Do you know that the trucking industry is safe from currency

fluctuations because most of the revenue is generated domestically? The trucking industry is certainly a good predictor of the overall economy. Customers begin to ship more goods during the early stages of an economic upswing in anticipation of better business conditions. A drop in trucking demand, on the other hand, could signal the start of a recession. Customers can easily find a different shipper, so providing excellent service is a critical factor. The trucking industry is divided into two categories: truckload and less-than-truckload (LTL). Truckload carriers load a trailer with large amounts of cargo from a single customer, usually for delivery to a single location. LTL drivers load a trailer with small amounts of cargo from various customers, all of whom require different delivery destinations. Initiating an owner-operator trucking company is the right choice for people looking to establish a family business. It is because: - You just need to get a commercial driver's license (CDL) and take a quick course to learn the basics - You can work in this industry for as long as you want - Truckers have the unique advantage of operating independently - Truckers have complete control over their work schedule - Owner-operators are free to choose their clients and can take decisions on their own - Owner-operators generate more revenue than any other business This book covers all topics and terms related to starting a trucking business, such as: - History of Trucks and Trucking Business - Trucking Business Types and how to start it - Marketing Strategy for Owner Operator Trucking Business - Managing Human Resource and Building Fleet for Trucking Business - The Most Common Reasons Why Trucking Business Fails - The Pros and Cons of a Trucking Business A freight broker is a middleman that connects two businesses by locating, evaluating, and commissioning a motor carrier that transports products for a shipper. The freight broker makes certain that the products reach safely at their ultimate destination. They profit by taking the difference between the amount paid by the shipper and the amount accepted by the motor carrier as payment. A freight broker facilitates the shipment of products by acting as a middleman between shippers and carriers. You may become a freight broker in one of two ways: an independent broker or an employee of a brokerage company. An independent freight broker deals with their contracts with shipping companies and is paid directly by them. In this book you will get to know about: - Responsibilities of freight broker - Licensing and business registration - Effective Business plan - How to become a successful freight broker and grow your business - How to find carriers and shippers - How to use social media to grow your freight broking business You will learn about the history of trucking, the evolution of the trucking industry, and regulations, and the impact of the same on the trucking business. [Big Rig Business Startup How to Start, Run & Grow a Successful Trucking Company](#) After losing my corporate job in 2008, I went through the toughest time of my life. At the time my wife pregnant with our third child, and my monthly unemployment check wasn't enough to cover our house and two car notes. In desperation, I decided to go to a local trucking school and get my CDL. I found my first driving job a week after I got out of school. I still remember my first paycheck was just \$55 shy of what I was making at my corporate desk job. I was hysteric, I was happy, I knew this was my new found life and freedom, and no one was going to take it away from me. Long story short, after two years of working for other companies, I decided to start my own trucking company, and I started out as an owner-operator. In 2013, I decided it was time for me to grow and time for me to get off the road and spend some time with my kids. This was when I entered the second phase of my business life. I started to buy one tractor every three months as I was hiring great drivers that are professional, family oriented and serious about making money. By 2016 I had 12 trucks on the road, and this is also the year when my net earning passed \$350,000 mark. To me, the 350K mark was always a benchmark, why? Because I knew that was the salary of the CEO of the company, I used to work for. Last year, I received a call from a business broker, who asked me for a 10-minute meeting. He had brought an offer from a big trucking company, to buy my company. But I didn't even remotely think about selling my company. Instead, I was talking to the bank and was in the process of finalizing a loan for four new tractors with trailers. Once again, long story short, after I refused their initial offer, they came back with an offer that no reasonable man can refuse, and I consider myself a very reasonable man. The income potential is truly amazing and yes, if you can hire the right people, you will not only see significant growth, high net income but the satisfaction that you don't get from many other jobs and businesses. What I shared in this book, are the steps I went through myself, I wrote from my own experience and shared a step by step process that is easy and simple to follow, and best of all you can get started with very little funding.
