You'll also find helpful articles on what you need to know about two-year colleges: advice for adult students on transferring and returning to school ; how to survive standardized tests; what international students need to know

about admission to U.S. colleges; how to manage paying for college; and interesting "green" programs at two-year colleges, and much more.

Money for Graduate Students in the Physical and Earth Sciences: 2003-2005

Princeton Review
From one of the world's most admired women, this is former National Security Advisor and Secretary of State Condoleezza Rice's compelling story of eight years serving at the highest levels of government. In her position as America's chief diplomat, Rice traveled almost continuously around the globe, seeking common ground among sometimes bitter enemies, forging agreement on divisive issues, and compiling a

remarkable record of achievement. A native of Birmingham, Alabama who overcame the racism of the Civil Rights era to become a brilliant academic and expert on foreign affairs, Rice distinguished herself as an advisor to George W. Bush during the 2000 presidential campaign. Once Bush was elected, she served as his chief adviser on national-security issues – a job whose duties included harmonizing the relationship between the Secretaries of State and Defense. It was a role that deepened her bond with the President and ultimately made her one of his closest confidantes. With the September 11, 2001, terrorist attacks, Rice found herself at the

center of the Administration's intense efforts to keep America safe. Here, Rice describes the events of that harrowing day – and the tumultuous days after. No day was ever the same. Additionally, Rice also reveals new details of the debates that led to the war in Afghanistan and then Iraq. The eyes of the nation were once again focused on Rice in 2004 when she appeared before the 9-11 Commission to answer tough questions regarding the country's preparedness for – and immediate response to – the 9-11 attacks. Her responses, it was generally conceded, would shape the nation's perception of the Administration's competence during the

crisis. Rice conveys just how pressure-filled that appearance was and her surprised gratitude when, in succeeding days, she was broadly saluted for her grace and forthrightness. From that point forward, Rice was aggressively sought after by the media and regarded by some as the Administration's most effective champion. In 2005 Rice was entrusted with even more responsibility when she was charged with helping to shape and carry forward the President's foreign policy as Secretary of State. As such, she proved herself a deft crafter of tactics and negotiation aimed to contain or reduce the threat posed by America's enemies. Here, she reveals the

behind-the-scenes maneuvers that kept the world's relationships with Iran, North Korea and Libya from collapsing into chaos. She also talks about her role as a crisis manager, showing that at any hour -- and at a moment's notice -- she was willing to bring all parties to the bargaining table anywhere in the world. No Higher Honor takes the reader into secret negotiating rooms where the fates of Israel, the Palestinian Authority, and Lebanon often hung in the balance, and it draws back the curtain on how frighteningly close all-out war loomed in clashes involving Pakistan-India and Russia-Georgia, and in East Africa. Surprisingly candid in

her appraisals of various Administration colleagues and the hundreds of foreign leaders with whom she dealt, Rice also offers here keen insight into how history actually proceeds. In *No Higher Honor*, she delivers a master class in statecraft -- but always in a way that reveals her essential warmth and humility, and her deep reverence for the ideals on which America was founded. *The Business of Higher Education [3 volumes]*

There are hundreds of books available that coach kids on writing college application essays, improving SAT scores and trying to beat the admissions system. *Admissions Confidential* is a definitive look at why those books don't

work. Toor lifts the veil on a process that anxious parents and high school students have never had decoded before. And they may be shocked to find out: --that elite colleges spend thousands of dollars recruiting students they will never admit -- why some students at the bottom of their high school classes are admitted to top schools when the valedictorians are rejected --how pricey independent college counselors can hurt an applicant's chances -- why admission to a top school depends on who reads your application - -why the top of the class at a high-performing high school may end up at their second and third choice Written in engaging first-person

and covering the entire admissions process-- from recruiting to enrollment--Admissions Confidential is a year in the life of a college admissions officer.

Application for Grants Under National Graduate Fellowships in the Arts, Humanities, and Social Sciences

Princeton Review
Packed with resources to help parents make sense of the college application process, conduct a college search, and help guide their child's completion of their college application. The author has included a variety of tools to compare one school to another, keep track of important application deadlines, and track possible scholarship aid. Readers from around the world have praised

its value to parents who want to make sense of the college gauntlet without hovering and taking control away from their children. One reviewer has written: Stuart White's new book takes a unique focus on the role of the parent of one of the hundreds of thousands of overachieving high schoolers. Whereas most books are written for parents that micro manage and compel their children into the high achiever stereotype, Prof. White's book centers on a rather beautiful love story between him and his daughter as she went through the college admission process. Another reader has written: Thank you for sharing your helpful guide to the college application process. I

have read many articles and listened to many podcasts regarding the process, yet still learned more from your book. I appreciated your openness and candidness regarding helicopter parenting. I think it's important to include that advice in this book, as most people reading a book like this will lean toward the helicopter side of parenting. The author's side by side journey with his daughter ended with her admission to Yale University.

Should I go to graduate school? How do I choose where to apply? Are my grades and accomplishments good enough to get in? Who should I ask to write

recommendation letters for me, and how should I approach these people? How do I write my "personal statement?" When will I hear my fate, and how should I make my final decision? These are just a few of the many questions to which this well-researched, thorough, and extremely user-friendly book offers answers. Students who are contemplating graduate training in psychology, counseling, and related fields are often apprehensive and confused about applying to graduate school, but this book takes the guesswork and anxiety out of the process. The tone and features (such as the Q&A format, timeline for application-related tasks and activities,

and special advice for special populations) that made the first edition so successful, eliciting hundreds of thank-you notes and e-mail messages to the author, are just as evident in this new edition. The book has been thoroughly updated to include coverage of new topics such as use of the internet and e-mail, as well as changing trends in the professions. The most obvious difference is that the book is now significantly shorter as a result of meticulous rewriting, making it even easier to use. There have been attempts since the publication of the first edition to copy the format of this book, but none of the others have successfully duplicated the depth of

research-based advice and the supportive style that make this book the guide of choice for thousands of graduate-school bound students and their advisors.
