The most complete book on the market for homeowners, the BLACK+DECKER The Book of Home How-To Revised and Updated offers current, full color step-by-step photographic instruction for thousands of home repair and home maintenance jobs. Written and compiled by the knowledgeable editors at Cool Springs Press—recognized experts in DIY home improvement and maintenance with more than thirty years of experience in home improvement and hundreds of best-selling books under the BLACK+DECKER brand—this is DIY instruction you can trust. BLACK+DECKER The Book of Home How-to Revised and Updated is the ultimate reference for maintaining any type of home, from a small apartment to a mega mansion. This book is the most essential tool in any homeowner's belt, providing expert know-how on how to repair almost anything in easy, accessible instruction. This A-to-Z encyclopedia offers precise how-to instructions and clear photos on every page. With an expanded index that is incredibly intuitive and a simple, alphabetical strategy for organizing the information, you won't spend precious time wading through stuff you don't need to know. Finding first-rate information on home care has never been easier, and all the most common tasks around your home are covered—including: Electrical Plumbing Flooring Walls Windows and doors Cabinetry Insulating Heating and cooling Roofing and siding And that's just scratching the surface. Just about any repair or remodeling project you can imagine is right here, at your fingertips.

Nickel Topics

On cover: OTS G

[Guide to the classification for overseas trade statistics 2004](#)

The material is contained in more than 500 datasheet articles, each devoted exclusively to one particular alloy, a proven format first used in the complementary guide for irons and steels. For even more convenience, the datasheets are arranged by alloy groups: nickel, aluminum, copper, magnesium, titanium, zinc and superalloys. The book provides very worthwhile and practical information in such areas as: compositions, trade names,

common names, specifications (both U.S. and foreign), available products forms, typical applications, and properties (mechanical, fabricating, and selected others). This comprehensive resource also covers the more uncommon alloys by groups in the same datasheet format. Included are: refractory metals and alloys (molybdenum, tungsten, niobium, tantalum), beryllium copper alloys, cast and P/M titanium parts, P/M aluminum parts, lead and lead alloys, tin-rich alloys, and sintering copper-base materials (copper-tin, bronze, brass, nickel silvers).
