Respond to the call of ham radio! Despite its old-school reputation, amateur radio is on the rise, and the airwaves are busier than ever. That's no surprise: being a ham is a lot of fun, providing an independent way to keep in touch with friends, family, and new acquaintances around the world—and even beyond with its ability to connect with the International Space Station! Hams are also good in a crisis, keeping communications alive and crackling during extreme weather events and loss of communications until regular systems like cell phones and the internet are restored. Additionally, it's enjoyable for good, old-fashioned tech geek reasons—fiddling with circuits and bouncing signals off the ionosphere just happens to give a lot of us a buzz! If one or more of these benefits is of interest to you, then good news: the new edition of *Ham Radio For Dummies* covers them all! In his signature friendly style, longtime ham Ward Silver (Call Sign NØAX)—contributing editor with the American Radio Relay League—patches you in on everything from getting the right equipment and building your station (it doesn't have to be expensive) to the intricacies of Morse code and Ohm's law. In addition, he coaches you on how to prepare for the FCC-mandated licensing exam and tunes you up for ultimate glory in the ham radio hall of fame as a Radiosport competitor! With this book, you'll learn to: Set up and organize your station Communicate with people around the world Prep for and pass the FCC exam Tune into the latest tech, such as digital mode operating Whether you're looking to join a public service club or want the latest tips on the cutting edge of ham technology, this is the perfect reference for newbies and experts alike—and will keep you happily hamming it up for years!

First published in 1917 as 'Midwifery', *Obstetrics by Ten Teachers* is well established as a concise, yet comprehensive, guide within its field. The twentieth edition has been thoroughly updated by a new team of 'teachers', integrating clinical material with the latest scientific developments that underpin patient care. Each chapter is highly structured, with learning objectives, definitions, aetiology, clinical features, investigations, treatments, case histories and key point summaries and additional reading where appropriate. New themes for this edition include 'professionalism' and 'global health' and information specific to both areas is threaded throughout the text. Along with its companion *Gynaecology by Ten Teachers* the book will continue to provide an accessible 'one stop shop' in obstetrics and gynaecology for a new generation of doctors.

Journal and Letters of the Rev. Henry Martyn Big Workbook

This booklet presents articles that deal with identifying signs of stress and methods of reducing work-related stressors. An introductory article gives a summary of the causes, consequences, and cures of teacher stress and burnout. In articles on recognizing signs of stress, "Type A" and "Type B" personalities are examined, with implications for stressful behavior related to each type, and a case history of a teacher who was beaten by a student is given. Methods of overcoming job-related stress are suggested in eight articles: (1) "How Some Teachers Avoid Burnout"; (2) "The Nibble Method of Overcoming Stress"; (3) "Twenty Ways I Save Time"; (4) "How To Bring Forth The Relaxation Response"; (5) "How To Draw Vitality From Stress"; (6) "Six Steps to a Positive Addiction"; (7) "Positive Denial: The Case For Not Facing Reality"; and (8) "Conquering Common Stressors". A workshop guide is offered for reducing and preventing teacher burnout by establishing support groups, reducing stressors, changing perceptions of stressors, and improving coping abilities.

Workshop roles of initiator, facilitator, and members are discussed. An annotated bibliography of twelve books about stress is included. (FG)

One of the most famous science books of our time, the phenomenal national bestseller that "buzzes with energy, anecdote and life. It almost makes you want to become a physicist" (Science Digest). Richard P. Feynman, winner of the Nobel Prize in physics, thrived on outrageous adventures. In this lively work that "can shatter the stereotype of the stuffy scientist" (Detroit Free Press), Feynman recounts his experiences trading ideas on atomic physics with Einstein and cracking the uncrackable safes guarding the most deeply held nuclear secrets—and much more of an eyebrow-raising nature. In his stories, Feynman's life shines through in all its eccentric glory—a combustible mixture of high intelligence, unlimited curiosity, and raging chutzpah. Included for this edition is a new introduction by Bill Gates.

#1 NEW YORK TIMES BESTSELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY LOS ANGELES TIMES, THE GUARDIAN, AND SUSPENSE MAGAZINE • Stephen King calls Jack Reacher "the coolest continuing series character"—and now he's back in this masterly new thriller from Lee Child. "Why is this town called Mother's Rest?" That's all Reacher wants to know. But no one will tell him. It's a tiny place hidden in a thousand square miles of wheat fields, with a railroad stop, and sullen and watchful people, and a worried woman named Michelle Chang, who mistakes him for someone else: her missing partner in a private investigation she thinks must have started small and then turned lethal. Reacher has no particular place to go, and all the time in the world to get there, and there's something about Chang . . . so he teams up with her and starts to ask around. He thinks: How bad can this thing be? But before long he's plunged into a desperate race through LA, Chicago, Phoenix, and San Francisco, and through the hidden parts of the internet, up against thugs and assassins every step of the way—right back to where he started, in Mother's Rest, where he must confront the worst nightmare he could imagine. Walking away would have been easier. But as always, Reacher's rule is: If you want me to stop, you're going to have to make me. Praise for Make Me "Child's Reacher series has hit Book No. 20 with a resounding peal of wisecracking glee.

Everything about it, starting with Reacher's nose for bad news, is as strong as ever. . . . The big guy's definitely on the upswing. The guy who writes about him is too."—Janet Maslin, The New York Times "Another winner . . . There's a reason why Child is considered the best of the best in the thriller genre: He can take all these strange elements and clichés and make them compelling and original."—Associated Press "A superb thriller."—New York Daily News "Child's complete command of the story makes this thriller work brilliantly."—Publishers Weekly (starred review) "I've read all twenty of Lee Child's novels. Maybe there's something wrong with me. But I can't wait for the twenty-first."—Malcolm Gladwell, The New Yorker "[The Reacher series] is the current gold standard in the genre. . . . In Make Me Lee Child delivers another Jack Reacher specialty; the total knockout."—Dayton Daily News "Child serves up wingding plots, pithy dialogue, extraordinary background on intriguing topics, and cunningly constructed suspense. But what keeps us coming back—by the millions—is the chance to walk around in the skin of that big guy in the middle of everything."—The Oregonian "A dark thriller . . . Lee Child's Make Me, the twentieth in his wildly popular Jack Reacher series, delivers exactly what readers have come to expect from the perennial bestselling author: interesting characters, tight plots and page-turning action. . . . Readers won't be disappointed."—Minneapolis Star Tribune "Jack Reacher is back. . . . Readers new to this series will find this book a good starting point, and fans will be pleased to see Jack again."—LibraryReads (Top Ten Pick) "The reigning champ ups the ante."—Booklist (starred review)

THE FIRST NOVEL IN LEE CHILD'S #1 NEW YORK TIMES BESTSELLING JACK REACHER SERIES—NOW AN ORIGINAL SERIES ON PRIME VIDEO! "From its jolting opening scene to its fiery final confrontation, Killing Floor is irresistible."—People Ex-military policeman Jack Reacher is a drifter. He's just passing through Margrave, Georgia, and in less than an hour, he's arrested for murder. Not much of a welcome. All Reacher knows is that he didn't kill anybody. At least not here. Not lately. But he doesn't stand a chance of convincing anyone. Not in Margrave, Georgia. Not a chance in hell.

Electronic Inspection Copy available for instructors here Presented with the latest thinking and research on how children acquire their first language, the reader is taken from a standing start to the point where they can engage with key debates and current research in the field of child language. No background knowledge of linguistic theory is assumed and all specialist terms are introduced in clear, non-technical language. A theme running through the book is the nature-nurture debate, rekindled in the modern era by Noam Chomsky, with his belief that the child is born with a rich knowledge of language. This book is rare in its balanced presentation of evidence from both sides of the nature-nurture divide. The reader is encouraged to adopt a critical stance throughout and weigh up the evidence for themselves. Key features for the student include: boxes and exercises to foster an understanding of key concepts in language and linguistics; a glossary of key terms; suggestions for further reading; a list of useful websites at the end of each chapter; discussion points for use in class; and separate author and subject indexes.

Explosive, revealing, and intelligent, The Red Circle provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. Now including an excerpt

from *The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF*. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, *The Red Circle* provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy "sniper cell" and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors—including Marcus Luttrell and Chris Kyle—that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military.
