The highest-yield, most complete nuclear radiology exam prep and learning tool available today!

Top 3 Differentials in Nuclear Medicine: A Case Review by renowned nuclear radiologist Ely A. Wolin and esteemed contributors is one in a series of radiology case books mirroring the format of the highly acclaimed O'Brien classic, *Top 3 Differentials in Radiology: A Case Review*. The book is organized into 12 parts, with initial parts covering neuro, thyroid and parathyroid, cardiac, lung, hepatobiliary, gastrointestinal, genitourinary, and bone imaging. Latter parts focus on imaging of various inflammatory processes, infections, and neoplasms. The final part covers the important topic of quality control, which is essential for both American Board of Radiology (ABR) exam review and clinical practice. Each case is formatted as a two-page unit. The left page features clinical images, succinctly captioned findings, and pertinent clinical history. The right page includes the key imaging gamut, differential diagnoses rank-ordered by the "Top 3," additional diagnostic considerations, and clinical pearls. Key Features: More than 250 high-quality scintigraphic and radiologic images enhance diagnostic skills State-of-the-art nuclear imaging gamuts featuring F-18 FDG PET and SPECT 147 carefully selected nuclear radiology cases provide illustrative examples across all imaging modalities, delivering a robust, well-rounded nuclear medicine review A list of differential diagnoses provides an excellent curriculum guide for trainees and educators alike Radiology residents, nuclear medicine residents and fellows, and staff radiologists preparing for certification will greatly benefit from reading this text as a radiology board review. This high-yield resource is also a must-have for all radiologists who utilize nuclear imaging in their practice.

It is one of the major financial centers for Asia and home to one of the world's busiest ports. Its history goes back for thousands of years, though it is perhaps not until the last thousand or so that Shanghai has been of any significance except to its inhabitants. For centuries a major administrative, shipping, and trading town, Shanghai grew in importance in the 19th century due to European recognition of its favorable port location and economic potential. The city was one of several opened to foreign trade following the British victory over China in the First Opium War, which allowed the establishment of the Shanghai International Settlement. The city then flourished as a center of commerce between East and West, and became the undisputed financial

hub of the Asia Pacific in the 1930s. Today, Shanghai is a popular tourist destination. It has been described as the showpiece of the booming economy of China. There is only one thing to do now – visit! Let's go! Your guide, [WanderStories](#)

covering every subsection of the radiology oral board examination.--JAMAyExtremely useful...This review book is not only rewarding but also a resource radiologists can continue to refer to throughout their careers.--Academic RadiologyProvides an excellent selection of cases for sharpening diagnostic radiology considerations...useful for board preparation and review.--Doody's ReviewTop 3 Differentials in Radiology: A Case Review is a practical case-based reference that will enable radiologists and radiology residents to hone their skills in developing differential diagnoses for common imaging findings. Presented as unknowns, the cases are arranged into twelve main sections based on radiology subspecialties. The book presents each case as a two-page unit. The left page features clinical images and a brief description of the clinical presentation. The right page provides the key imaging finding, Top 3 differential diagnoses, additional differential diagnoses, the final diagnosis, and imaging pearls. The final section of the book contains selected cases from all radiology subspecialties with distinctive imaging findings that should lead definitively to a single diagnosis. Features: 325 cases presented as unknowns to facilitate exam preparation Valuable high-yield review of all disease entities on the list of differential diagnoses for each case More than 700 high-quality images, including 74 in full color, depicting key radiographic findings Imaging pearls at the end of each case that highlight key teaching points With its emphasis on gaining a solid foundation in differential diagnoses for the full range of key imaging findings encountered in clinical practice, this book is ideal for individuals preparing for the initial American Board of Radiology examination as well as more experienced radiologists preparing for recertification examinations.

Eleven-year-old Zach has magical powers, just like everyone in his family, but he's having trouble harnessing his abilities. To help his powers manifest, and to help him appreciate his natural gifts, Zach's parents decide that he needs to be around 'real' people more. No more homeschooling - it's time for Zach to enter the scary world of secondary school. Zach can't resist a bit of magic though, but a simple spell ends with him and his best friend stuck in a vending machine. Someone filmed it and by the next day he's gone viral on YouTube, in the process attracting the attention of Rachel, the prettiest girl at school. With everyone wondering how Zach does his tricks, and with head mean girl Trisha plotting to bring him down, Zach's got his work cut out if he's going to survive year 7 and keep his dreams of becoming a master magician intact.
