to the relief of the ATM business owner, revenue generated from the automated teller machines are automatically deposited in the bank whenever customers utilize the automated teller machines. Automated teller machines generate profits whenever customers utilize the automated teller machines since the customers pay lofty surcharge fees in order to covert their credit into cash, such as by debiting their credit card for \$23 to receive \$20 worth of cash. Customers do not mind losing purchasing from converting their credit into cash. Surcharge fees to covert credit into cash by utilizing an ATM machine can range from \$1-\$8 and abate the customer's purchasing power. Becoming an ATM business owner will require you to have \$2,000-\$10,000 in start up costs to able to launch an ATM business. Unlike an ATM business owner, a business owner of a vending machine business would not only need to refill his machines with products that have short shelf lives every time they are deplete, but would also need to haul cash deposits to the bank since the revenues earned are not automatically deposited in the bank whenever customers utilize the machines. Owning a lucrative ATM business is far less cumbersome, far less time consuming, and far more of a passively managed business than operating a vending machine business. Becoming an ATM machine business owner requires low start-up costs relative to other types of business, such as launching a restaurant or retail store. In order to become an ATM business owner, the prospective ATM business owner will simply need to establish a company for his ATM business, secure profitable ATM locations at businesses with high volumes of foot traffic, and will subsequently need to be able to install ATMs at the business locations he has negotiated to secure.
