'My book is one of authenticity, my interest is to spread an idea and hopefully have a hand in creating more lasting entrepreneurs in our beautiful country.' - ABED TAU Many people believe that quitting your job and becoming an entrepreneur is a romantic notion, but being your own boss isn't just about freedom. Nor is it about the status that comes your way when you innovate the product or service that no one knew, until now, they simply could not live without. And it's not even about the amazing income you'll be getting when your start-up hits the big time. Entrepreneurship is none of these things. It's about plain hard work which often garners little - if any - reward. It's about keeping going even when you feel you have no more to give and remaining focused and consistent

when all you want to do is walk away. It's about searching through dustbins for business, leaving no stone unturned. Abed Tau knows this because he has walked the entrepreneurial road many times. Having started a number of businesses - some successful, others not - he knows what it's like, and what it takes, to be an entrepreneur. While entrepreneurship may ultimately be richly rewarding, it's important to know some of the challenges upfront before you set off to chase your dream. In *Searching Through Dustbins*, Abed shares his experiences with candour and humour, painting an honest picture of the life of an entrepreneur. Essential reading for any would-be or start-up business owner, it's a vital insight into what to expect and it also provides pragmatic advice for starting or building a business. *Searching Through Dustbins* comes from the heart and speaks to the heart. It will inspire and motivate you, while ensuring that your entrepreneurial dreams and aspirations stay on track. *The Airbnb SEO Bible* John Wiley & Sons Want to be an Airbnb Host but don't know where to start or what to do? Does it include spending most of your waking hours in front of a computer, answering emails from your demanding boss and only living it up on weekends? Or does it consist of owning your own time, pursuing things you're passionate about, and still earning more than enough to indulge in your favorite activities? Unless you're certifiably insane, you definitely answered the latter. Who wouldn't want to get away from the drudgery of employee life and become the

Service Automation is the concept of achieving customer loyalty by the use of automated technologies and builds upon a large demographic and sociological trend. We are the self-service generation, who are able to make our own decisions. The self-service generation is nowadays used to search, evaluate and purchase products online for a number of years now. This book will give you deep insight into the concept of Service Automation, the concept by which you can automate customer service in your organization. If you adequately apply Service Automation in your organization, you will see both employee and customer satisfaction rise and significantly increase the number of people who 'like' your company. The Service Automation Framework (SAF®) has been created to find a methodical way to discuss Service Automation. It offers a simplistic version of any organization, which includes a number of processes that every organization can think of to systematically enhance its Service. As with any model, it is a simplified version of reality, but it structures the mind and provides uniform terminology when discussing the contents with co-workers and colleagues. Nothing more, nothing less. We encourage you to adapt and apply the model in any way that you see fit and which helps you and your organization. This book is intended for anyone who has ever experienced that the level of Service in his organization can be increased and is looking for guidance on a step-by-step model to achieve this, whether you are an entrepreneur, executive, consultant or work in the field of academia.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
