Gnu and Shrew match  
wits while trying to  
reach a cave filled with  
diamonds in this STEM-  
filled twist on "The Ant  
and the Grasshopper."  
When Gnu says that

there's a cave filled with diamonds across the river, Shrew is intrigued. But Gnu seems to be all talk, fantasizing about riches yet dismissing all of Shrew's suggestions. As Gnu dreams his days away, tossing out one big idea after another, Shrew spends his nights trying to make those dreams a reality. Will Gnu's big ideas ever be able to mesh with Shrew's hard work to make something remarkable happen? Author Danny Schnitzlein uses deadpan storytelling to put an entertaining spin on "The Ant and the Grasshopper" that values the roles of both dreamers and doers. Anca Sandu's illustrations, rendered in pencil and colored digitally, add to the

humor and whimsy. "A refreshing demonstration of different approaches and a friendship that transcends those contrasts." —Booklist Best STEM Books —ASEE / ITEEA / NSTA / SEPA / CBC Also by Danny Schnitzlein: *The Monster Who Ate My Peas* *The Monster Who Did My Math Trick* or *Treat on Monster Street*

After two New York Times bestsellers, Nick Offerman—woodworker, actor, comedian, and co-host of NBC's crafting competition series *Making It*—returns with the subject for which he's known best—his incredible real-life woodshop. Nestled among the glitz and glitter of Tinseltown is

a testament to American elbow grease and an honest-to-god hard day's work: Offerman Woodshop. Captained by hirsute woodworker, actor, comedian, and writer Nick Offerman, the shop produces not only fine handcrafted furniture, but also fun stuff—kazoos, baseball bats, ukuleles, mustache combs, even cedar-strip canoes. Now Nick and his ragtag crew of champions want to share their experience of working at the Woodshop, tell you all about their passion for the discipline of woodworking, and teach you how to make a handful of their most popular projects along the way. This book takes readers behind the scenes of the woodshop, both

inspiring and teaching them to make their own projects and besotting them with the infectious spirit behind the shop and its complement of dusty wood-elves. In these pages you will find a variety of projects for every skill level, with personal, easy-to-follow instructions by the OWS woodworkers themselves; and, what's more, this tutelage is augmented by mouth-watering color photos (Nick calls it "wood porn"). You will also find writings by Nick, offering recipes for both comestibles and mirth, humorous essays, odes to his own woodworking heroes, insights into the ethos of woodworking in modern America, and other assorted tomfoolery. Whether

you've been working in your own shop for years, or if holding this stack of compressed wood pulp is as close as you've ever come to milling lumber, or even if you just love Nick Offerman's brand of bucolic yet worldly wisdom, you'll find *Good Clean Fun* full of useful, illuminating, and entertaining information.

E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can

access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a

negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the "e" prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. The second volume gives a place to the

country cases of Norway, Oman, Palestine, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Sweden, Syria, Tajikistan, Tunisia, Turkey, Ukraine, United Arab Emirates and Uzbekistan. So, the book consists of more than 70 authors from 39 different countries and from 42 universities and 14 institutions with company for all 42 chapters. (Individual chapters contain references.) ["Cases on Challenges Facing E-Learning and National Development: Institutional Studies and Practices. Volume II" was co-edited by Leena Vainio, Mehmet Can Sahin, Gulsun Kurubacak, Petri T. Lounaskorpi, S. Raja Rao, and Carlos

Machado. For Volume I, see ED508217.].

*The New Allergy Solution* Usborne Publishing Ltd

It would seem logical that once a home is vacuumed, swept, and dusted, someone with a dust allergy would feel better. It's actually the opposite! Cleaning disturbs dust particles and it can make allergy sufferers cough, wheeze, and itch. So what do you do when we all live with dust around us? This book guides readers through why people have dust allergies and how to deal with these allergies, as well as other allergies these sufferers may have. Full-color photographs give up-close views of dust to complement the age-appropriate text.

"My favorite read this year. A hilarious space adventure. Hard book to put down." —Hugh Howey, author of *Wool*  
A space-faring ne'er-do-well with more bravado than brains, Rex Nihilo plies the known universe in a tireless quest for his own personal gain. But when he fleeces a wealthy weapons dealer in a high-stakes poker game, he ends up winning a worthless planet...and owing an outstanding debt more vast than space itself! The only way for Rex to escape a lifetime of torture on the prison world Gulagatraz is to score a big payday by pulling off his biggest scam. But getting mixed up in the struggle between the tyrannical Malarchian

Empire and the plucky rebels of the Revolting Front—and trying to double-cross them both—may be his biggest mistake.

Luckily for Rex, his frustrated but faithful robot sidekick has the cyber-smarts to deal with buxom bounty hunters, pudgy princesses, overbearing overlords, and interstellar evangelists...while still keeping Rex's martini glass filled.

This is a tender book of poetry, written by a young mother of two, as she was dying of cancer. Ms. Cheyenne wrote most of these poems during the last three years of her battle. The reader will never forget the haunting rhythms transcending these pages. A divorced single mother, raising two sons, fights for her life against cancer. In the three years before her death, she keeps going by writing her deepest feelings in free verse poetry. This is *Tests Of Being*. Here Nur Cheyenne opens her heart on her relationships with family, friends, physicians, death and God.

Macmillan  
Computer-Mediated Communication Systems: Status and Evaluation synthesizes current knowledge about computerized conferencing systems, electronic mail, and office information-communication systems. It should be of interest both to students and researchers studying this new form of electronic communication and to organizations that are planning the installation of electronic mail or other computer-mediated communication systems and that need to be aware of the information gleaned from the studies presented here. The book is organized into four main sections, focusing on the

following issues: (1) What are the important considerations in designing software or choosing a system from the many available options and capabilities? (2) What factors determine whether such systems are likely to be accepted or rejected? (3) What are the likely impacts of such systems upon the individuals, groups, and organizations which use them? It is not the economic costs and benefits, but the social problems and "payoffs" in the form of enhanced performance and organizational efficiency that should be the main considerations in deciding whether or not to use a computer-mediated communication

system. (4) Given the conditional nature of many of the possible impacts, no system should be implemented without formal evaluation and feedback from users to guide the implementation. The major kinds of evaluational strategies that have been successfully employed are described in this book.
