My book is about an eight-year journey of getting a diagnosis of Parkinson's disease. I have ten to eleven years of experience working as a physical therapist assistant. I have experience in water, hospital, and

nursing home while battling this condition. I have had to plead my own disability case and, after being awarded my back pay, found the treatment of choice, which is stem cell. I am the first person in West Tennessee to have this treatment. The stem cell treatment stops the progression of the disease and the symptoms. While waiting to get the stem cell treatment, I used my experience as a physical therapist assistant to help control my symptoms such as line dancing, playing cards, and swimming that stopped the tremor. My hope is that my journey and experiences will help other people who are dealing with Parkinson's disease and similar conditions and to get the awareness out to the community.
