Diversity, equity, and inclusion (DEI) are the buzzwords of the business world, but it's the statistics that sting: 85% of corporate executives and board members in the U.S. are white men.

Companies are trying to create more inclusive workplaces by creating new policies and changing hiring practices, but they're missing allyship. As top DEI Consultant Di Ciruolo asks readers, "Why should people care about being allies?". The current system, she reveals, is full of blame for inequalities. It is full of shame, too, as insiders at top tech companies share eye-opening stories about what DEI is really like in Silicon Valley and beyond. But allyship isn't about blame or shame; it's about action. Now, Ciruolo shows why allyship is crucial for every business within Ally Up. Leaders are expected to understand systems of inequality in the workplace and beyond to promote more inclusive and higher performing teams. Ally Up is a how-to guide written with exactly those goals in mind.

Programs serve as a crucial link between strategy and the execution of business results and organizations implement them to achieve strategic goals. Although the practice of program management has evolved in lockstep with the project management profession, the root causes of program failure remain. In this step-by-step guide, Irene Didinsky offers a standardized approach to program management, closing the knowledge gaps and variations that currently exist across organizations and industries. For the first time, Practitioner's Guide to Program Management walks the reader through all the key components of effective program management. Using a case study example of an actual process improvement program, Didinsky discusses the qualities of excellence in program leadership, the importance of organizational strategy alignment throughout the program life cycle, how a program realizes benefits, and how to manage conflicting priorities of stakeholders. This comprehensive resource also includes an historical overview

of the professionalization of the field, outlines the logistics of forming a program management community of practice, and concludes with a glossary of terms. With this desktop manual in their hands, practitioners can expect to thrive and guarantee the success of their programs.

It has been decades since many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an important pedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights to students. This volume fills that gap. It has twenty Indian cases related to different aspects of business management. The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching or online lecture sessions for the faculty and students of business management.
