Weight Lifting Is a Waste of Time: So Is Cardio, and There's a Better Way to Have the Body You Want
McGraw Hill Professional
Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict

that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to

change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who

managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology,

and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

The Barbell Prescription: Strength Training for Life After 40 directly addresses the most pervasive problem faced by aging humans: the loss of physical strength and

all its associated problems - the loss of muscle mass, bone mineral loss and osteoporosis, hip fractures (a terminal event for many older people), loss of balance and coordination, diabetes, heart disease related to a sedentary lifestyle, and the loss of independence. The worst advice an older person ever gets is, Take it easy. Easy makes you soft, and soft makes you dead. The Barbell Prescription maps an escape from the usual fate of older adults: a logical, programmed

approach to the hard work necessary to win at the extreme sport of Aging Well. Unlike all other books on the subject of exercise for seniors, The Barbell Prescription challenges the motivated Athlete of Aging with a no-nonsense training approach to strength and health - and demonstrates that everybody can become significantly stronger using the most effective tools ever developed for the job.

Many women feel as if they do not do enough and are not enough.

They're always trying hard to be good: a good friend, mom, wife, Christian, employee, or ministry leader, hoping for that "atta-girl" from God.

With compelling illustrations from her own life, Christine Hoover leads readers to the understanding that they're living by a lesser gospel, the gospel of

goodness, one without Christ's grace. Relying on Scripture, they can start asking, "What does God want for me?" before asking, "What does God want from me?" Women will breathe a sigh of relief at this powerful message of freedom and hope. Rather than serving God out of obligation or duty, they'll be compelled to love and serve God with great joy.

The A-to-Z guide to essential vitamins, minerals, and nutrients, so you can ditch synthetic

supplements and promote health naturally with nourishing foods. Vitamins and minerals are the building blocks of good health. But the heavily processed foods that are so common in today's modern diet are stripped of these nutrients, leaving many people nutrient deficient despite meeting (or exceeding) their daily calorie needs. The accepted solution is to take supplements created in a lab, but the dosage and interactions can be confusing, and supplements are loosely

regulated and not always foolproof, especially since our bodies are designed to receive nutrients from natural, whole foods. Eat Your Vitamins features fifty key vitamins, minerals, and other nutrients essential to your health. You will find clear definitions of each nutrient along with the role it plays in the body, how it is best consumed and absorbed, recommended daily doses, and detailed lists of foods and natural sources that contain the vitamin along with a

recipe for a nutrient-rich meal. Ditch the synthetic supplements and make the right choice about how to properly feed and fuel your body.

The Fat Flush® Plan melts fat from hips, waist, and thighs in just two weeks and re-shapes your body while detoxifying your system. The Fat Flush Plan is a groundbreaking low carb/detox diet and fitness program. Fat Flush is known as the only diet program that gets rid of

bloat, supports the liver, cleans up the lymph, and helps to eliminate the appearance of cellulite – for good. An international best-seller with legions of devoted followers, The Fat Flush Plan has been featured on "The View," as well as in cover articles in Time, Glamour, Self, and many others. It is based upon essential fats (such as flax seed oil and flax seeds), balanced proteins (including eggs, meat, fish, and moderate soy) plus low-glycemic healthy carbs from fat flushing fruits and

vegetables. The Plan also features “cleansing” tonics such as unsweetened cranberry juice and water, the “Long Life Cocktail,” and daily hot water and lemon juice as well as a delicious array of fat burning, water regulating, and insulin controlling herbs and spices (think cayenne, mustard, cilantro, parsley, cinnamon, and cloves). *The Barbell Prescription* Jaico Publishing House Finally, the solution to the #1 reason we don’t exercise: time. Everyone has one minute. A decade

ago, Martin Gibala was a young researcher in the field of exercise physiology—with little time to exercise. That critical point in his career launched a passion for high-intensity interval training (HIIT), allowing him to stay in shape with just a few minutes of hard effort. It also prompted Gibala to conduct experiments that helped launch the exploding science of ultralow-volume exercise. Now that he’s the worldwide guru of the science of time-efficient workouts,

Gibala's first book answers the ultimate question: How low can you go? Gibala's fascinating quest for the answer makes exercise experts of us all. His work demonstrates that very short, intense bursts of exercise may be the most potent form of workout available. Gibala busts myths ("it's only for really fit people"), explains astonishing science ("intensity trumps duration"), lays out time-saving life hacks ("exercise snacking"), and describes the fascinating

health-promoting value of HIIT (for preventing and reversing disease). Gibala's latest study found that sedentary people derived the fitness benefits of 150 minutes of traditional endurance training with an interval protocol that involved 80 percent less time and just three minutes of hard exercise per week. Including the eight best basic interval workouts as well as four microworkouts customized for individual needs and preferences (you may not quite want

to go all out every time), *The One-Minute Workout* solves the number-one reason we don't exercise: lack of time. Because everyone has one minute.

The most successful fitness and weight loss stories are from those who can self-motivate and are willing to learn. These qualities are more valuable than having the worlds most qualified and expensive personal trainer at your disposal. If you are looking for a home workout fitness routine that:
* Can be done from your own home
* Uses minimal fitness equipment and utilises bodyweight

training* Is progressive for at least 6 weeks * Is designed to effectively burn fat, tone muscle and develop cardiovascular fitness* Won't take you more than 30 minutes four times a week
Then this is the one for you!
Hi, I'm James Atkinson (Jim to my friends and readers). I'm a qualified personal trainer/ fitness coach, competing bodybuilder and have a burning desire to help others reach their fitness goals. I have been training for over fifteen years. This training has taken me from long

distance running to bodybuilding competition. It is fair to say that I have learned the secrets of weight loss and fitness from my own personal journey. I have been fat, skinny and muscle bound throughout my fitness career and I really feel fulfilment from helping and advising others when it comes to their goals. So I have designed this home workout training routine to effectively burn fat, tone muscle and develop cardiovascular fitness. In this day and age, the pace of life is fast for

many, and there are probably millions of people that would say that they haven't got enough time to lose fat, tone up or work on developing their fitness. But my home workout routine is not something that will take up hours of your day, I can tell you that you won't even need to train every day, you just have to follow the routine that will last less than 30 minutes for a maximum of four days per week and each week, you will have a slight upgrade to the previous week. This

type of consistent progressive training is a sure fire way to get your fitness results! If I were looking for fat loss, muscle tone and total body fitness and I did not have access to a gym, this is what I would do. Be warned! Although this is a "stand alone" fitness routine, I would NOT recommend this to the beginner to fitness, some of the exercises may be too advanced for someone just starting out. If you do happen to be a beginner, I would recommend my "Home

workout for beginners" fitness routine. The home workout for beginners routine was designed as a "prequel" to this and if you were to start with it, and then decide to try this, you will find that it follows on very nicely. Good luck! I see you on the inside! Please remember that I am always happy to help where I can, so give me a shout if you get stuck or have any questions. All the best Jim Email: Jim@swapfat4fit.com

You've been lifting for a few years. When you take your shirt off, do you look like a professional athlete? Do you even look like you work out? Many fitness "experts" defend weights and cardio like they are infallible, but where are the results? Why does almost nobody look even marginally athletic? Fitness may be the most failed human endeavor, and you are about to see how exercise science has missed some obvious principles that

when enacted will turn you into the superhuman you always wanted to be. In *Weight Lifting is a Waste of Time*, Dr. John Jaquish and Henry Alkire explore the science that supports this argument and lay out a superior strength training approach that has been seen to put 20 pounds of muscle on drug-free, experienced lifters (i.e., not beginners) in six months.
