*Report* Pullach bei München : Verlag Dokumentation ; New York : R. R. Bowker "Despite a long history of geologic investigations in the Ozarks, new studies and analyses continue to elucidate our understanding of the complex interconnection between the basement, extensive carbonate

platforms, structural overprinting, mineralization, karstification, and hydrology. This guidebook volume highlights a few of these aspects as well as the connection to culture, history, and economic development of the Ozarks region."-- Publisher's description.

Often characterized by distinctive chipped-stone technology, the Calf Creek

cultural horizon made its first appearance in the central and southern plains of North America some six thousand years ago. Distributed over a known area of more than 500,000 square miles, it is one of the largest post-Paleoindian archaeological cultural complexes identified to date. One of the most notable aspects of Calf Creek culture is its distinctive, deeply notched bifaces, many

of which show evidence of heat-treating. Recent targeted dating suggests that these unique traits, which required exacting knapping and other techniques for production, arose in a relatively narrow window, sometime around 5,950–5,700 calendar years before the present. Given the wide geographical distribution of Calf Creek artifacts, however, researchers

surmise that these technological innovations, once adopted, spread fairly quickly throughout the associated cultural groups. Editors Jon C. Lohse, Marjorie A. Duncan, and Don G. Wyckoff have collected in this comprehensive volume much of what is currently known about the Calf Creek cultural horizon. In a collaboration involving professional and academic archaeologists

, landowners, and avocationalists, *The Calf Creek Horizon* brings together for the first time in a single source fine details of geographic distribution, regional variability, typology, and technological aspects of Calf Creek material culture. This first-ever “big picture” view will inform and direct related research for years to come. *Cumulative List of Organizations Described in Section 170*
