In the last decades of the nineteenth century, two thousand women physicians formed a significant and lively scientific community in the United States. Many were active writers; they participated in the development of medical record-keeping and research, and they wrote self-help books, social and political essays, fiction, and poetry. *Out of the Dead House* rediscovers the contributions these women made to the developing practice of medicine and to a community of women in science. Susan Wells combines studies of medical genres, such as the patient history or the diagnostic conversation, with discussions of individual writers. The women she discusses include Ann Preston, the first woman dean of a medical college; Hannah Longshore, a successful practitioner who combined conventional and homeopathic medicine; Rebecca Crumpler, the first African American woman physician to publish a medical book; and Mary

Putnam Jacobi, writer of more than 180 medical articles and several important books. Wells shows how these women learned to write, what they wrote, and how these texts were read. *Out of the Dead House* also documents the ways that women doctors influenced medical discourse during the formation of the modern profession. They invented forms and strategies for medical research and writing, including methods of using survey information, taking patient histories, and telling case histories. *Out of the Dead House* adds a critical episode to the developing story of women as producers and critics of culture, including scientific culture."

Ammonius, who taught most of the leading sixth-century Neoplatonists, introduced the methods of his own teacher, Proclus, from Athens to Alexandria. These are exemplified in his commentaries: for instance, in the set of ten introductory questions prefixed to this commentary, which became standard. The commentary is interesting for the light it sheds on the religious situation in Alexandria. It used to be said that the Alexandrian Neoplatonist school was allowed to remain open after the Athenian school closed because Ammonius has agreed with the Christian authorities to keep quiet about his religious views. On the contrary, as this commentary shows he freely declared his belief in the Neoplatonist deities. The philosophical problems considered by Ammonius offer a unique insight into Aristotle's Categories. They exercise the mind and deepen understanding of the subject matter. Modern readers would do well to put the same questions to themselves.
