As the tactics and technologies of law enforcement change, so do the tactics being used by criminals to evade capture. This book was written to provide law enforcement with the knowledge and tools required to safely capture suspects who attempt to flee from the police. It addresses the trends and tactics that criminals are using and examines proven techniques in how to contain, search, and capture suspects on the run. The focus is on whether to chase or contain, how to set up perimeters, management of the incident, physical conditioning, use of airborne resources, canines, communications, tactical deployment, training, and most importantly incident debriefing techniques. Following this, the criteria of the decision to contain, foot pursuit versus containment, responding officers, hiding locations, and training to meet the challenge are discussed, including the need for a team effort from start to finish. This knowledge, along with training and practice, gives the advantage to the officer, particularly during critical incidents where the capture of the suspect is paramount. The audience for this book begins with the police: training academies, managers, and local, state, and federal police departments.

One man and his four-legged friends go to war in Afghanistan; a ten-year battle against enemies seen and unseen in Afghanistan, sometimes all that stands between coalition troops and death or serious injury is a dog. Highly trained dogs and their handlers search for improvised explosive devices or hidden weapons out on patrol with combat troops. It's a perilous job, often putting

them right in the firing line, and making them high priority targets for the Taliban insurgents they're fighting. Shane Bryant, a former Australian Army dog handler, spent 10 years in Afghanistan, working with elite American special forces alongside his four-legged buddies, Ricky and Benny, and managing teams of dogs and handlers. *War Dogs* is Shane's story – a riveting tale of handlers and their dogs in combat, and a brutally honest account of how a decade as a contract warrior took its toll on Shane's personal life and his mental health, and how he found hope again.

The first in-depth study of the role of canines in WWII Britain, an "important but hitherto under-represented subject," with photos included (Society of Army Historical Research). The Second World War allowed for the use of an unprecedented number of dogs for military duties, both internationally and among the British Armed Forces. On the British Home Front, civilians responded to calls from the British Army's War Dogs Training School and the Ministry of Aircraft Production Guard Dog Training School by donating their canine pets for military training and employment "for the duration." As dogs were instructed in roles with the British Army, the Royal Air Force and the London Civil Defence Region, the distinction between pet and trained working animal became increasingly unclear. While civilians and servicemen alike continued to view military dogs as pets, many also saw trained canines as human-like soldiers "doing their bit," a depiction promulgated by both the military and the wartime press. Yet, historians have paid little attention to the subject. In the first

comprehensive scholarly account of the employment of British military and Civil Defence dogs in the Second World War, Kimberly Brice O'Donnell traces the story from the belated establishment of the short-lived War Dog School and the Messenger Dog Service of the First World War to the more recent employment of canines in Iraq and Afghanistan. With a focus on WWII, *Doing their Bit* examines why and how dogs were trained and employed, and how humans shaped and perceived their use. Using archival material, O'Donnell analyzes the performance of guard, military police, patrol, mine detection, and rescue dogs in training and on operations by considering the advantages and disadvantages of canines in such roles. Military and Civil Defence dogs offered a number of advantages over humans and technological equipment, and the experience gained by dog trainers and handlers led to the continued employment of canines in the postwar period. While the use of horses and other animals has since diminished, World War II marked a turning point in the history of the British military dog, ushering in the seemingly permanent training of dogs for police and military roles.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions.

Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional

literary merit that is great fun to read.

At 10.30 p.m. on 12 January 2016 Acting Sergeant Luke Warburton thought he was taking his last breath. A decorated New South Wales Police Officer, the father of three was looking death in the face after a bullet pierced his femoral vein. If it wasn't for the fact that it happened in the Emergency Ward of Sydney's Nepean Hospital, Warburton would probably have been dead already. An hour earlier, he'd walked to his police van with his ever-faithful German shepherd, Chuck, trotting alongside. Later, Luke would be awarded the Commissioner's Valour Award for conspicuous merit and exceptional bravery in the line of duty. He would maintain he was just a copper doing his job. So, too, was Chuck, who was nationally recognised for bringing down Australia's most wanted man, Malcolm Naden, after a manhunt lasting more than seven years. Man's Best Friend is Luke and Chuck's story. It's the story of a boy who dreamed of one day being a policeman, of his love for dogs and his time at the NSW Police Dog Unit. It's also the story of an ordinary man and his ordinary dog doing extraordinary things in the line of duty.

Mahatma Gandhi said, "The greatness of a nation and its moral progress can be judged by the way its animals are treated." Since civil societies are ruled by law, they can be evaluated, both figuratively and literally, by how animals are treated in the criminal justice system. This book depicts animals' roles within society and the laws that govern how humans treat them. Carmen M. Cusack focuses on current issues in human-animal relationships and how these are affected by the criminal justice system. Her analysis, while objective, is rooted in first-hand activist, professional, legal, and criminal justice experience. She presents a comprehensive overview of the place of animals and the law, including pets in prison, K-9 units, constitutional rights, animal sacrifice, wild animals, entertainment, domestic violence, rehabilitation, history, and religion. She includes information about law, behavioural and social science, systemic responses and procedure, anecdotal evidence, current events, and theoretical considerations. *Animals and Criminal Justice* is a useful handbook and a thorough textbook, as well as a practical guide to animals' relationships with the criminal justice system. Professionals, including police, child protective services, judges, animal control officers, and corrections staff, as well as scholars

in the fields of criminal justice and criminology will find this book invaluable.

[Survived To Tell About It](#) is based on the true-life experiences of Bill Marshall. It's the story of a coal miner who, after escaping death in a collapsed mine, unwittingly takes a job as a doorman at a nightclub. Little did he know that the primary function of the job was to remove undesirables from the club, in any way possible! Bill disliked violence and, in most cases, removed unruly customers from the club without resorting to physical force. However, on those occasions when he couldn't avoid it, Bill

showed he was more than capable of handling any trouble that came his way. The glitz and glamour of the industry, not to mention the appeal of wearing an evening suit to work, was like a powerful drug to Bill. When he finally grew tired of the seedy side of the nightclub business, Bill set off on an incredible odyssey that took him to the Middle East. Not surprisingly, more improbable adventures followed. As one of Bill's friends once told him, "You're what every boy wants to be when he's growing up and what every man wishes he had been when he's grown old."
