Speaking in public can be difficult. Most people are either afraid of embarrassment or afraid to make a bad impression. To overcome these fears and become an effective communicator, it's vital to acquire public speaking skills. When we think about public speaking, we usually think of formal occasions like corporate updates and conferences. But public speaking actually refers to every time you talk to a group of people, whether they're friends, clients, colleagues, or customers. Speaking in public is the most basic, direct, and powerful way you can communicate. Learning how to become an effective public speaker can help you succeed in your career. Public speaking skills benefit both the speaker and the listener. Audiences learn from you and are entertained when you effectively communicate your ideas. And you, as the speaker, benefit by leaving a lasting impression of competence and confidence in your chosen field. This course can help you to prepare effective public speeches. It sets out the preparations you should make before getting up to talk to a group - including choosing your topic and researching it properly as well as writing and practicing your speech. Making these preparations can help you become an effective public speaker. This course begins by detailing how to select an effective topic for your speech - one that you feel comfortable talking about, fulfills your objectives, and resonates with your audience. Next, it outlines how to effectively research your topic and prepare for making your speech. Thorough research is the foundation of an effective speech. Also, making

preparations minimizes the possibility of mishaps during your speech. Finally, this course sets out how to write and practice your speech. Structuring your speech correctly and practicing it beforehand contribute toward a successful public speaking experience. Can you think of a time, with your family or friends, when you were telling a story and every eye was on you? When you were relaxed and the words came easily? Don't you wish it was that easy every time you had a formal public speaking engagement? Most people are capable of communicating effectively in an informal situation. But when a formal speech is required, the same people often feel overwhelmed. For most people, public speaking doesn't come naturally. It takes practice and preparation to get your delivery just perfect. In this course you'll learn techniques to increase your confidence and your public speaking skills. You'll begin by learning the basics of good speech delivery - how to start strong by encouraging your confidence, making a good first impression, and building rapport with your audience. You'll also learn how to hold the attention of the audience and finish strong. You'll learn how to recognize some of the common challenges of public speaking, such as an audience losing focus, being uncooperative, asking difficult questions, or heckling. And you'll learn techniques to deal with each challenge effectively. This course will also teach you techniques to overcome your public speaking anxiety. You'll learn how to adequately prepare leading up to your speech, and how important it is to relax before you speak. You'll learn how to get acquainted with your location and listeners and how to focus on your key points when you get nervous. Finally, you'll learn how practicing public speaking will lead to greater confidence. The last

section of this course will give you a chance to practice all you've learned and simulate delivering a speech with confidence. You'll practice conquering your anxiety, handling difficult questions, dealing with hecklers, and regaining the focus of an audience that's fading.

The efficiency of a book is like that of a man, in one important respect: its attitude toward its subject is the first source of its power. A book may be full of good ideas well expressed, but if its writer views his subject from the wrong angle even his excellent advice may prove to be ineffective. This book stands or falls by its authors' attitude toward its subject. If the best way to teach oneself or others to speak effectively in public is to fill the mind with rules, and to set up fixed standards for the interpretation of thought, the utterance of language, the making of gestures, and all the rest, then this book will be limited in value to such stray ideas throughout its pages as may prove helpful to the reader—as an effort to enforce a group of principles it must be reckoned a failure, because it is then untrue.

You can become a professional public speaker as a lucrative sideline to your current business or you can make professional speaking the entire focus of your career. It's up to you! Professional speaking is a flexible and lucrative enterprise. The best public speakers earn all or most of their money from public speaking, and they make very good livings indeed. Fees for public speaking can range from the low hundreds, for those just starting out, all the way up to six figures, for those who have impressive credentials and experience. What are some types of

public speaking you may want to practice? Many speakers enjoy giving workshops, seminars, or keynote speeches. A speech will usually run a half-hour to an hour, depending on the time of day. Lunch speeches, for instance, will be shorter than a keynote speech at a banquet. You may be booked as the highlight or draw of a conference, or be asked to speak to a lunchtime networking meeting. Workshops and seminars are generally lengthier than speeches. In workshops, participants often get hands-on experience in your area of expertise. Like workshops, seminars may run a day or longer, but they won't necessarily include a hands-on component. Either workshops or seminars may be presented as a part of a larger conference. Professional speaking can also help you build your business. You may choose to add speaking to your repertoire as a marketing boost. There is no better way to become known. Many people who promote their businesses through public speaking also sell additional products at the "back of the room." These can include books, CD sets, coaching sessions, and so forth—and all of these can lead to more public speaking engagements, too! Success as a public speaker adds to self-confidence and self-esteem. Knowing that you can command the rapt attention of an audience of hundreds, or even thousands, gives you unshakeable confidence in nearly every situation. The poise that you gain through mastering public speaking will help you in every aspect of business. The best professional speakers love what they do and it shows. There's nothing like the adrenaline rush of having a roomful of people applauding you....or maybe even on their feet, giving you a standing ovation! This feeling can even become mildly addictive. But don't worry, if the thought of standing before even a small

group makes your knees start shaking, there are techniques you can master to help you become comfortable and skilled. But don't worry, because this is one addiction that is healthy. After all, as a public speaker you'll be helping people through sharing the information that you, as an expert, have accumulated. Because of this, many people feel called to the profession of public speaker. To these speakers, sharing their special knowledge is as important, if not more important, than the healthy salaries they command for their speaking skills. So, if you've decided that developing a lucrative public speaking profession is for you, let's get started in learning more about it. First we'll look at some of the pros and cons of a public speaking career. Anthony Ekanem is a Management scholar, researcher, writer and author. He is also a Chartered Insurer with many years of experience.
