Description of Energy Tax Credit Bills (S. 750 and S. 1288) IBFD Analysis, prepared by Joint Committee on Internal Revenue Taxation staff, of approach taken in H.R. 6860 to provide tax incentives for energy conservation and efficient utilization by railroads, industry, and homeowners. Compares House bill with present law, and with alternative proposals.

Facing America's trash : what next for municipal solid waste?.

DIANE Publishing

Examines several policy options that would be more practical and effective when applied at the federal rather than the state or local level. The options would reduce the amount and toxicity of household waste through the use of economic incentives that would affect households, manufacturers, or collectors of waste and recyclable materials. 11 charts and tables.

Environmentally Friendly Business GRIN Verlag

Investment Credit CRC Press

This book highlights the opportunity to save taxes and the environment. It provides a thorough overview of both environmental taxes and tax incentives related to environmentally friendly investments and activities. It starts with a general introduction into the principles of environmental taxation and then, by looking at a set of 13 countries, the book provides an analysis of tax measures in the field of direct and indirect taxation with regard to the environment. It concludes with a comparative overview of the tax measures in the countries discussed.

Credit Going Green. Environmentally Friendly Business

This definitive Handbook, authored by the publishing division of the leading and the largest association in the field of waste management, provides information on virtually every aspect of recycling. The chapters, written by leading international authorities, cover such topics as collection of recyclables, recycling costs, safety in recycling facilities, available technology for collection and processing of waste products, and profitability of waste products. Introductory material in the form of "waste profiles" is included at the beginning of the Handbook, providing an excellent general reference on all of the various recyclables, from newspapers to batteries. The Handbook also covers legislative issues related to recycling, including legislation in Germany, France, Britain, and Canada, and how these overseas regulations affect recycling in the United States.

Environmental Science 6e (paper) DIANE Publishing

Seminar paper from the year 2010 in the subject Business economics - Business Ethics, Corporate Ethics, grade: 1,3, , language: English, abstract: This report includes broad topics such as how businesses are going greener and why they have chosen to become more environmentally friendly. Also including research about benefits, rewards and incentives that motivate companies to go green and which industry is putting in the most initiative to become eco-friendly and as conclusion we made some recommendations for the future. In our report, we try to explain that the challenge of a sustainable society is to achieve a competitive and eco-efficient economy, combining increased productivity with less consumption of natural resources. It is all about preventing the over-exploitation of environmental resources, the underutilization of labour resources, and integrating the economy with environmental sustainability criteria. Furthermore our report is going to analyze businesses' green initiatives and the reasoning for them doing so. The key question we try to answer is, how big of an impact are these initiatives actually having on the environment? To answer this question we analyzed articles and graphs related to environmental sustainability, governmental strategies and the impact of green businesses in order to suggest strategies to our businesses, such as tax incentives, trade agreements or export

subventions on environmental friendly products. It was fundamental to make some secondary research in order to answer our key questions. The well-being of our environment is a big issue today. We are on the verge of a climate change and the consequences if we do nothing to try to stop it may be severe. Not only is this an interesting topic but it needs to be more publicized. A lot of businesses are doing their part trying to help the world and they are using many different strategies to do so. This articles show us why and exactly how organizations are going about becoming eco-friendly and if their efforts are actually helping.

Analysis of Energy Supply, Conservation, and Conversion, House Bill (H.R. 6860) and Possible Alternatives: Business Use Tax, Tax Treatment of Railroads, Home Insulation, Etc McGraw Hill Professional

Completely updated, the seventh edition of 'Environmental Science' enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we, as a global community, can create a sustainable future.

Waste Age and Recycling Times DIANE Publishing

An indispensable resource for professionals who work with multiple state tax jurisdictions, this reference offers return preparation guidance for use by taxpayers subject to corporate income or income-based taxes in more than one state.

Basis of Assets Notion Press

A study of how recycling collection programs operate and generate a supply of discarded material for scrap-based manufacturers. Will be of interest to people in many sectors: recycling coordinators can identify potential markets for their recovered materials; manufacturers will see improved feedstock quality from better educated suppliers; entrepreneurs can gain insight into successful operations; and economic developers can weigh the benefits a community might reap from such facilities. The 24 case studies contained here represent a sample of state-of-the-art scrap-based manufacturers. Tables.
