 Ever since Star Wars first appeared on the silver screen, people have fantasized about being able to use the Force. But anyone--not just Jedis--can tap into its capabilities by using the Law of Attraction to harness the incredible power of the universe. Author Joshua P. Warren guides you through the lessons of legendary Jedi Masters to reveal how Jedi science encompasses the Law of Attraction and how you can draw on the universe's energy to achieve your dreams. Each thought-provoking exercise shows you how to utilize this power to manifest your deepest desires and attract the life you've always wanted. You'll also learn how to train your mind to hone in on your intention; enhance your connection to the universe; and ensure that your actions, words, and thoughts are in harmony with accomplishing your goals. Do you want to break the negative energies holding you back from success? Do you want to wake up each day excited and full of energy? Do you want to use the real Jedi mind trick on others? Do you want to channel the very

power that binds the universe? Do you want to truly create wealth and peace of mind in your life? Complete with enlightening quotes from the series, Use the Force will help you master important Jedi teachings through the Law of Attraction and make every wish a reality.

This book covers the discovery and history of the most northern breeding population of Peregrine Falcons in the world, near Thule Air Base in northwest Greenland (75.9–77.6° N). Although the region was explored by scientific expeditions as early as 1818, Peregrines were not documented in the area until the 1930s. By the early 1990s the population had become well established, with a warming climate enabling Peregrines from further south to expand their breeding range northward. Here Burnham and his co-authors present their comprehensive findings on the biology and ecology of this population based on thirteen years of research from 1993 to 2005.

During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. The Bluegrass State of Kentucky, which was primarily a rural state in the 1930's when this WPA Guide was published, features Louisville as the only major city. Yet this does not limit the material in the guide by any means, as it also includes essays on Daniel Boone, bluegrass music, and old Southern American culture.

This year's winner of the Yale Series of Younger Poets competition is Davis McCombs's *Ultima Thule*, which was acclaimed as "a book of exploration, of searching regard.... a grave, attentive holding of a light" by the contest judge, the distinguished poet W. S. Merwin. The poems are set above and below the Cave Country of south central Kentucky, where McCombs lives and which is home to thousands of caves. The book is framed by two sonnet sequences, the first about a slave guide and explorer at Mammoth Cave in the mid-1800s and the second about McCombs's experiences as a guide and park ranger there in the 1990s. Other poems deal with Mammoth Cave's four-thousand-year human history and the thrills of crawling into tight, rarely visited passageways to see what lies beyond. Often the poems search for oblique angles into personal experience, and the caves and the landscape they create form a personal geology.
