Edward C. Moore (1827-1891) was the creative leader who brought Tiffany & Co. to unparalleled originality and success during the late nineteenth century. A silversmith, designer, and prodigious collector, Moore sought out exceptional objects from around the world, which he then used as inspiration for Tiffany's innovative silver designs. This informative, richly illustrated

volume, the first study of Moore's life, collection, and influence, presents more than 170 examples from his vast collection, ranging from Greek and Roman glass to Spanish vases, Islamic metalwork, and Japanese textiles. These are juxtaposed with sixty magnificent silver objects created by the designers and artisans at Tiffany who were inspired by Moore's acquisitions. Included among them are the world-famous Bryant Vase drawing upon Greek examples, a love cup featuring ornate "Saracenic" decoration, and a chocolate pot incorporating novel techniques influenced by Japanese ceramics and lacquerware. The illuminating texts have been enriched by groundbreaking research into contemporary sources such as newspapers and periodicals, the Tiffany & Co. Archives, and a newly identified technical manual and supervisor's diaries, all of which provide an intimate look at the firm's design processes and Moore's role in shaping them. A valuable contribution to the history of American decorative arts, *Collecting Inspiration* illuminates both the legendary Tiffany aesthetic and the legacy of a significant collector, designer, and entrepreneur of the Gilded Age.

Research Paper (undergraduate) from the year 2005 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: 92,5%, Frankfurt School of Finance & Management, 15 entries in the bibliography, language: English, abstract: In the context of Harvard Business Case Tiffany & Co. 1993 our team will focus on the Identification, Measurement, Management of the JPY/USD exchange rate in terms of Economic, Transaction and Translation Exposures for Tiffany & Co. 2. Economic Overview: Japan in 1993: In the decade of 1960s Japan

faced various trade frictions with the USA and Europe in connection with rapid expansion of industrial products exports. In 1971, the USA decided to end the convertibility of the USD into gold. Therefore the fixed exchange rate regime (namely Bretton Woods System) was not in place anymore. Japan's reaction was to float its exchange rate from JPY 360 to JPY 308 in December 1971. In February 1973, the Japanese yen moved to the floating exchange-rate system. The Japanese Economy faced a steady growth until October 1973, as the Israeli-Arab War in this year lead to the first oil crisis, and it triggered a high inflation. As a result, Japan's economy recorded negative growth in 1974 for the first time in the post-war period

The response from the jewelry industry to a campaign for ethically sourced gold as a case study in the power of business in

global environmental politics. Gold mining can be a dirty business. It creates immense amounts of toxic materials that are difficult to dispose of. Mines are often developed without community consent, and working conditions for miners can be poor. Income from gold has funded wars. And consumers buy wedding rings and gold chains not knowing about any of this. In *Dirty Gold*, Michael Bloomfield shows what happened when Earthworks, a small Washington-based NGO, launched a campaign for ethically sourced gold in the consumer jewelry market, targeting Tiffany and other major firms. The unfolding of the campaign and its effect on the jewelry industry offer a lesson in the growing influence of business in global environmental politics. Earthworks planned a “shame” campaign, aimed at the companies' brands and reputations, betting that firms like Tiffany would not want to be associated with pollution, violence, and exploitation. As it happened, Tiffany contacted Earthworks before they could launch the campaign; the company was already looking for partners in finding ethically sourced gold. Bloomfield examines the responses of three companies to “No Dirty Gold” activism: Tiffany, Wal-Mart, and Brilliant Earth, a small company selling ethical jewelry. He finds they offer a case study in how firms respond to activist pressure and what happens when businesses participate in such private governance schemes as the “Golden Rules” and the “Conflict-Free Gold Standard.” Taking a firm-level view, Bloomfield examines the different opportunities for and constraints on corporate political mobilization within the industry.
