The Rise of Big Data Policing Bold Type Books

The police in America belong to the people -- not the other way around. Yet millions of Americans experience their cops as racist, brutal, and trigger-happy: an overly aggressive, militarized enemy of the people. For their part, today's officers feel they are under siege -- misunderstood, unfairly criticized, and scapegoated for society's ills. Is there a fix? Former Seattle Police Chief Norm Stamper believes there is. Policing is in crisis. The last decade has witnessed a vast increase in police aggression, misconduct, and militarization, along with a corresponding reduction in transparency and accountability. It is not just noticeable in African American and other minority communities -- where there have been a series of high-profile tragedies -- but in towns and cities across the country. Racism -- from raw, individualized versions to insidious systemic examples -- appears to be on the rise in our police departments. Overall, our police officers have grown more and more alienated from the people they've been hired to serve. In *To Protect and Serve*, Stamper delivers a revolutionary new model for American law enforcement: the community-based police department. It calls for fundamental changes in the federal government's role in local policing as well as citizen participation in all aspects of police operations: policymaking, program development, crime fighting and service delivery, entry-level and ongoing education and training, oversight of police conduct, and -- especially relevant to today's challenges -- joint community-police crisis management. Nothing will ever change until the system itself is radically restructured, and here Stamper shows us how.

Law Enforcement Agencies Macmillan Education AU

Sarah Seo shows that the rise of the car, the symbol of American personal freedom, led to ever more intrusive policing, with devastating consequences for racial equality in our criminal justice system. Criminal procedures designed to safeguard us on the road undermined the nation's commitment to equal protection before the law.

IACP National Symposium on Law Enforcement Officer Suicide and Mental Health Simon and Schuster

Traditionally, forensic investigation has not been fully utilized in the investigation of property crime. This ground-breaking book examines the experiences of patrol officers, command staff, detectives, and chiefs as they navigate the expectations of forensic evidence in criminal cases, specifically property crimes cases. *DNA and Property Crime Scene Investigation* looks at the current state of forensic technology and, using interviews with police officers, command staff, forensic technicians, and prosecutors, elucidates who is doing the work of forensic investigation. It explores how better training can decrease backlogs in forensic evidence processing and prevent mishandling of crucial evidence. Concluding with a police chief's perspective on the approach, *DNA and Property Crime Scene Investigation* provides insight into an emerging and important approach to property crime scene investigation. Key Features Provides practical information on implementing forensic investigation for property crimes Examines the current state of forensic technology and points to future trends Includes a police chief's perspective on the forensic approach to investigating property crimes Utilizes interviews with professionals in the field to demonstrate the benefits of the approach

"As a New Jersey State Trooper, Justin Hopson diligently exposed government and police corruption."--Dust jacket.

Verso Books

"Breaking Blue is the first book that shares real stories of cops accused of wrongdoing and

subsequently cleared. Charges may have been brought against them, Internal Affairs may have started an investigation, but in many cases, thanks to the officers body cam or dashcam videos, the true story came to light, with charges ultimately dismissed or initial convictions overturned. Sergeant Sean Sticks Larkin of the Tulsa Police Department Gang Unit and host of A&E show Live PD, presents real stories of officers falsely accused... including his own"--

When the Cops Come Knockin': An Illustrated Guide to Criminal Law Routledge

The Friendly Police Officer is a book to provide information about a police officers job. The book is also designed to be a teaching aid for police officers, teachers and parents on how to talk to children about being safe.

Annual Report on the Police Department of the City of Boston, by the City Marshal Penguin Winner, 2018 Law & Legal Studies PROSE Award The consequences of big data and algorithm-driven policing and its impact on law enforcement In a high-tech command center in downtown Los Angeles, a digital map lights up with 911 calls, television monitors track breaking news stories, surveillance cameras sweep the streets, and rows of networked computers link analysts and police officers to a wealth of law enforcement intelligence. This is just a glimpse into a future where software predicts future crimes, algorithms generate virtual "most-wanted" lists, and databanks collect personal and biometric information. The Rise of Big Data Policing introduces the cutting-edge technology that is changing how the police do their jobs and shows why it is more important than ever that citizens understand the far-reaching consequences of big data surveillance as a law enforcement tool. Andrew Guthrie Ferguson reveals how these new technologies --viewed as race-neutral and objective--have been eagerly adopted by police departments hoping to distance themselves from claims of racial bias and unconstitutional practices. After a series of high-profile police shootings and federal investigations into systemic police misconduct, and in an era of law enforcement budget cutbacks, data-driven policing has been billed as a way to "turn the page" on racial bias. But behind the data are real people, and difficult questions remain about racial discrimination and the potential to distort constitutional protections. In this first book on big data policing, Ferguson offers an examination of how new technologies will alter the who, where, when and how we police. These new technologies also offer data-driven methods to improve police accountability and to remedy the underlying socio-economic risk factors that encourage crime. The Rise of Big Data Policing is a must read for anyone concerned with how technology will revolutionize law enforcement and its potential threat to the security, privacy, and constitutional rights of citizens. Read an excerpt and interview with Andrew Guthrie Ferguson in *The Economist*.

DNA and Property Crime Scene Investigation The Book of Strange and Curious Legal Oddities Constituting fewer than 15% of the nation's police officers, women have found it especially difficult to rise through the ranks and achieve higher posts. Here, those few women who have made it to the top--about 1% of the chiefs and sheriffs in American policing--share their stories and describe the challenges they faced as they rose to their positions. Each of the chiefs comported for their offices with other candidates, almost always male. The sheriffs--virtually all elected officials-- came under even closer scrutiny. While few in number, these top cops illustrate the emergence of women as more than token leaders of American sheriff and police departments. They are unique groundbreakers who have managed to breach the brass ceiling. Here is the fascinating story of how individual women are setting a pace for other women in one of the most male-dominated public service fields in America, second only behind firefighting in its image as a place where few women have successfully negotiated careers to the top. Who are these women, and how did they earn the top spot? Are they nontraditional women, or women in nontraditional positions? Do they share common characteristics in terms of family backgrounds, race, ethnicity, age, or marital status? To what do they attribute their success in the face of overwhelming obstacles? How can their experiences with education, careers, service, and assignments help other women achieve similar success in this field or in others? Schulz answers these questions as she vividly recounts the paths to

the top for these determined and exceptional women.

You're probably breaking the law right now-and don't even know it. Did you know... ? Naples, Italy, enforces laws for what constitutes real pizza, and "pizza police" visit restaurants to crack down on unlawful pies? ? In West Virginia it is a crime to display or possess a red or black flag? ? It is illegal to sell stuffed articles depicting female breasts within a thousand feet of any county highway in California? ? Spherical fishbowls have been banned in Rome since 2004? There are hundreds of bizarre laws that we could be breaking at any moment. What exactly are we doing that we shouldn't be doing, and what happens if we get caught? In this engaging and insightful collection, Nathan Belofsky takes us on a journey of eclectic, unexpected, and bizarre laws from around the world. Written by a practicing lawyer with an eye for his profession's most unusual quirks, *The Book of Strange and Curious Legal Oddities* offers a delightful look at the legal system's peculiarities through the ages. From laws that crack down on how we eat, look, and have sex, to real legal battles involving litigious chimpanzees, you'll start wondering whether you're really the law-abiding citizen you claim to be.

[Breaking Rank](#) Rowman & Littlefield

What is it like to be a cop in America today in the aftermath of the Rodney King verdict? In a risky environment when dangerous weapons are used and snap decisions are required? How should police officers be treated and their grievances be resolved? A long-time expert in the settlement of disputes writes in a popular vein for those engaged in or studying police administration, labor arbitration, or industrial relations. He uses real cases to demonstrate common disputes and ways to settle them. What do labor awards indicate about the working life of police officers? How could disputes have been avoided? Should higher standards be imposed upon police officers than on other workers? Should a police officer be disciplined for breaking the law? Should there be a more flexible standard when an officer is off duty? How should a cop who misbehaves be punished? This text deals with these questions, defines the role of the arbitrator, and discusses the ways in which awards are made and grievances settled. Coulson shows how complicated the bargaining process can be and the types of problems that can arise between police unions and local governments. He discusses the autocratic nature of police departments and problems confronting them. He describes cases involving sex and race discrimination, drugs and drinking, off-duty offenses, and policy violations. An appendix lists rules set out by the American Arbitration Association as a model for grievance arbitration procedures in the United States. A short bibliography points to further readings for students and police officers.

A Times, Express and Daily Mail Book of the Year 2022 The scandalous new novel from the godfather of the legal thriller. Lucia Gomez is a female police chief in a man's world and she's walked a fine line to succeed at the top. Now a trio of police officers in Kindle County have accused her of soliciting sex for promotions and she's in deep. Rik Dudek is an attorney and old friend of Lucia's. He's the only one she can trust, but he's never had a headline criminal case. This ugly smear campaign is already breaking the internet and will be his biggest challenge yet. Clarice 'Pinky' Granum is a fearless PI who plays by her own rules. Her 4-D imagination is her biggest asset when it comes to digging up dirt for Rik but not all locks are best picked. It's cops against cops in this hive of lies. And it will take more than honeyed words from the defence to change the punchline and save the Chief from her own cell.

[Policing and the Media](#) Bold Type Books

This is the first book to challenge the broken-windows theory of crime, which argues that permitting minor misdemeanors, such as loitering and vagrancy, to go unpunished only encourages more serious crime. The theory has revolutionized policing in the United States and abroad, with its emphasis on policies that crack down on disorderly conduct and aggressively enforce misdemeanor laws. The problem, argues Bernard Harcourt, is that although the broken-windows theory has been around for nearly thirty years, it has never been empirically verified. Indeed, existing data suggest that it is false. Conceptually, it rests on unexamined categories of law abiders and disorderly people and of order and disorder, which have no intrinsic reality, independent of the techniques of punishment that we implement in our society. How did the new order-maintenance approach to criminal justice--a theory without solid empirical support, a theory that is conceptually flawed and results in aggressive detentions of tens of thousands of our fellow citizens--come to be one of the leading criminal justice theories embraced by progressive reformers, policymakers, and academics

For freshman/sophomore courses in criminal law. This text presents a general approach to substantive criminal law focusing on legal principles in plain English without the use of legalese and footnotes. This timely text includes thought-provoking questions that reinforce student comprehension and increase student interest.

[Police Women](#) WestBow Press

If police are the problem, what's the solution? Tens of millions of people poured onto the streets for Black Lives Matter, bringing with them a wholly new idea of public safety, common security, and the delivery of justice, communicating that vision in the fiery vernacular of riot, rebellion, and protest. A World Without Police transcribes these new ideas—written in slogans and chants, over occupied bridges and hastily assembled barricades—into a compelling, must-read manifesto for police abolition. Compellingly argued and lyrically charged, *A World Without Police* offers concrete strategies for confronting and breaking police power, as a first step toward building community alternatives that make the police obsolete. Surveying the post-protest landscape in Minneapolis, Philadelphia, Chicago, and Oakland, as well as the people who have experimented with policing alternatives at a mass scale in Latin America, Maher details the institutions we can count on to deliver security without the disorganizing interventions of cops: neighborhood response networks, community-based restorative justice practices, democratically organized self-defense projects, and well-resourced social services. *A World Without Police* argues that abolition is not a distant dream or an unreachable horizon but an attainable reality. In communities around the world, we are beginning to glimpse a real, lasting justice in which we keep us safe.
