This book takes a comprehensive approach to all aspects of mental health, holistically examining the cognitive, emotional, social, and spiritual dimensions of mental health. By examining mental health from a variety of perspectives, the authors have created a holistic view that incorporates public health, medicine and psychiatry, psychology, counseling,

and health education. Both classic and contemporary sources support the basic premise of the text, that total health is a complex tapestry of many wellness factors, but that mental health is the integrating cloth woven throughout that lends substance and support to the quality of human experience. For mental or emotional health counselors.

Health Economics

Routledge

The authors have tackled the subject from the point of view of the profession

rather than that of the economist. International concern about health care costs has resulted in widespread policy reforms, most notable has been the introduction of market mechanisms for the provision of public health care services.

What is health? How can I tell if I am healthy? Can I

control my own health? How can I influence my future health? You may have just begun to ask yourself questions like these. At one time you might have said that a healthy person is anyone who does not have a cold or some other illness. Now that you are older, you may realize that this definition does not include all the things that cause you to feel well or to be healthy. - p. 2.

economic theory, recent research, and health policy problems into a comprehensive overview of the field. This thorough update of a classic and widely used text follows author Charles E. Phelps' thirteen years of service as Provost of the University of Rochester. Accessible and intuitive, early chapters use recent empirical studies to develop essential methodological foundations. Later chapters build on these core concepts to focus on key policy areas, such as

the structure and effects of Medicare reform, insurance plans, and new technologies in the health care community.
