W.F.P. Burton (1886-1971): A Pentecostal Pioneer's Missional Vision for Congo BRILL

This book researches and reports on issues of current practice: e.g., teacher preparation, placement of students with special needs, implications for the average and above in the classroom and the financial costs driving placement decisions in the education system. We examine the lowering of standards so all can pass tests, report on loss of engagement of students by middle school, and mourn the squandering of creativity to appease a mandate.

TEACHING APTITUDE SAGE Publications

Disability—as with other marginalized topics in social policy—is at risk for exclusion from social debate. This multivolume reference work provides an

overview of challenges and opportunities for people with disabilities and their families at all stages of life. Once primarily thought of as a medical issue, disability is now more widely recognized as a critical issue of identity, personhood, and social justice. By discussing challenges confronting people with disabilities and their families and by collecting numerous accounts of disability experiences, this volume firmly situates disability within broader social movements, policy, and areas of marginalization, providing a critical examination into the lived experiences of people with disabilities and how disability can affect identity. A foundational introduction to disability for a wide audience—from those intimately connected with a person with a disability to those interested in the science behind disability—this collection covers all aspects of disability critical to understanding disability in the United States. Topics covered include characteristics of disability; disability concepts, models, and theories; important historical developments and milestones for people with disabilities; prominent individuals, organizations, and agencies; notable policies and services; and intersections of disability policy with other policy.

Since the introduction of communicative language teaching, collaborative learning has played an important role in the second language (L2) classroom. Drawing from sociocultural theory, which states that human cognitive development is a socially situated activity mediated by language, studies in L2 pedagogy advocate the use of tasks that require learners to work together. Collaborative dialogue encourages language learning, and research shows that the solutions reached by students in this process are more often correct with a lasting influence on their language comprehension. This volume includes ten chapters that illustrate the benefits of collaborative dialogue in second foreign language classrooms. The

volume considers key issues dealing with collaborative tasks and implications for language teaching.

Unifying Educational Systems encourages leaders to move beyond the traditional forms and rituals of leadership for special education that are caught within traditional definitions of a continuum of services. Grounded in public policy debates, research on teaching and learning, and an emerging consensus throughout the leadership community that calls into question our current practices, chapters in this volume provide a discussion of the purpose, principles, and paradoxes extant in the implementation of current special education policy. Chapter authors discuss how students are currently served, the feasibility of re-conceptualizing special education leadership in the current policy context, and the challenges for the future. Ultimately, Unifying Educational Systems calls for a new policy framework to integrate special education within the larger instructional support system in schools, in order to support a social justice and inclusive practices agenda.

Stand! TEACHING APTITUDE

It is essential that today's educators and school leaders are more informed about the legal rights and entitlements of students with disabilities. This resource provides eight easy-to-implement lesson plans on special education law that require no legal knowledge and can be facilitated by school principals, special education directors, teachers, or university instructors. In short one-hour sessions, participants learn by engaging in practical activities instead of only passive reading about the law. All of the lessons utilize actual situations that have led to expensive litigation and each includes the following sections: Introduction for Facilitators; Materials Needed; Background, Purpose, and Objectives of the Lesson; Hook; Activity; Questions for Conversation; Test Your Knowledge; and Additional Resources. This one-of-a-kind book will help schools and districts reduce the time and energy devoted to dealing with violations of the law, resolving parental complaints, correcting errors by school employees, and more. Book Features: A focus on important special education legal issues occurring in schools today. Field-tested lesson plans that can be adopted by schools nationwide because they are based on federal law. Everything needed to teach the lessons, including materials, scripts, interactive activities, and discussion questions. Measurable objectives and assessments to ensure the participants have learned the intended content of the lesson. "School boards spend far too much money on special education litigation—funds that could better be used to provide educational services to children. This book provides a workable framework for school administrators to give their staff the knowledge needed to make legally-correct decisions and avoid costly litigation." —Allan Osborne, Former Principal, Snug Harbor Community School, Quincy, MA
