Encyclopedia of World Cities Transaction Publishers

The role of government, institutions and society has been radically transformed in the last two decades. This book examines how the New Development Paradigm is put into practice in Pakistan and other underdeveloped countries. It focuses upon the role NGOs, institutions and local governments play in development related activity, and examines the attempts to alter the gender balance, considered to be one of the main reasons for lack of development. Essentially, the book offers a critique of the new theories which constitute the New Development Paradigm and addresses a wide audience ranging from the scholar and activist to journalists and general readers.

Nineteenth-century Armenia was a zone of competition between the Persian, Ottoman, and the Russian Empires. Yet over the course of the century a new generation of Armenian journalists, scholars, and writers worked to transform their geographically, socially, and linguistically fragmented communities threatened by regional isolation and dissent, into a patriotic and nationally conscious population. Lisa Khachaturian seeks to explain how this profoundly divided society managed to achieve a common cultural bond. The national project that captivated nineteenth-century Eastern Armenian intellectuals was a daunting task, especially since their efforts were directed in the Caucasus--a territory known for its volatile history, its ethnic heterogeneity, and its linguistic complexity. Although this cultural and social maelstrom was both aggravated and tempered by the new Russian arena of economic growth, urban development, and heightened technology and communication, diversity was hardly a recent phenomenon in the region; it had been an endemic part of Caucasian history for centuries. Armenians were no exception to this. While the Georgians, bound to their landed nobility, generally lived within kingdoms, the Armenians experienced centuries of forced resettlement, migration, and centuries of habitation among other peoples. Some Armenians had settled in faraway countries, but many remained in scattered colonies within the boundaries of historic Armenia. This is a study of the formation of modern Armenian national consciousness under Imperial Russian rule. The Tsarist acquisition of Armenian-populated territory and consequent efforts to integrate this territory into the empire imposed sufficient unity to provide a basis for a nascent national movement. The particular influences of Russian imperial rule met the Eastern Armenian communities to create a new environment for a modern national revival. This book reviews how nineteenth-century Armenian intellectuals discussed and conceived of the nation through the formation of the Armenian press. This is a rare blend of national culture and communication networking.

The 20th century's most protracted conflict, the Cold War, also provided the longest and most stable peace in the history of the modern world--a fragile peace that came at the price of national freedom for many people. With the demise of the Cold War, new nearly-unknown countries, long ignored or

suppressed, came to the attention of the world, as ethnic and national conflicts, rooted in the multi-ethnic populations of the newly independent states, emerged. From Bosnia-Herzegovina and Macedonia to Eritrea and Uzbekistan, *Miniature Empires* provides an essential guide to the states recognized since 1989 and the "nations" that dwell within their borders. *Miniature Empires* is the first reference book to address the post-Cold War nationalist resurgence by focusing on the nations within the new nation-states--both the core nationalities and the national minorities. Each article highlights the historical, political, social, and economic evolution of the new nations. Outstanding Academic Book

Lesser-Known Languages of South Asia Oxford University Press

This must-have handbook offers a comprehensive survey of the field. It reviews the language education policies of Asia, encompassing 30 countries sub-divided by regions, namely East, Southeast, South and Central Asia, and considers the extent to which these are being implemented and with what effect. The most recent iteration of language education policies of each of the countries is described and the impact and potential consequence of any change is critically considered. Each country chapter provides a historical overview of the languages in use and language education policies, examines the ideologies underpinning the language choices, and includes an account of the debates and controversies surrounding language and language education policies, before concluding with some predictions for the future.

The *International Encyclopedia of Linguistics*, 2nd Edition encompasses the full range of the contemporary field of linguistics, including historical, comparative, formal, mathematical, functional, and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines. Areas of intersection with the social and behavioral sciences--ethnolinguistics, sociolinguistics, psycholinguistics, and behavioral linguistics--receive major coverage, along with interdisciplinary work in language and literature, mathematical linguistics, computational linguistics, and applied linguistics. Longer entries in the *International Encyclopedia of Linguistics*, ranging up to four thousand words, survey the major fields of study--for example, anthropological linguistics, history of linguistics, semantics, and phonetics. Shorter entries treat specific topics within these fields, such as code switching, sound symbolism, and syntactic features. Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics, such as Leonard Bloomfield, Roman Jakobson, and Edward Sapir. A major portion of the work is its extensive coverage of languages and language families. From those as familiar as English, Japanese,

and the Romance languages to Hittite, Yoruba, and Nahuatl, all corners of the world receive treatment. Languages that are the subject of independent entries are analyzed in terms of their phonology, grammatical features, syntax, and writing systems. Lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, within that group and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group. In this way, virtually every known language receives coverage. For ease of reference and to aid research, the articles are alphabetically arranged, each signed by the contributor, supported by up-to-date bibliographies, line drawings, maps, tables, and diagrams, and readily accessible via a system of cross-references and a detailed index and synoptic outline. Authoritative, comprehensive, and innovative, the 2nd edition of the *International Encyclopedia of Linguistics* will be an indispensable addition to personal, public, academic, and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study.

The *Oxford Handbook of Languages of the Caucasus* is an introduction to and overview of the linguistically diverse languages of southern Russia, Georgia, Azerbaijan, and Armenia. Though the languages of the Caucasus have often been mischaracterized or exoticized, many of them have cross-linguistically rare features found in few or no other languages. This handbook presents facts and descriptions of the languages written by experts. The first half of the book is an introduction to the languages, with the linguistic profiles enriched by demographic research about their speakers. It features overviews of the main language families as well as detailed grammatical descriptions of several individual languages. The second half of the book delves more deeply into theoretical analyses of features, such as agreement, ellipsis, and discourse properties, which are found in some languages of the Caucasus. Promising areas for future research are highlighted throughout the handbook, which will be of interest to linguists of all subfields.

Conceptions of 'sustainable cities' in the pluralistic and multireligious urban settlements of developing nations need to develop out of local cultural, religious and historical contexts to be inclusive and accurately respond to the needs of the poor, ethnic and religious minorities, and women. *Religion and Urbanism* contributes to an expanded understanding of 'sustainable cities' in South Asia by demonstrating the multiple, and often conflicting ways in which religion enables or challenges socially equitable and ecologically sustainable urbanisation in the region. In particular, this collection focuses on two aspects that must inform the sustainable cities discourse in South Asia: the intersections of religion and urban heritage, and religion and various aspects of informality. This book makes a much-needed contribution to the nexus between religion and urban planning for researchers, postgraduate students and policy makers in Sustainable Development, Development Studies, Urban Studies, Religious Studies, Asian Studies, Heritage Studies and Urban and Religious Geography.

Cultivating Nationhood in Imperial Russia Routledge

Based on an in-depth sociolinguistic case study of language planning in Pakistan, this book examines the extent of the linguistic support in Urdu, English or the mother tongue available to students to cope with their courses in higher education. Keeping in view the paucity of research in the area of sociolinguistics, bilingual education, and language planning in the Pakistani and the South Asian context, this volume will be of interest not only to language planners and curriculum developers, but also to English language teachers and students in Pakistan and abroad. This study is unique in that it illustrates the sociolinguistic profile in Pakistan and provides insights into the complex issues of multiculturalism and ethnicity, and their impact on linguistic, educational and socio-cultural outcomes. It focuses particularly on problems confronting language planning in higher education, along with guidelines for its implementation.

In the past decade Pakistan has become a country of immense importance to its region, the United States, and the world. With almost 200 million people, a 500,000-man army, nuclear weapons, and a large diaspora in Britain and North America, Pakistan is central to the hopes of jihadis and the fears of their enemies. Yet the greatest short-term threat to Pakistan is not Islamist insurgency as such, but the actions of the United States, and the greatest longterm threat is ecological change. Anatol Lieven's book is a magisterial investigation of this highly complex and often poorly understood country. Engagingly written, combining history and profound analysis with reportage from Lieven's extensive travels as a journalist and academic, Pakistan: A Hard Country is both utterly compelling and deeply revealing.

Karachi's Refugee Crisis BRILL

This book examines the role that language-in-education policy, historically, has played in shaping possibilities for development, within countries in the Sub-Saharan and South Asian regions. This discussion takes account also of the complex ways in which language, education and development, are linked to the changing global labour market. Key questions are raised regarding the impact of international policy imperatives on development possibilities.

Symbolically greeted by an unusually early spring, the afternoon of March 27, 1973 marked a pivotal moment in Oscar's life. It was the day that he arrived in Montreal, Canada, and his life began to flourish. He was sixteen years old. Ten time zones and three continents away, in South Asia, Oscar had bid a permanent farewell to his parents and brothers, extended family, friends, and everything familiar, including the hot tropical climate. But Oscar's journey was no happenstance; it was the

unfolding of a dream, the origins of which he has traced back to when he was eight years old. He took steps to make it happen, and it did. His life before that pivotal moment was in sharp contrast to his life after. This is Oscar's story of after and before, told against a backdrop of the music inextricably linked to his recollections.

While the typology, syntax, and morphology of Iranian languages have been widely explored, the sociolinguistic aspects remain largely understudied. The present companion addresses this essential yet overlooked area of research in two ways: (i) The book explores multilingualism within Iran and its neighbouring countries. (ii) It also investigates Iranian heritage languages within the diasporic context of the West. The scope of languages covered is vast: In addition to discussing Iranian minority languages such as Tati and Balochi, the book explores non-Iranian minority languages such as Azeri, Tukmen, Armenian and Mandaic. Furthermore, the companion investigates Iranian heritage languages such as Wakhi, Pashto, and Persian within their diasporic and global contexts. In the current era of migration and globalization, minority and heritage speakers are increasingly valuable resources. By focusing on the speakers, the companion provides new insights into a multitude of sociolinguistic issues including language attitude and identity, language use and literacy practices, language policy, language shift and loss. The companion is an essential reference for those interested in Iranian languages, minority languages, heritage languages, sociolinguistics, bilingualism, language policy and planning, diaspora and migration studies, as well as those researching in related fields.
