From new hire to senior

staff member to solo practitioner, **BRANDING STRATEGIES FOR THE SALON AND SPA** is an interactive online course that teaches the concepts necessary to develop a unique brand and to stand out from the competition. Broken into six sections - Identity and Vision, People and Culture, Products and Services, Marketing Mix, Leadership and Management, and Brand Equity - each one contains an in-depth discussion of the topic and specific examples from the salon and spa industry. Whether

just beginning the start-up phase of a new operation or after years of running a business, this course will show the salon and spa professional how to go about creating a solid brand and company identity from the ground up.

Felder's Comprehensive, 2005 Edition Martinus Nijhoff Publishers

The spa industry is currently the fastest growing segment of the hospitality and leisure industry with revenues exceeding those from amusement parks, box

office receipts, vacation ownership gross sales and ski resort ticket sales.

Understanding the Global Spa Industry is the first book to examine management practices in this industry and offers a groundbreaking and comprehensive approach to global spa management, covering everything from the beginnings of the industry through to contemporary management and social and ethical issues. With contributions from internationally renowned business leaders,

practitioners and academics, this unique book is packed with case studies, examples and advice for all those working in, and studying, the international spa industry. *Understanding the Global Spa Industry* brings an analytic lens to the spa movement, examining past, current and future trends and the potential for shaping wellness and health services in the 21st century.

From exotic spa treatments to euthanasia, this book examines the background and social context of medical tourism—the practice of traveling for health care. This work also documents how this industry is reshaping the face of medicine worldwide for individuals, local communities, and national health care systems. *Medical Tourism: A Reference Handbook* provides an accessible overview of the state of medical tourism, written from a balanced,

unbiased perspective. The authors provide relevant social context for this controversial topic, discussing the state of extremely limited research data on medical tourism; the ethical issues involved, such as traveling to have a black-market organ transplanted; and the significant impact of medical tourism on health care systems—that of the United States, and those of the destination countries. The book highlights many contemporary problems,

controversies, and implications of medical tourism both for individuals and health care systems, and presents thought-provoking potential solutions. The topic of medical tourism is also addressed against the backdrop of current healthcare reforms in the United States. Readers can reference a wealth of additional material on medical tourism, ranging from original documents to extensive directories of selected organizations and resources.

For technology-based

online courses, computer labs are necessary to support hands-on practice for IT products. The implementation of an online computer teaching lab is a challenging task. *Strategies & Technologies for Developing Online Computer Labs for Technology-Based Courses* discusses design strategies, implementation difficulties, and the effectiveness of online labs. This book provides scholars, researchers, and practitioners support for lab-based e-learning,

gives guidance on the selection of technologies for various projects, and illustrates Web-based teaching with case studies.

2020 Disha Publications Every industry has its standard professional directory -- advertising has its Black Book, manufacturing its Thomas's Register -- except, that is, for architecture...and design...and construction. While there are dozens of smaller directories, each addressing a specific market niche, none speak to all three industries in a comprehensive way. And larger product directories, like Sweets, are

advertising driven and therefore incomplete. Felder's Comprehensive is the first pan-industry guide of its kind, and it is many times more comprehensive than the nearest competitor. It is an annual desk reference, directory, and product source guide with more reference information than any other title currently available. It contains thousands of listings of time-sensitive and timeless reference information for anyone involved in the business or practice of

architecture, design, design/build, construction, interior design, facility management, and real-estate development. For example, readers can find listings for more than 12,000 manufacturers of furnishings, fixtures, equipment, and materials listed alphabetically, and, most importantly, by product category. Felder's also lists design competitions, domestic and international trade shows, trade publications and other media, trade associations, professional organizations, and more.

Most sections are indexed and cross-referenced for easy referral and identification. Felder's is the first truly comprehensive reference guide of its kind for the A/E/C marketplace and is certain to become the industry standard.
