The U.S. Department of Homeland
Security is responsible for controlling the
flow of goods and people across the U.S.
border, a difficult task that raises

challenging resource management
questions about how best to minimize
illicit flows across the border while
facilitating legitimate ones. Commonly
reported border control measures, such
as numbers of illegal migrants
apprehended or miles of border under
effective control, bear only an indirect
and uncertain relationship to the border
control mission, making them unreliable
management tools. Fundamental to the

question of border control effectiveness is the proportion of illicit border crossings that are prevented through either deterrence or apprehension. Estimating these proportions requires knowing the total flow of illicit goods or border crossings, but compelling methods for producing such estimates do not yet exist. This short paper describes four innovative approaches to estimating the total flow of illicit border crossings between ports of entry. Each is sufficiently promising to warrant further attention for purposes of supporting reliable, valid, and timely measures of illicit cross-border flow. Successfully implementing each of these approaches will require methodological development and analysis to identify barriers or constraints to using the approach, the

cost of data collection, and the amount of error that can be expected in the resulting estimates.

How did Canadian border officers come to think of themselves as a "police of the border"? This book tells the story of the

shift to law enforcement in Canadian border control. From the 1990s onward, it traces the transformation of a customs organization into a border-policing agency. *Border Frictions* investigates how considerable political efforts and state resources have made bordering a matter of security and trade facilitation best managed with surveillance technologies. Based on interviews with border officers, ethnographic work carried out in the vicinity of land border ports of entry and policy analysis, this book illuminates features seldom reviewed by critical border scholars. These include the fraught circulation of data, the role of unions in shaping the border policy agenda, the significance of professional socialization in the making of distinct generations of security

workers and evidence of the masculinization of bordering. In a time when surveillance technologies track the mobilities of goods and people and push their control beyond and inside geopolitical borderlines, Côté-Boucher unpacks how we came to accept the idea that it is vital to deploy coercive bordering tactics at the land border. Written in a clear and engaging style, this book will appeal to students and scholars in criminology, sociology, social theory, politics, and geography and appeal to those interested in learning about the everyday reality of policing the border.

About 362 million travelers (citizens and non-citizens) entered the United States in FY2013, including about 102 million air passengers and crew, 18 million sea passengers and crew, and 242 million incoming land travelers. At the same time about 205,000 aliens were denied admission at ports of entry (POEs); and about 24,000 persons were arrested at POEs on criminal warrants. Within the Department of Homeland Security (DHS), U.S. Customs and Border Protection's (CBP) Office of Field Operations (OFO) is responsible for conducting immigration inspections at America's 329 POEs. CBP's

primary immigration enforcement mission at ports of entry is to confirm that travelers are eligible to enter the United States and to exclude inadmissible aliens. Yet strict enforcement is in tension with a second core mission: to facilitate the flow of lawful travelers, who are the vast majority of persons seeking admission. A fundamental question for Congress and DHS is how to balance these competing concerns. The inspections process and entry-exit system may raise a number of questions for Congress, including in the context of the ongoing debate about immigration reform. What is the scope of illegal migration through ports of entry, and how can Congress and DHS minimize illegal flows without unduly slowing legal travel? Congress may

consider steps to enhance POE personnel and infrastructure and to expand trusted travel programs. Congress also may continue to seek the completion of the entry-exit system, a program that has been the subject of ongoing legislative activity since 1996, as summarized in the appendix to this report.

This report concludes by raising additional questions about future investments at the border, how to weigh such investments against other enforcement strategies, and the relationship between border enforcement and the broader debate about U.S. immigration policy.
