The Buffalo Law School; a History, 1887-1962 Vault Inc.

An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools. Employment results were terrible. Applications and enrollment cratered. Revenue dropped precipitously and several law schools closed. Almost all law schools shrank in terms of students, faculty, and staff. A handful of schools even closed. Despite these dismal results, law school tuition outran inflation and student indebtedness exploded, creating a truly toxic brew of higher costs for worse results. The election of Donald Trump in 2016 and the subsequent role of hero-lawyers in the "resistance" has made law school relevant again and applications have increased. However, despite the strong early returns, we still have no idea whether law schools are out of the woods or not. If the Trump Bump is temporary or does not result in steady enrollment increases, more schools will close. But if it does last, we face another danger. We tend to hope that crises bring about a process of creative destruction, where a downturn causes some businesses to fail and other businesses to adapt. And some of the reforms needed at law schools are obvious: tuition fees need to come down, teaching practices need to change, there should be greater regulations on law schools that fail to deliver on employment and bar passage. Ironically, the opposite has happened for law schools: they suffered a harrowing, near-death experience and the survivors look like they're going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place. The urgency of this book is to convince law school stakeholders (faculty, students, applicants, graduates, and regulators) not to just return to business as usual if the Trump Bump proves to be permanent. We have come too far, through too much, to just shrug our shoulders and move on.

This essay sheds light on the top hacks for how to easily get through a law school and also elucidates why earning a law degree does not warrant the opportunity cost. Moreover, how to make substantial money without being a lawyer is delineated in this essay. Earning a law degree in the digital era is easier than anytime in history. An exorbitant amount of hacks can be leveraged so that that you attain a law degree, such as a JD or LLM, from an accredited university in an expeditious

manner with minimal work on your end even though you cannot earn law school course credits through passing DSST nor CLEP exams. In order to finish a law degree program in an expeditious manner, law students can take online law school courses, on-ground law courses at night, weekend law courses, and can even complete law school courses amid the summer semesters so that they can finish at least a year ahead of their peers by maximizing their course load. They can also seek permission from the dean of their law school in order to enroll in more law courses than is typically permitted as the maximum credit hour load. This can allow law students to graduate from their law school program earlier than their peers. Law school programs provide flexible course formats by allowing law students to enroll in online courses, weekend courses, or even night courses. Completing a law school program can be whittled down to a 2 year duration instead of a 3 year time window for the utmost dedicated law students. First and foremost, in order to render law courses less work intensive, law students should capitalize on utilizing online tools. These online tools and software programs will preempt law students from needless squandering thousands of hours of time on manually completing tasks that can be automated. For instance, law students can use online tools, such as Citation Machine and Easy Bib, in order to expeditiously automatically generate APA formatted citations for their reference lists. Second, law students can also utilize other useful online tools, such as various online text spinners, so that they can paraphrase articles in an expeditious manner that they plan on referencing. While online text spinners may be able to instantly rewrite articles, the syntactic changes they make to the articles can be so egregious that they can potentially mandate significant time redacting the rewritten articles on the law student's end. Even though online text spinner can render the rewritten articles fraught with grammatical errors, they can allow someone to save substantial time on paraphrasing an article if they are adept in editing and typically struggle to paraphrase a scholarly article in their own words. Third, law students can utilize software programs, such as Natural Reader and Dragon Professional, in order to assist them with completing assignments in an expeditious manner. Text to speech software programs, such as Natural Reader or Balabolka, have ample voice playback options and can allow students to rapidly read through case studies, articles, and other reading material without having to manually read anything themselves. They can adjust the read speed and have the software programs read the reading material to them at any time, even when they are eating, driving, or traveling. Beyond being able to rapidly read through course reading material with the utilization of text to speech software programs, law students also reap the benefit of being able to better assimilate the reading material when it is being read to them since they do not have to concentrate on reading, but rather can fully focus on comprehending the reading material. Fourth, as per speech to text software programs, law students can utilize programs such as, Dragon Professional Individual or Braina Pro, in order to complete their assignments without having to manually type their essays. In other words, they can monologue their way through their law courses as the speech to text software programs.

The Best 168 Law Schools, 2013 Edition Simon and Schuster

One L, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness--with others and, even more, with oneself--that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of One Ls are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the One Ls survive? Will they excel? Will they make the Law Review, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the human beings who make them what they are. In the new afterword for this edition of *One L*, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.
