Reading for Life is an anthology of poems and of extracts from prose fiction, related to a series of case-histories of individuals carefully reading, discussing their reading lives, and thinking about the relation of literature to their existence. It enables readers to gain increased imaginative access to the works in question through seeing how they have intensely affected equivalent readers—a novelist, a poet, a doctor, a teacher, an anthologist, but also non-specialists, ordinary people within shared reading groups in many different settings, finding help from literary texts in times of often painful personal need. It is the story of the work done by Philip Davis' research unit, the Centre for Research into Reading, Literature and Society (CRILS), at the University of Liverpool, in a ten-year partnership with the outreach charity The Reader, taking serious literature to often neglected communities and struggling individuals through the shared reading—alive and aloud—of literature from all ages. Reading for Life is a detailed account of what reading literature can do for a wide variety of individuals in relation to a wide variety of texts: it will be of interest to serious readers in the wider world as much as to scholars working within literary studies, and to all those involved in thinking about the therapeutic interactions of literature and life in psychology, medicine, and mental health support settings.

The Routledge Companion to Russian Literature is an engaging and accessible guide to Russian writing of the past thousand years. The volume covers the entire span of Russian literature, from the Middle Ages to the post-Soviet period, and explores all the forms that have made it so famous: poetry, drama and, of course, the Russian novel. A particular emphasis is given to the nineteenth and twentieth centuries, when Russian literature achieved world-wide recognition through the works of writers such as Pushkin, Dostoevsky, Tolstoy, Chekhov, Nabokov and Solzhenitsyn. Covering a range of subjects including women's writing, Russian literary theory, socialist realism and émigré writing, leading international scholars open up the wonderful diversity of Russian literature. With recommended lists of further reading and an excellent up-to-date general bibliography, The Routledge Companion to Russian Literature is the perfect guide for students and general readers alike.

In these "studies" Lawrence -with what seems an attempt at humorous criticism- mocks and insults the early creators of American literature. His capricious and snobbish prose mars what could have been serious studies of the American heart and soul of the budding nation. The perspective provided by more than a century and a half of years is not favorable to Lawrence. His "studies," seemed today the rantings of a writer with very little self-esteem. Nevertheless, his criticism has much socially redeeming value today if we wish to understand the spirit that made the United States a world power. Lawrence reviews the works of such authors as Ben Franklin, Hawthorne, Poe, Melville, Fennimore Cooper and Whitman.

Why Reading Literature in School Still Matters: Imagination, Interpretation, Insight explains how a reader's involvement with literary texts can create conditions for developing deep insight into human experience, and how teachers can develop these interpretive possibilities in school contexts. Developed from the author's many years of research, this book offers both a theoretical framework that draws from an interdisciplinary array of sources and many compelling and insightful examples of literary engagement of child, adolescent, and adult readers, as well as practical advice for teachers and other readers about how to create interesting and expansive sites for interpretation that are personally rewarding and productive. Why Reading Literature in School Still Matters:

Imagination, Interpretation, Insight : *provides an overview of theories of human learning that influence beliefs about language, culture, and identity; *shows how these theories of learning influence beliefs about and practices of reading and interpretation; *introduces new ways to conceptualize reading that emphasize the relationship between individual and collective identities and language/literacy practices; *explains why access to information does not guarantee that understanding and/or insight will occur--by emphasizing the importance of "re-reading" and "close reading" this text shows that development of deep insight depends on interpretation skills that must be taught; and *presents a reconceptualized view of reading pedagogy. This is an essential text for education courses at both the undergraduate and graduate levels and a must read for teachers and for anyone interested in more deeply understanding how literary works of art can create conditions for learning about oneself, one's situation, and one's possibilities.

In the eighteenth century, literature meant learned writings; by the twentieth century, literature had come to be identified with imaginative, aesthetically significant works, and academic literary studies had developed special protocols for interpreting and valuing literary texts. Literature in the Making examines what happened in between: how literature came to be more precisely specified and valued; how it was organized into genres, canons, and national traditions; and how it became the basis for departments of modern languages and literatures in research universities. Modern literature, the version of literature familiar today, was an international invention, but it was forged when literary cultures, traditions, and publishing industries were mainly organized nationally. Literature in the Making examines modern literature's coalescence and institutionalization in the United States, considered as an instructive instance of a phenomenon that was going global. Since modern literature initially offered a way to formulate the value of legacy texts by authors such as Homer, Cervantes, and Shakespeare, however, the development of literature and literary culture in the U.S. was fundamentally transnational. Literature in the Making argues that Shakespeare studies, one of the richest tracts of nineteenth-century U.S. literary culture, was a key domain in which literature came to be valued both for fuelling modern projects and for safeguarding values and practices that modernity put at risk—a foundational paradox that continues to shape literary studies and literary culture. Bringing together the histories of literature's competing conceptualizations, its print infrastructure, its changing status in higher education, and its life in public culture during the long nineteenth century, Literature in the Making offers a robust account of how and why literature mattered then and matters now. By highlighting the lively collaboration between academics and non-academics that prevailed before the ascendancy of the research university starkly divided experts from amateurs, Literature in the Making also opens new possibilities for envisioning how academics might partner with the reading public.

Ecocritical Approaches to Literature in French applies the methods of ecocritical inquiry to French literature. To date, there is very little ecocritical scholarship on French-language literature and, indeed, very little on any non-Anglophone literature. This collection was created with two audiences in mind: it introduces an ecocritical perspective for readers of French literature, and it familiarizes ecocritics with literature in French. This collection will be a useful resource to scholars of French and Francophone literature, and of ecocriticism.

This Very Short Introduction chronicles the trends and traditions of modern Latin American literature, arguing that Latin American literature developed as a continent-wide phenomenon, not just an assemblage of national literatures, in moments of political crisis. With the Spanish American War came Modernismo, the end of World War I and the Mexican Revolution produced the avant-garde, and the Cuban Revolution sparked a movement in the novel that came to be known as the Boom. Within this narrative, the author covers all of the major writers of Latin American literature, from Andrés Bello and José María de Heredia, through Borges and García Márquez, to Fernando Vallejo and Roberto Bolaño.

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Emphasizing the diversity of collage in the twentieth century, Rona Cran's book explores the role that it played in the work of Joseph Cornell, William Burroughs, Frank O'Hara, and Bob Dylan.

Collage's catalytic effect, Cran argues, enabled each to overcome a crisis in representation that threatened to destabilize their work. Throughout, she shows that rigid definitions of collage severely limit our understanding of artists and writers who used it in non-traditional ways.

"What is Literature?" and Other Essays Harvard University Press

One of the greatest and most ambitious works in English literature, in the original Middle English *The Canterbury Tales* depicts a storytelling competition between pilgrims drawn from all ranks of society. The tales are as various as the pilgrims themselves, encompassing comedy, pathos, tragedy, and cynicism. The Miller and the Reeve express their mutual antagonism in a pair of comic stories combining sex and trickery; in "The Shipman's Tale," a wife sells her favors to a monk. Others draw on courtly romance and fantasy: the Knight tells of rivals competing for the love of the same woman, and the Squire describes a princess who can speak to birds. In these twenty-four tales, Chaucer displays a dazzling range of literary styles and conjures up a wonderfully vivid picture of medieval life. This is a freshly established Middle English text with standardized spelling and punctuation and on-page glossing. It features an introduction by Jill Mann, a chronology of Chaucer's life and works, detailed explanatory notes, suggestions for further reading, a full glossary, and a bibliography. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The book is the volume of "The History of Literature in Wei, Jin, Southern and Northern Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period. The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or "emperor" of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC - 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood - the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.
