Thirteen years ago, a curious star fell to the island of Somerset. That night Ike Ryder met Alina, the little girl who fell from the heavens. Now Ike Ryder is on the cusp of manhood and being called to join his father's decade-long war, a fight he vehemently opposes. Before Ike is forced to take up arms, a messenger from the island of Somerset's Great Spirit visits him. Ike is named the Great Spirit's new champion and called to make a perilous journey to the Spirit's sanctuary. While all of Somerset seems to doubt Ike's abilities as a warrior, he resolves to reach the Spirit and use her power to end the bloodshed plaguing the world of Dawn. Miles from Somerset, Alina fights alongside the Knights of Tenshi, the legendary peacekeepers of Dawn. After most of their regiment is killed in an ambush, Alina and the few survivors race to warn Somerset of a coming invasion. Although she and the other Knights fear their enemies of war, the real danger may come from someone much more sinister...a foe with supernatural powers and a growing collection of faces.

Spectral Approach to Transport Problems in Two-Dimensional Disordered Lattices Simon and Schuster

First published on 24 October 1929, the essay was based on a series of lectures she delivered at Newnham College and Girton College, two women's colleges at Cambridge University in October 1928. While this extended essay in fact employs a fictional narrator and narrative to explore women both as writers of and characters in fiction, the manuscript for the delivery of the series of lectures, titled "Women and Fiction", and hence the essay, are considered non-fiction. The essay is generally seen as a feminist text, and is noted in its argument for both a literal and figural space for women writers within a literary tradition dominated by patriarchy. Virginia Woolf was one of the greatest authors of the twentieth century, transformed the art of fiction. The author of numerous novels and short stories, she was also an acknowledged master of the essay form, and an admired literary critic. Adeline Virginia Woolf (1882–1941) was an English writer who is considered one of the foremost modernists of the twentieth century and a pioneer in the use of stream of consciousness as a narrative device.

Finalist for the Pulitzer Prize in Biography *Winner of the 2020 National Book Critics Circle Award*

Winner of the PEN/Jacqueline Bograd Weld Award for Biography A "captivating" (The Washington Post) work of history that explores the life of an unconventional woman during the first half of the 19th century in Edo—the city that would become Tokyo—and a portrait of a city on the brink of a momentous encounter with the West. The daughter of a Buddhist priest, Tsuneno was born in a rural Japanese village and was expected to live a traditional life much like her mother's. But after three divorces—and a temperament much too strong-willed for her family's approval—she ran away to make a life for herself in one of the largest cities in the world: Edo, a bustling metropolis at its peak. With Tsuneno as our guide, we experience the drama and excitement of Edo just prior to the arrival of American Commodore Perry's fleet, which transformed Japan. During this pivotal moment in Japanese history, Tsuneno bounces from tenement to tenement, marries a masterless samurai, and eventually enters the service of a famous city magistrate. Tsuneno's life provides a window into 19th-century Japanese culture—and a rare view of an extraordinary woman who sacrificed her family and her reputation to make a new life for herself, in defiance of social conventions. "A compelling story, traced with meticulous detail and told with exquisite sympathy" (The Wall Street Journal), *Stranger in the Shogun's City* is "a vivid, polyphonic portrait of life in 19th-century Japan [that] evokes the Shogun era with panache and insight" (National Review of Books).

Changing the Paradigm of Homelessness offers a comprehensive look at family housing distress related to the homelessness epidemic in the United States. This book explores the causes and consequences of this epidemic and proposes drastic changes in America's historically ill-fated approach to family homelessness. By describing this crisis in detail, the authors enlighten readers to the scope of this issue, describe those impacted by it, and outline ways to shift public policies and public perceptions. The authors interweave scholarly concepts with insights of those who are currently or previously homeless, and, in doing so, they show the importance of academic knowledge influencing policy decisions and the ways in which these influences impact the lives of real persons. This book, then, uses pedagogy, policy, and pragmatism to critique the United States' approach to family homelessness.

Andre Norman's early life put him on a path to prison. Raised in poverty and surrounded by dysfunction, Andre gravitated to his neighborhood gang. His choices there led to time in juvenile detention, and eventually a maximum-security prison, with sentences totaling over 100 years. During that time, Andre became one of the most dangerous gang leaders in the Massachusetts prison system. Then came the epiphany. Just before Andre was to be crowned "King of the Prison," he had a realization--that he was about to become the "King of Nowhere." He decided that there had to be a way out. He chose to seek success through education, setting his sights on what others said was impossible--attending Harvard University. Now, as the Ambassador of Hope, Andre leverages his unique experiences to deliver a message of inclusivity and positive change. Whether you work in the boardroom or the mail room, if you need that "second voice" of inspiration to be the change you seek, Andre will help you discover and achieve your purpose in life.

The "dazzling" and essential portrayal of 1960s America from the author of *South and West* and *The*

Year of Magical Thinking (The New York Times). Capturing the tumultuous landscape of the United States, and in particular California, during a pivotal era of social change, the first work of nonfiction from one of American literature's most distinctive prose stylists is a modern classic. In twenty razor-sharp essays that redefined the art of journalism, National Book Award-winning author Joan Didion reports on a society gripped by a deep generational divide, from the "misplaced children" dropping acid in San Francisco's Haight-Ashbury district to Hollywood legend John Wayne filming his first picture after a bout with cancer. She paints indelible portraits of reclusive billionaire Howard Hughes and folk singer Joan Baez, "a personality before she was entirely a person," and takes readers on eye-opening journeys to Death Valley, Hawaii, and Las Vegas, "the most extreme and allegorical of American settlements." First published in 1968, *Slouching Towards Bethlehem* has been heralded by the New York Times Book Review as "a rare display of some of the best prose written today in this country" and named to Time magazine's list of the one hundred best and most influential nonfiction books. It is the definitive account of a terrifying and transformative decade in American history whose discordant reverberations continue to sound a half-century later.

The Fundamentals of Biology is a study guide geared towards late middle and early high school students hoping to learn more about the world around us. Whether it be used for test preparation or for satisfying one's curiosity, this book will provide an outline of how life functions. Starting at the molecular level, *The Fundamentals of Biology* will explain concisely how seemingly minuscule things can have a massive impact on a larger scale. Each unit of this book will have several topics within them, organized in a way to help the reader understand connections between concepts. The seven major ideas covered are as follows: Chemistry- In order to see what makes life tick, the reader will learn the essential molecules their interactions; The Cell- As the basic building block of life, their complex structure and functions will be explained; Cell Processes- This includes the basics of photosynthesis, cell respiration, as well as cell division; Heredity and Genetics- How information is passed from one generation to another is detailed in this topic; Body Systems- The wide array of human body systems are covered here, from the skeletal to the endocrine; Taxonomy- All living things are organized into groups based on similar traits and are outlined in this book; Evolution and Ecology- This topic covers how species change over time and their interactions with the environment. Scattered around the book are helpful tips to assist in the memorization of concepts, small pieces of information that are interesting and provides context, as well as suggestions on what the reader can do to experience certain concepts. In addition, pictures and diagrams are embedded within the book to give a visual perspective on specific ideas, and at the end of each topic is a vocabulary list to aid in the learning process.
