Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2003: Agricultural programs Springer

This book highlights the electronic governance in a smart city through case studies of cities located in many countries. "E-Government" refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access

to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-Governance Domains Studies • E-Governance Tools and Issues

Federal Register American Bar Association

This is the seventh book in a series that concentrates on basic information for the environment law practitioner. In this instance, the focus is on the policies, regulation and procedures of the Federal Energy Regulatory Commission.

The Energy and Resources Institute (TERI)

In light of the rising cost of healthcare and the overall challenges associated with delivering quality care to patients across regions, scientists and pharmacists are exploring new initiatives in drug discovery and design. One such initiative is the adoption of information technology and software applications to improve healthcare and pharmaceutical processes. Software Innovations in Clinical Drug Development and Safety is a comprehensive resource analyzing the integration of software engineering for the purpose of drug discovery, clinical trials, genomics, and drug safety testing. Taking a multi-faceted approach to the application of computational methods to pharmaceutical science, this publication is ideal for healthcare professionals, pharmacists, computer scientists, researchers, and students seeking the latest information on the architecture and design of software in clinical settings, the impact of clinical technologies on business models, and the safety and privacy of patients and patient data. This timely resource features a well-rounded discussion on topics pertaining to the integration of computational methods in pharmaceutical science and practice including, the impact of software integration on business models, patient safety concerns, software architecture and design, and data security.

Energy and Water Development Appropriations for 1986: 7 Department of Energy

The book presents a collection of peer-reviewed articles from the 11th KES International Conference on Intelligent Decision Technologies (KES-IDT-19), held Malta on 17-19 June 2019. The conference provided opportunities for the presentation of new research results and discussion about them. It was also an opportunity to generation of new ideas in the field of intelligent decision making. The range of topics explored is wide, and covers methods of classification, prediction, data analysis, decision support, modelling and many more in such areas as finance, cybersecurity, economy, health, management and transportation. The topics cover also problems of data science, signal processing and knowledge engineering.

Encyclopedia of Information Systems and Services

This publication focuses on the impact of tariff orders

(distribution) issued by nine SERCs (state electricity regulatory commissions) in India during 2003/04, 2004/05, and 2005/06. The states covered are Andhra Pradesh, Assam, Delhi, Jharkhand, Kerala, Madhya Pradesh, Maharashtra, Uttarakhand, and West Bengal. The analysis has been undertaken based on data and information available up to January 2007. The book assesses whether the orders have resulted in reducing regulatory uncertainty and information asymmetry, and led to better performance of the distribution utilities. Different indicators have been used to assess the impact on consumption and access, efficiency, financial performance, competition, and consumer-related issues in the power sector of these states. In addition, various parameters have been studied to assess whether the regulatory systems follow the principles of good regulation in these nine states. br>The commercial loss (without subsidy) incurred by state power utilities increased from Rs 197 220 million in 2003/04 to Rs 221 290 million in 2004/05. In view of the huge losses being incurred by the utilities, the tariff determination function forms a central part of the reform process. A comprehensive survey of tariff orders issued by these SERCs for the distribution licensees has been undertaken to evaluate the effectiveness of regulatory orders in the electricity sector. It assesses whether the orders have resulted in reducing regulatory uncertainty and information asymmetry and better performance of the distribution utilities. However, tariff orders are only one index of effectiveness of the regulatory commissions. It is recognized that there are many other important functions of the SERCs besides tariff-setting, and some of them have also been covered in this study. In addition, other documents available in the public domain, including the Power Sector Rating Report, prepared by the Ministry of Power, Annual Report on the Regulation in practice: impact of tariff orders on the Indian electricity sector Working of State Electricity Boards and Electricity Departments, 1 and the Report on Restructuring of APDRP (Accelerated Power Development and Reform Programme),² were also studied.
