 Many things
 define a job
 seeker--
 experience,
 education,
 first
 impressions,
 connections,
 passion, and
 the value you
 might bring to
 the company
 you wish to
 work for. For
 decades, the
 perceived
 ideal
 candidate
 would have all
 of the above,

most of the above; however, a good candidate would have a four-year college degree. To a great extent, an employer still would like someone with a four-year college degree. However, I believe this is changing. The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired

by companies. The time it will take you to earn your degree, you could be making a nice living and will have accrued zero debt in the process. Plus, after working in an industry of your choice, something you do have an interest in, even a passion for, you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice, as you continue

to work your way up through the company. You will find the more value you bring to a company, the more they will look to you to assume great responsibility. Typically, the more responsibility, the greater the paycheck. What makes this book timely is the fact as COVID-19 winds down, we are seeing many labor shortages in many areas and industries. Now is the absolute best time to go to an industry

experiencing a labor shortage, or enter one of the numerous industries researched in this book and get yourself the job you always wanted, without the cost and time involved with getting a four-year college education. I have nothing against getting a degree, and there are still many fields where they will always be mandatory; however, the trades, service industries, government, railroads, law

enforcement, plus many others will welcome you with open arms without the need for a four-year degree. I hope this book helps.

Jones &

Bartlett Learning The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplemental

y editions within the week. *Introduction to the Health Professions* Completely updated, *Introduction to the Health Professions, Sixth Edition* provides the most current, comprehensive coverage of all the major health professions. This popular text outlines more than 75 careers and touches on every major facet of the field including training requirements, job responsibilities, and

salaries. This fundamental resource provides a thorough review of the U.S. healthcare delivery system, managed care, health care financing, reimbursement, insurance coverage, Medicare, Medicaid, and the impact of new technology on healthcare services. Written specifically for students who plan to become healthcare professionals, this text will give you all

the information you need for a successful career! Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. *Survey Report of the Salary Standardization Board* The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive

departments and agencies of the Federal Government. **Occupational Therapy** This book introduces individuals new to the field of occupational therapy to the history, frameworks, and approaches used in providing therapy. It is a one-of-a-kind textbook that focuses on educating the occupational therapy technician regarding his or her role in healthcare. It employs a unique

approach by presenting the material using a question-and-answer and problem-based learning format to assist students in identifying and learning the precise information they need to know as they prepare to become technicians. The book uses text and images that illustrate difficult-to-understand medical concepts and terminology used in occupational therapy. It highlights the

importance of diversity through the use and inclusion of various cultures, experiences, and strategies used in diverse settings and discusses the technician's role in current conditions like COVID-19 and technology used in rehabilitation.
