The Meaning of Company Accounts

BPP Learning Media
There is currently
much debate over
corporate social
responsibility on
whether business
companies should look
beyond shareholder
primacy and profit
maximisation to act for
the benefit of others. It
is generally agreed,
however, even
amongst advocates of
shareholder primacy,
that profit
maximisation should

only be achieved within
the framework of
external laws
regulating the conduct
of individuals and
companies generally. If
the objectives of such
external laws are not
to be defeated, then it
is important for
controllers of
companies to ensure
corporate compliance
with the law. Despite
this, controversies
have arisen where
corporate enterprises
may have improperly
flouted or evaded
liabilities under the
law. Against this
background, it is
argued in this book
that it is necessary to
ensure that responsible
persons are
accountable under the
law so as to promote
compliance with legal
regulations in the
corporate context.
Individuals or entities

behind the company who are responsible for wrongful conduct should be held liable under the law – whether it be tort law or statutory regulation. Some counter that the corporate law principles of limited liability and separate entity have the primacy to effectively shield those behind the company from at least certain types of liability. However, it is undesirable for corporate insiders to hide behind the company to avoid tortious or statutory liabilities. This book adopts a theory of interactive (corrective) justice that is applied in the corporate context to justify the imposition of civil liability on responsible directors, shareholders and other corporate

participants under Anglo-Australian law. In light of this theoretical framework, possibilities of rectifying deficiencies in the law through judicial development of existing legal principles are examined. To the extent that appropriate directions in the law cannot be achieved via judicial development of the law, the book also investigates possibilities of statutory reform.

Financial Management for Small Businesses

Springer

Topics discussed in this book are deliberately comparative and show the different levels of the ground rules for the regulation of corporate operations in the different jurisdictions. The United Kingdom,

Nigeria and South Africa are primarily chosen simply on the common law background upon which the statutory provisions in those countries are founded. There are also references to Canada, Australia and India on case by case basis to illustrate the differences in the application of the relevant legal principles and statutory interpretations. The insights gained should facilitate statutory amendments and effective adjustment in the operations of the regulatory agencies and business organizations. The book is written as an invaluable study material for students at the tertiary level. Illuminating the

concepts from divergent perspectives avails the reader a broad range of explanations for a better understanding of the subject. Legal practitioners and the judiciary should also find in this work a good source of legal information on company law, especially whenever the need arises to seek persuasive guidance from the opinions of courts and writers on similar developments in cognate jurisdictions to give meaning to those difficult and uncharted courses in the discharge of their daily responsibilities of interpreting and applying the law as judicial officers. The book should be a handy material for those running the affairs of a company in

understanding the rules of their engagement.

The Companies (Accounting) Act 2017 makes over 100 changes to the Companies Act 2014. Taken with the Companies (Amendment) Act 2017 and the Beneficial Ownership Regulations 2016, they have introduced significant changes to company and accounting law and practice. This book will explain and contextualise the many changes for legal and accounting practitioners. The Beneficial Ownership Regulations, in particular, are very technical and complex and this book will provide much-needed

guidance for practitioners. Written by leading experts in the two relevant fields - accounting and law - this book is ideal for lawyers, accountants, and company secretaries. Key areas covered by the book include: * the new four-fold classification of companies for accounting purposes; * micro companies - the new regime; * consolidation of financial statements - key changes; * disclosures in financial statements - key changes; * the new rules regarding payments to governments; * the shrinking exemption from filing financial statements for unlimited companies; * changes to the definition of "external companies"; * changes

Company Law in East

Asia Philip Allan

Preface Law is a

system of rules that
are created and
enforced through social
or governmental
institutions to regulate
behavior. It has been
defined both as "the
Science of Justice" and
"the Art of Justice". Law
is a system that
regulates and ensures
that individuals or a
community adhere to
the will of the state.
State-enforced laws
can be made by a
collective legislature or
by a single legislator,
resulting in statutes,
by the executive
through decrees and
regulations, or
established by judges
through precedent,
normally in common
law jurisdictions.
Private individuals can
create legally binding
contracts, including
arbitration agreements
that may elect to
accept alternative

arbitration to the normal court process. The formation of laws themselves may be influenced by a constitution, written or tacit, and the rights encoded therein. The law shapes politics, economics, history and society in various ways and serves as a mediator of relations between people. It is in this context, a textbook on introduction to the subject of LEGAL & BUSINESS ENVIROMENT is presented to the students of Management program. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it

interesting for the readers. An attempt is made here by the experts to assist the students by way of providing case based study material as per the curriculum with non-commercial considerations. However, it is implicit that these are exam-oriented Study Material and students are advised to attend regular class room classes in the Institute and utilize reference books available in the library for In-depth knowledge. We owe to many websites and their free contents; we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book. We acknowledge our thanks to them. At the

end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful. Readers can email their queries and doubts to our authors on sjp10ng@gmail.com. We shall be glad to help you immediately.
