 Mount Everest, The Reconnaissance, 1921 by George Herbert Leigh-Mallory, first published in 1922, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

Mount Everest Bib. Orton IICA / CATIE

The Battle of Petersburg was the culmination of the Virginia Overland campaign, which pitted the Army of the Potomac, led by Ulysses S. Grant and George Gordon Meade, against Robert E. Lee's Army of Northern Virginia. In spite of having outmaneuvered Lee, after three days of battle in which the Confederates at Petersburg were severely outnumbered, Union forces failed to take the city, and their final, futile attack on the fourth day only added to already staggering casualties. By holding Petersburg against great odds, the Confederacy arguably won its last great strategic victory of the Civil War. In The Battle of Petersburg, June 15-18, 1864, Sean Michael Chick takes an in-depth look at an important battle often overlooked by historians and offers a new perspective on why the Army of the Potomac's leadership, from Grant down to his corps commanders, could not win a battle in which they held colossal advantages. He also discusses the battle's wider context, including politics, memory, and battlefield preservation. Highlights include the role played by African American soldiers on the first day and a detailed retelling of the famed attack of the First Maine Heavy Artillery, which lost more men than any other Civil War regiment in a single battle. In addition, the book has a fresh and nuanced interpretation of the generalships of Grant, Meade, Lee, P. G. T. Beauregard, and William Farrar Smith during this critical battle.

Gary David Blount's Rocky Mountain Fishing Journals: Perpetual Wild Trout Recapture Angling Journal "A Public Fisheries Project" The purpose of this: Perpetual Wild Trout Recapture Angling Journal "A Public Fisheries Project" is to be the initial public Social Media generated "Wild Trout Fisheries" data base site to monitor and publish the variable changes in our "Wild Trout" fisheries for Perpetuity". This is an invitation for you, your friends or your fishing club to participate in conducting recaptures: "Angling Day's" published in all of Gary David Blount Rocky Mountain Fishing Journals. These Rocky Mountain Fishing Journals encompass 35-years and contain over 1,500 - "Angling Day's" documenting the daily "Wild Trout" catch rates, water temperature, water level, water turbidity, air temperature, weather conditions, daily hatches, stomach analysis from "Wild Trout" landed, "GDB" Custom Flies fished, fly fishing presentations, trout species, trout lengths and geographic location on over 35-different bodies of water in Montana, Wyoming, Yellowstone National Park, Idaho and Washington. This Perpetual cursory research projects objective is to ascertain skilled or professional anglers at blountspublishing@yahoo.com and have them return to each body of water on the precise date, geographic location and time period fished contained in every one of my Rocky Mountain Fishing Journals. Each ascertain skilled or professional angler will document their "Angler Day" using the same format I used in each one of my Rocky Mountain Fishing Journals along with their "Angler Day" photographs in "JPEG" format. Each skilled or professional anglers "Angling Day" written documentation and photographs will be e-mailed to blountspublishing@yahoo.com and I will publish them in Gary David Blount "Yearly" Perpetual Rocky Mountain Fishing Journal. To preview excerpts from each one of Gary David Blount Rocky Mountain Fishing Journals go to books.google.com, play google.com and to view on You Tube.com in the search bar type Gary David Blount Rocky Mountain Fishing Journals. Introduction Rock Creek is located 25-east of Missoula, Montana off Interstate 90. Rock Creek headwaters originate from three-Mountain Ranges. The North Fork of Rock Creek and the West Fork of Rock Creek originate from the Sapphire Mountain Range. The East Fork of Rock Creek and the Middle Fork of Rock Creek originate from the Anaconda Mountain Range and the Anaconda - Pintler Wilderness Area. The Upper Willow Creek originates from the John Long Mountains. There are numerous small streams flowing into Rock Creek on its journey north to its confluence with the Clarkfork of the Columbia River. In the 1980's Rock Creek contained roughly 2,000 Rainbow Trout per mile of stream in the lower 28-miles of Rock Creek; from Gillies Bridge downstream to the mouth of Rock Creek. In the 1990's the Rainbow Trout population in Rock Creek plummeted to just 300 Rainbow Trout per mile of stream. This drastic decline in the Rainbow Trout population was caused by Whirling Disease and by the Montana Department of Fish, Wildlife and Parks decision to halt the stocking of Hatchery Rainbow Trout into the East Fork of Rock Creek Reservoir. To this day there has been no significant increase in the Rock Creek Rainbow Trout population. However, the Native Westslope Cutthroat Trout population in Rock Creek has rebounded somewhat to fill the void of lost Rainbow Trout population. Also the non-native Brown Trout

population is on the increase. The Rock Creek fishery consists of native Westslope Cutthroat Trout up to 24-inches in length, native Bull Trout up to 36-inches in length, native Mountain Whitefish up to 24-inches in length, non-native Brown Trout up to 26-inches in length, non-native Rainbow Trout up to 24-inches in length and non-native Brook Trout up to 14-inches in length. Important Entomology And Forage Fish on Rock Creek are: Stone Flies: 1. Skwala (Skwala parallela) March - April (Size 8-10-12-14) 2. Salmon Fly (Pteronarcys californica) May - July (Size 2-4-6-8) 3. Western Big Golden Stone (Calineuria californica) May - August (Size 4-6-8-10-12) 4. Western Medium Golden Brown Stone (Isoperla sp.) June - September (Size 4-6-8-10) 5. Little Yellow Stone (Alloperla pallidula) June - October (Size 12-14-16-18) 6. Little Olive Stone (Alloperla delicata) May - August (Size 12-14-16-18) 7. Winter Stone (Capina sp.) January - March (Size 14-16-18) May Flies: 1. Western Black Quill (Rhithrogenahageni) March - April (Size 12-14) 2. Early Blue-Winged Olive (Baetis tricaudatus) March - April (Size 14-16-18) 3. Late Blue-Winged Olive (Baetis parvus) June - November (Size 16-22) 4. Little Western Blue-Winged Olive (Ephemerella margarita) July - September (Size 16-22) 5. Western Green Drake (Drunella grandis) June - July (Size 10-12) 6. Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens) May -September (Size 14-16-18) 7. Small Western Green Drake (Ephemerella flavilinea) June - August (Size 14-16) 8. Western Leadwing (Isonychia sicca) June - July Size (Size 10-12) 9. Dark Gray Quill (Ameletus connectus) May - June (Size 12-14) 10. White Winged Black (Tricorythodes minutus) July - October (Size 18-20) 11. Midges (Diptera / Chironomus) Caddis Flies 1. Grannom (Brachycentrus occidentalis) April - May (Size 12-14-16) 2. Green Sedge (Ryacophila sp.)

Abstracts of the Annual Planetary Geologic Mappers Meeting, June 18-19, 2001, Albuquerque, New Mexico Forgotten Books

Excerpt from Historical Address at the Sheffield Centennial Commemoration: June 18th, 1876 Though the Indian settlement in lower Housatonic was very small, it did not comprise all the natives within the territory granted. The tribe, however, was very much reduced in numbers, and Konkapot, the chief, of whom the land was bought, with eight or ten families, lived in that part of the territory of upper Housatonic, now covered by Stock bridge. The minority lived on the reservation in the lower township already alluded to, called by them Skatehook.' 7' (holland's History of Western Massachusetts.) Such is the history of the settlement of the town, and of Southern Berkshire, on the Housatonic. We find that, of the two townships authorized by the General Court, in 1722, the lower one was incorporated in January, 1733, with the name of the more famous English town of Sheffield. Doubtless among the early settlers there must have been some for whom the name had suggestions other than those so familiar of penknives and table cutlery. To some of our progenitors it must have had those of a home, or at least have been associated with tender memories of the fatherland. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

To Create a Department of Peace. Hearings on H.R. 503. June 18, 1947 Wentworth Press Gary David Blount's Rocky Mountain Fishing Journals: Perpetual Wild Trout Recapture Angling Journal "A Public Fisheries Project" The purpose of this: Perpetual Wild Trout Recapture Angling Journal "A Public Fisheries Project" is to be the initial public Social Media generated "Wild Trout Fisheries" data base site to monitor and publish the variable changes in our "Wild Trout" fisheries for Perpetuity". Introduction The headwaters of the Bitterroot River originate from two-major Head Waters. The East Fork of the Bitterroot River originates from the Sapphire Mountains and Anaconda Pintler Wilderness Areas. The West Fork of the Bitterroot River originates from the Bitterroot Mountains and the Selway

- Bitterroot Wilderness Areas. The West Fork of the Bitterroot River was dammed in the early 1900's creating Painted Rocks Reservoir. Below Painted Rocks Reservoir lies the tail-water fishery section of the West Fork of the Bitterroot River, which flows downstream to its confluence with the East Fork of the Bitterroot River north of the town of Conner, Montana. The East Fork of the Bitterroot River is still a free flowing stream. The Wild Fires of "2000" burned much of the timberland in the headwaters of both drainages. During spring run-off and summer thunderstorms the East Fork of the Bitterroot River turns turbid from the ash that is washed into the river from the tributaries flowing into the river. The West Fork of the Bitterroot River however remains clear, Painted Rocks Reservoir allows the headwater run-off to settle out within the reservoir before entering the West Fork of the Bitterroot River below the dam. The East Fork of the Bitterroot River confluence with the West Fork of the Bitterroot River forms the mainstem of the Bitterroot River, which flows northerly to its confluence with the Clarkfork River outside the city of Missoula, Montana. The Bitterroot River trout fishery has experienced deprecation from mankind since the early 1900's when Marcus Daly "The Copper King" and others commissioned the building of an extensive network of irrigation canals throughout the Bitterroot Valley. The largest canal is the Big Ditch, which runs northerly over seventy-five miles in length traversing the eastside of the Bitterroot River Valley. They built large diversion dams across the Bitterroot River and diverted most of the tributaries in the Bitterroot Valley. These diversion dams dewater the Bitterroot River severely during the summer months. Most of the Bitterroot Tributaries become dry during critical spawning periods for Rainbow Trout, Westslope Cutthroat Trout, Brown Trout and Bull Trout. With these deprecation problems on the Bitterroot River there are still some sections of the Bitterroot River that offer good fishing for Rainbow Trout, Brown Trout and Westslope Cutthroat Trout and to a lesser degree Bull Trout. The Bitterroot River at time offers some excellent dry fly fishing. In March and April there are Stone Flies: Skwala Stone Flies (Skwala parallela) and Winter Stone Flies (Capina sp.), May Flies: Midges (Diptera / Chironomus), Early Blue-Winged Olive (Baetis tricaudatus), Dark Gray Quill (Ameletus connectus) and Caddis Flies: Grannom (Brachycentrus occidentalis) and Green Sedge (Ryacophila sp.). In May, June, July and August there are Stone Flies: Salmon Fly (Pteronarcys californica), Western Big Golden Stone Fly (Calineuria californica), Western Medium Golden Brown Stone Fly (Isoperla sp.), Little Yellow Stone Fly (Alloperla pallidula) and Little Olive Stone Fly (Alloperla delicata); May Flies: Midges (Diptera / Chironomus), Late Blue-Winged Olive (Baetis parvus), Little Western Blue-Winged Olive (Ephemerella margarita), Western Green Drake (Drunella grandis), Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens), Small Western Green Drake (Ephemerella flavilinea), Western Leadwing (Isonychia sicca) and Dark Gray Quill (Ameletus connectus); Caddis Flies: Grannom (Brachycentrus occidentalis), Green Sedge (Ryacophila sp.), Great Gray Spotted Sedge (Arctopsyche grandis), Little Tan Short Horn Sedge (Glossosoma sp.), Ring Horn Microcaddis (Leucotrichia pictipes), Spotted Sedge (Hydropsyche sp.), Little Sister Sedge (Cheumatopsyche campyla) and Little Plain Brown Sedge (Lepidostoma pluviale). In September and October there are May Flies: Late Blue-Winged Olive (Baetis parvus), Little Western Blue-Winged Olive (Ephemerella margarita), Tiny Western Olive (Pseudocloeon edmundsi), Pale Morning Dun (Ephemerella inermis and Ephemerella infrequens), Gray Drake (Siphonurus occidentalis), White Winged Black (Tricorythodes minutus), Caddis: Giant Orange Sedge (Dicosmoecus sp.) and Midges (Diptera / Chironomus).
