What hidden skill links successful people in all walks of life? The answer is surprisingly simple: they know how to ask the right questions at the right time. Questions help us break down barriers, discover secrets, solve puzzles, and imagine new ways of doing things. The right question can provide for us not only the answer we need right then but also the ones we'll need tomorrow. Emmy award-winning journalist and media expert Frank Sesno wants to teach you how to question others in a methodical, intentional way so that you can find the same success that others have found by mastering this simple skill. In Ask More, you will learn: How the Gates Foundation used

strategic questions to plan its battle against malaria How turnaround expert Steve Miller uses diagnostic questions to get to the heart of a company's problems How creative questions animated a couple of techie dreamers to brainstorm Uber How journalist Anderson Cooper uses confrontational questions to hold people accountable Throughout Ask More, you'll explore all different types of inquiries--from questions that cement relationships, to those that will help you plan for the future. By the end, you'll know what to ask and when, what you should listen for, and what you can expect as the outcome.

When Barack Obama won the 2008 presidential election, he also won a long-running debate with his wife Michelle. Contrary to her fears, politics now seemed like a worthwhile, even noble pursuit. Together they planned a White House life that would be as normal and sane as possible. Then they moved in. In the Obamas, Jodi Kantor takes us deep inside the White House as they try to grapple with their new roles, change the country, raise children, maintain friendships, and figure out what it means to be the first black President and First Lady. Filled with riveting detail and insight into their partnership, emotions and personalities, and written with a keen eye for the ironies of public

life, *The Obamas* is an intimate portrait that will surprise even readers who thought they knew the President and First Lady.

Do you find it difficult to start a long conversation with your kid after a day at school? Do you always meet a dead-end when trying to know about your kids' thoughts, emotions and wants? These conversation starters are proven to stimulate real conversation, where kids will feel well-cared for, and parents will be satisfied to know more about their kids' state of mind and their activities in school. With such, weaknesses are being detected and a parent will easily know what to emphasize when it comes to teaching a kid a new skill. Also, these questions have been

experimented in honing kid's social intelligence, where the stimulation of thoughts, disposition, and perception will take place in kids. Your kid will learn how to talk about themselves, learn effective listening skills, express themselves in groups and be able to ask the right questions in class. The overall shyness and social anxiety common in most kids can be eliminated using the conversational strategies. Since practice makes perfect, a kid will learn how to open up about what they feel without the need to be timid or doubtful about other people's reaction. Ultimately, they will grow into confident adults, responsible and down to earth. With over 117 questions, your conversation will never be boring. You can blend any of the questions during dinner or even while they are playing. Since kids' mental ability can be determined through the answers to these questions, you will easily know when to allow them to assume certain responsibilities around the house, when to just let go of a particular control, and when to warn them about social vices and peer pressure. That's just some of the benefits this book can offer. Now, scroll to the top of this page and buy the book and get started today.

This book outlines a practical, four-question model that school and business leaders can use to engage stakeholder feedback, determine the organization's DNA, and establish a collective vision for improvement. Stakeholder feedback is analyzed at both the focus- and whole-group level. Results are then woven into the organizational improvement plan. Practical examples of leadership experiences in implementing the four-question model are included as well as the theory behind why these four questions are the right questions to ask. Each chapter ends with a set of reflective questions that leadership teams can utilize individually or in an organizational book study or Professional Learning Community (PLC).

201 Questions to Ask Your Kids Do you have trouble talking to your kids? Does a successful conversation with your child consist of one-word responses or abrupt physical acknowledgments? Does your son or daughter get upset at the most innocent questions? Join the club. Unfortunately, communicating well with kids is something every parent desires but few achieve. We love our children, but talking to them in a meaningful manner isn't always easy. The questions in this book are designed to help. No matter what age or sex your children, no matter how many children you have, no matter how good or bad your current parent/child relationship, this simple "game" will get your family talking more. And when you're talking--really talking about emotions and fears and attitudes--you'll be learning about each other as individuals and growing closer together as a group. An Introduction For Kids Wouldn't it be fun to find out more about what your father or mother was like when he or she was a kid? Or get to tell your parents which of their friends you think looks dorkiest? Wouldn't conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn't get done? There are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful. Of course, conversation should be about serious things some of the time--some of the questions in this book are about very serious topics. But other times, questions should be asked just to create new ways to think about things, look back on our lives, or imagine what life would be like if we could design in any way we wanted. In fact, I wrote this book because I think talking can be terrific fun, and even talking to your parents and brothers or sisters can be a kind of great game. Everyone can get to know each other and laugh a lot--and be amazed from time to time. No one wins or loses, but there is an element of surprise in finding out personal information about parents--and sharing some of your ideas, daydreams, and opinions with them. My idea is to think of some of the world's most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they'd like to hear about. Each person picks a question to ask and then answers a question when his or her turn comes around. All you have to do is choose from the list under 201 Questions to Ask Your Parents and ask any question you want. Your parents can take as long or as short a time they want to answer. Any you can all discuss the topic if you like. But then they go into their section of the book and ask you questions. Some of them might not be so interesting, but others--like asking you who is the meanest kid you know--might be cool to think about and share with them. They'll learn a lot about what you think are ways kids act nasty! You can wiggle out of any two questions that don't interest you or are embarrassing--but no more than that. It's good if a question makes you squirm a little; that means you either haven't thought about it before, or you have but you haven't wanted to deal with it. But why not try out and answer? Pick a set length of time to play for--and my guess is you'll want to extend it. These questions get addictive! You can play them at the dinner table, or after dinner, or on a car trip, or anytime you feel like hearing what your parents say about something. So, this is a book about how to have interesting and often funny conversations with your family. It's a way to avoid dead, boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about. I know that in my family, it is too easy for us to get stuck talking about practical things like who has to be taken

where the next day. That isn't particularly fun. It doesn't let me in on what my kids are thinking, and it doesn't help my two teenagers learn things that might help them understand me a little better. An ingenious book that speaks to both parents and their kids. 201 QUESTIONS TO ASK YOUR KIDS/201 QUESTIONS TO ASK YOUR PARENTS is two books in one. Open it from one side, and it provides parents with 201 questions for their children intended to spark discussion, help reveal who their children really are, and help children think about themselves and the world in new and useful ways. Turn it over, and there are 201 questions children can ask back to their parents. Devised as an interactive "game," this is a book that can get any family talking-really talking about facts and fears and attitudes. Too often people go to interviews prepared only to answer questions. They study the tough questions for days hoping to give the right responses on D-Day. These same people treat the interview as a cross examination; they see themselves on trial, under the spotlight, deer in the

headlights. People who are being interviewed need another attitude, an attitude that says, "I'm here to interview you, to see if I want to bring my talents and experiences to your organization." Most people don't know how to do this. However, if armed with a few questions, they can even the playing field and engage in a useful conversation with their hosts. This book provides a set of questions that are appropriate for any job candidate to ask and allows candidates to participate in a dialogue, a conversation. Experience suggests that only a handful of questions are necessary in most interviews. Review all of the questions. Choose the ones that you believe provide you with the information you need. Learn to interview the interviewer!
