If you have tried to set up an employee training program on sexual harassment, you already know how time consuming & overwhelming such a task can be. The information that does exist is in bits & pieces, spread throughout literally hundreds of sources so that just pulling the information together is a major undertaking. Insuring that the information is up-to-date, designing the training sessions, & finally presenting the sessions to employees all require time & expertise that few people have available to them. There is widespread consensus that such training programs

do have an impact on preventing &/or eliminating sexual harassment in the workplace. Employee training has been suggested by the Equal Employment Opportunity's 1980 Guidelines on Sexual Harassment as well as by federal courts. The purpose of this Training Manual is to allow individuals to set up sexual harassment training programs for employees in a number of days or weeks rather than the months usually required. It is a "how to" manual, with specific & detailed instructions for accomplishing the entire training effort from beginning to end. The manual includes training materials for both trainer & trainees. When you purchase the Training Manual, you also receive the Resource Manual; they are sold as a set & should be used in conjunction with each other. While the

Training Manual provides step-by-step instructions & materials, the Resource Manual provides background information to give the trainer the knowledge & understanding he or she should have before undertaking a training program.

No employer wants its employees to be bullied and harassed at the workplace. On the contrary, most employers offer an anti-harassment training to ensure employees understand company policy and legislation on workplace harassment. However, anti-harassment training typically focuses on definitions, rights of employers and employees, and complaint resolution processes. While this information is essential, anti-

harassment training fails to allow for an interrogation of participant's social location, positionality, and intersectionality (who am I). Moreover, facilitators often teach anti-harassment via a "neutral lens," failing to understand ways in which their identities shape their pedagogy (teaching). Dr. Candy focuses on a whole person approach, where participants could bring their whole self to the workshop (mind, body, emotions, and spirit), which could potentially lead to a transformative shift, moving the information from the head to the heart. A must read for those in the anti-harassment training space.

Legal issues concerning sexual

harassment are examined, and advice regarding policies and procedures are offered as an update to a publication released by the College and University Personnel Association (CUPA) in 1981. Training methods and programs and special policy considerations for higher education are also covered. Of major concern is sexual harassment by supervisors and by coworkers in the workplace or by faculty members of students and by students of other students on campus. The institution remains responsible for establishing an harassment-free environment. In developing a policy to prevent sexual harassment, important issues are the degree of specificity of definitions and situations and the question of consenting sexual relationships between

student and faculty and/or employee and supervisor.
