This range of Maths and English activity books really helps to boost your child's progress at every stage of their learning.

The series aims to build up important skills

through activity-packed fun. Each activity is designed to give your child a real sense of achievement. Help boost confidence and develop good learning habits for life. Motivate children to learn at home using colourful activities that make learning fun. Include helpful tips and answers so that you easily support your child's learning at home."

Excel Applications for Accounting Principles
LucasBooks for Young Readers

Using standardized testing formats, math skills are kept sharp with focused practice in computation, word problems, graphing, measurement and numbers. Includes scope and sequence charts and answer keys.

Domino Addition

Independently Published
This bold and colorful counting book shows young readers that math and addition can be fun and easy (when you use dominos). Black and white dominos make up each number on various bold backgrounds and each page gives the various properties of numbers zero to twelve. With a simple but imaginative approach, Lynette Long, has created a perfect classroom resource that teaches kids how to add up each dot on an individual domino as well

as how to spot different number combinations. This bright and fun-filled introduction to basic addition will appeal to both eager and reluctant math students.

The Numbers Activity Book is packed full of fun and educational numbers-themed activities that will keep young children entertained for hours. Numbers aren't always the first thing that spring to mind when one thinks of fun activity books. However, that's all about to change! There are all

sorts of absorbing things to do, including coloring in, dot to dots, spot the difference, mazes and lots of other engaging puzzles. The Numbers Activity Book features beautiful, bright illustrations that will draw children in and keep them busy. And while children are enjoying the activities, they will be practising a wide range of skills, including observational, conversational and motor skills. - Over 100 stickers to use in the book or elsewhere - Over 70 activities and games -

Charmingly illustrated throughout - Suitable for ages 4-8
Numbers Workbook Ages 3-5: Prepare for Preschool with Easy Home Learning (Collins Easy Learning Preschool) John Wiley & Sons
 We believe kids get better at math with practice, resulting in confidence and a positive attitude towards maths that is required to excel in school. This workbook provides kids with additional math practice that reinforces and complements what is

taught at school. There are no pictures or word problems and focus on mastery of basic addition and subtraction. This workbook combines traditional addition and subtraction math problems, with number bond problems. Many elementary schools teach math using Number Bonds, and we want kids to have practice on both traditional math questions and number bonds to build fluency and speed in basic arithmetic.

encourages hands-on playful and child-focused experiences that guide children towards a sound understanding of the basic math concepts. Scroll to the top of the page and click the "BUY NOW" button. ✓ [How to Sparkle at Addition and Subtraction to 20](#) Collins Let's Make a 10!Naughty Monkey Number Bonds, Making the Number 10 is a coloring storybook with activities and worksheets designed to aid preschool through first-grade children when learning

number bonds. Why the number 10? We live in a base ten world. If your children know the number bonds that make 10, they will more than likely have an easier time adding and subtracting as the numbers get larger. "Number bonds" or "fact families" are key to many math curricula and mental math strategies. My 6-year old (who is very mathematically oriented) has taken to number bonds like a fish to water, without much drilling. But every child is different, so this is what I came up

with my very visual 4-year old.

* number bonds 1st grade

*Teaching children the basics of addition and subtraction can be done very effectively through the use of number bonds.

These number bond worksheets are part of the Singapore math technique which is very popular with educators right now. This technique of teaching the bonds between numbers helps kids recognize that parts make up a whole.

That basic concept sets kids up to gain an understanding of addition and subtraction at the same time. We have found these worksheets to be very effective in teaching elementary math and these worksheets are geared specifically towards 1st graders.

This range of Maths and English activity books really helps to boost your child's progress at every stage of their learning. The series aims to build up important skills

through activity-packed fun. Each activity is designed to give your child a real sense of achievement. Help boost confidence and develop good learning habits for life. Motivate children to learn at home using colourful activities that make learning fun. Include helpful tips and answers so that you easily support your child's learning at home."

Driven by Data Brighter Child

Talking math with your child is simple and even entertaining with this

better approach to shapes! Written by a celebrated math educator, this innovative inquiry encourages critical thinking and sparks memorable mathematical conversations. Children and their parents answer the same question about each set of four shapes: "Which one doesn't belong?" There's no one right answer--the important thing is to have a reason why. Kids might describe the shapes as squished, smooshed, dented, or even goofy. But when they justify their

thinking, they're talking math! Winner of the Mathical Book Prize for books that inspire children to see math all around them. "This is one shape book that will both challenge readers' thinking and encourage them to think outside the box."--Kirkus Reviews, STARRED review

Naughty Monkey Number Bonds Co-Ordination Group Publications

Children explore the concept of shapes, including squares, circles, rectangles, and diamonds.
