a close shave by arsonists. He specializes and returns home to Akunwanta town from where he is again catapulted by fate and focus to become the governor of his state after a battle between titans eliminates the principal contestants. He at first meant well and had the intention of helping to reform society. Post election litigation and his lack of the economic leverage almost cost him his mandate. But again fate plays a hard one on him and because of his lack of cash he gets tied up to the economic vampires of his society. He is bailed out by a coalition of these vampires and narrowly reclaims his mandate only after colossal bribing of umpires who were least expected to soil their hands. He decides never to go begging ever again and hence he delves headlong into the rot and decay, not by his will but by the circumstances prevailing around him.

There are undercurrents and peripheral taste preferences that are a defining part of our individual and collective cultural experience. Music is no exception. George Plasketes adapts the iconic "A-side/B-side" dichotomy from the 45 r.p.m. for use as a unique conceptual, critical, historical, and cultural framework for

exploring and threading together a variety of popular music and media texts. The profiles and perspectives focus on the peripheries; on texts which might be considered "B-sides" overlooked, underappreciated, and unsung cases, creators, patterns and productions that have unassumingly, but significantly, marked popular culture, music and media during the past 40 years. The underappreciated yet enduring contributions of a variety of creative individuals in music, television and film are a centerpiece of this volume: actress Doris Day's son, Terry Melcher, a 1960s music producer whose imprint is on the surf, country blues, garage pop and most importantly the folk rock genre; Hans Fenger's kid chorus cover project, a musical variation of "outsider art" that became representative of the tribute wave that began in the 1990s and continues today; versatile guitarist virtuoso Ry Cooder's extensive film soundtrack work; World Music "missionary efforts" of American artists beyond Paul Simon's *Graceland*, including Neil Diamond's precursor with Tap Root Manuscript in the 1970s and the exotic adventures of Henry Kaiser and David Lindley in Madagascar and Norway—to name just a few examples. These B-sides represent undercurrents, but they resonate as overtones in the mainstream of music and culture, many as historical hinges. Collectively, these B-sides are an A-side antidote of outskirt observations, individual snapshots of artists, artifacts and rituals, genres and generations, producers and musical productions in television, film and video. They constitute an important connect-the-dots cultural chronicle with a multi-layered context—social, legal, historic, economic, technological, generational, aesthetic—for interpreting the interrelations between creators and institutions, the music market place, the production of culture and important connections between the peripheral and the popular.
