 Adoption and use of a contract scorecard demonstrates a maturing ability to manage commercial outsourcing arrangements. The process of designing the scorecard helps you nail down the key outcomes and avoid lack of focus, inconsistent objectives, hidden costs, indifferent service and deteriorating relationships with your contract partners. Sara Cullen's The Contract Scorecard will help you design and drive successful contracts. It offers a systematic guide based on practical advice and examples; one that explains the Contract Scorecard concept and demonstrates crucial implementation activities such as: • The development of performance measures that work • Sound Service Level Agreements that make obligations clear • A Governance Charter that ensures both parties will adopt successful management techniques An upfront investment in your contracts, from a commercial rather than legal perspective is probably the single most influential activity you can undertake; one that will ensure your outsourcing relationships have clear business goals as the focus of the deal. Reading a copy of Sara Cullen's The Contract Scorecard should be the first step in that investment.

 A crucial skill for IT professionals is to have knowledge of the industry they are working in such as insurance, banking and automobile. Learning industry knowledge is not easy as there are multiple industries and its knowledge is vast, subjective and primarily available in unstructured formats such as books. Knowledge Driven Development (KDD) is a knowledge management framework aimed at addressing this challenge. KDD is based on reuse of structured industry and enterprise knowledge to form digital project knowledge that in turn streamlines execution activities leading to quality software. Whereas KDD proposes a new project delivery methodology, Agile and Waterfall

methodologies also stand to gain from its digital knowledge management proposition. Industry knowledge structure of KDD is domain agnostic so the same structure can be used to learn multiple industries in a scientific way. KDD allows to formally seed industry knowledge in academia and in industry, it digitizes project knowledge bringing transparency in software development via exhaustive traceability between atomic pieces of knowledge both from business and IT.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in the South Africa covers every aspect of the subject - the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the South Africa will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

 Business Process Modeling, Simulation and Design, Third Edition provides students with a comprehensive coverage of a range of analytical tools used to model, analyze, understand, and ultimately design business processes. The new edition of this very successful textbook includes a wide range of approaches such as

graphical flowcharting tools, cycle time and capacity analyses, queuing models, discrete-event simulation, simulation-optimization, and data mining for process analytics. While most textbooks on business process management either focus on the intricacies of computer simulation or managerial aspects of business processes, this textbook does both. It presents the tools to design business processes and management techniques on operating them efficiently. The book focuses on the use of discrete event simulation as the main tool for analyzing, modeling, and designing effective business processes. The integration of graphic user-friendly simulation software enables a systematic approach to create optimal designs.

Features of Alabama Real Estate License Exam Prep (AL-RELEP): - National Principles & Law Key Point Review (60 pages) - Real Estate Math Key Formula Review & Practice (20 pages) - Alabama-Specific Laws and Practices (30 pages) - National Practice Tests (500 questions) - Alabama Practice Tests (125 questions) - Alabama Sample Exam (100 questions) We know the real estate licensing exam can be tough, and very nerve-wracking to prepare for. That's why we created the Alabama Real Estate License Exam Prep (AL-RELEP) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works – or fails to work. AL-RELEP is comprehensive in that it contains both key content review and testing practice. And the text review is Alabama-specific – not just simplistic national content, but terse, relevant and accurate Alabama laws and regulations presented as a well-organized set of state 'key point reviews' ideal for pre-test memorization. But let's not dismiss the importance of the national content either. AL-RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice – one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline promulgated by Pearson Vue for Alabama. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your Alabama license exam. A word about the test questions... AL-RELEP's testing practice section consists of ten national practice tests, five state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews – which reinforces your learning of the total body of information tested by your state exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's answer is accompanied by a brief explanation, or "rationale" to further reinforce your understanding. In the end, as you know, it's all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your Alabama real estate exam. So good luck!! For students looking for an Alabama prelicense textbook to complement Alabama Real Estate License Exam Prep, we also have Principles of Real Estate Practice in Alabama.

Designed specifically for graduate-level nursing informatics courses, this is the first text to focus on using technology with an interprofessional team to improve patient care and safety. It delivers an expansive and innovative approach to devising practical methods of optimizing technology to foster quality of patient care and support population health initiatives. Based on

the requirements of the DNP Essential IV Core Competency for Informatics and aligning with federal policy health initiatives, the book describes models of information technology the authors have successfully used in health IT, as well as data and analytics used in business, for-profit industry, and not-for-profit health care association settings, which they have adapted for nursing practice in order to foster optimal patient outcomes. The authors espouse a hybrid approach to teaching with a merged competency and concept-based curriculum. With an emphasis on the benefits of an interprofessional team, the book describes the most effective approaches to health care delivery using health information technology. It describes a nursing informatics model that is comprised of three core domains: point-of-care technology, data management and analytics, and patient safety and quality. The book also includes information on point-of-care applications, population health, data management and integrity, and privacy and security. New and emerging technologies explored include genomics, nanotechnology, artificial intelligence, and data mining. Case studies and critical thinking exercises support the concept-based curriculum and facilitate out-of-the-box thinking. Supplemental materials for instructors include PowerPoint slides and a test bank. While targeted primarily for the nursing arena, the text is also of value in medicine, health information management, occupational therapy, and physical therapy. Key Features: Addresses DNP Essential IV Core Competency for Informatics Focuses specifically on using nursing informatics expertise to improve population health, quality, and safety Advocates an interprofessional team approach to optimizing health IT in all practice settings Stimulates critical thinking skills that can be applied to all aspects of IT health care delivery Discusses newest approaches to interprofessional education for IT health care delivery
