Systems governed by non-linear differential equations are of fundamental importance in all branches of science, but our understanding of them is still extremely limited. In this book a particular system, describing the interaction of magnetic monopoles, is investigated in detail. The use of new geometrical methods produces a reasonably clear picture of the dynamics for slowly moving monopoles. This picture clarifies the important notion of solitons, which has attracted much attention in recent years. The soliton idea bridges the gap between the concepts of "fields" and "particles," and is here explored in a fully three-dimensional context. While the background and motivation for the work comes from physics, the presentation is mathematical. This book is interdisciplinary and addresses concerns of theoretical physicists interested in elementary particles or general relativity and mathematicians working in analysis or geometry. The interaction between geometry and physics through non-linear partial differential equations is now at a very exciting stage, and the book is a contribution to this activity. A lethal joyride into today's new breed of technogeeks,

Coupland's forthcoming novel updates Microserfs for the age of Google. Ethan Jarlewski and five co-workers whose names start with J are bureaucratically marooned in jPod. jPod is a no-escape architectural limbo on the fringes of a massive Vancouver game design company. The six workers daily confront the forces that define our era: global piracy, boneheaded marketing staff, people smuggling, the rise of China, marijuana grow ops, Jeff Probst, and the ashes of the 1990s financial tech dream. jPod's universe is amoral and shameless. The characters are products of their era even as they're creating it. Everybody in Ethan's life inhabits a moral grey zone. Nobody is exempt, not even his seemingly straitlaced parents or Coupland himself, as readers will see. Full of word games, visual jokes and sideways jabs, this book throws a sharp, pointed lawn dart into the heart of contemporary life. jPod is Douglas Coupland at the top of his game. Excerpt from jPod: I slunk into the BoardX meeting where Steve, Gord-O, and staff from the loftiest perches of the food chain were still trying to nail the essence of Jeff the Charismatic Turtle. Prototype turtle sketches were pinned onto a massive cork wall, all of them goofy and teensploitational: sunglasses, baggy pants and (dear God) a terry-cloth sweatband. "Does Jeff the Turtle follow players around the entire time they manipulate their third person?" "Almost. Like Watson is to Sherlock Holmes." "Can you imagine how annoying that would be?" "Maybe the buddy isn't such a good idea." Steve squashed that hope. "It's going to be a buddy. Players will love it." "It's really Poochie-Joins-Itchy-and-Scratchy." "How am I ever going to look somebody who plays Tony Hawk games in the face again?" "Isn't our turtle supposed to be a bit more studly?"

"Turtles aren't studly by nature." "What about the turtle they used in the 1950s to pimp the atomic weapons program? He was kind of studly." "No he wasn't and, besides, he's dead." "What?" "Dead. Hanged himself from the side of his posh midtown Manhattan terrarium. Left a note saying he couldn't handle the shame of what he'd done. Wrote it on a piece of Bibb lettuce."

Drew MacLane is a star agent in Scalpel, an organization named for its purpose: precise surgical removal. Assassination. Then MacLane decides to stop killing. He withdraws and retreats to a monastery, where for six years he lives the life of a hermit. But then someone tracks him down, leaving a trail of bodies. Someone who knows all about him - and will stop at nothing to destroy him. Less From acclaimed Thriller Master, David Morrell, comes a classic espionage tale that changed the genre, paving the way for the historical/religious thrillers of Dan Brown, Steve Berry, and James Rollins. In a remote monastery in Vermont, a mysterious man has spent six years alone in a cell, doing penance for unnamed sins that he committed for his government. His only human contact is the hand that delivers his spartan meals through a slot in his door. He allows himself only one small

pleasure, the companionship of a mouse. When the mouse dies, nibbling bread, a terrible suspicion makes him finally leave his sanctuary and confront the ruthless enemies that he prayed he had left behind. Beginning with the Crusades and the origin of the word "assassin," THE FRATERNITY OF THE STONE was the first novel to deal with Opus Dei, the Vatican's civilian intelligence community. If you like to read about ancient conspiracies that threaten the modern world, this is where the genre began.
