Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type.

Entrepreneurs often suffer from "superhero syndrome"—the misconception that to be successful, they must do everything themselves. Not only are they the boss, but also the salesperson, HR manager, copywriter, operations manager, online marketing guru, and so much more. It's no wonder why so many people give up the dream of starting a business—it's just too much for one person to handle. But outsourcing expert and "Virtual CEO," Chris Ducker knows how you can get the help you need with resources you can afford. Small business owners, consultants, and online entrepreneurs don't have to go it alone when they discover the power of building teams of virtual employees to help run, support, and grow their businesses. *Virtual Freedom: How to Work with Virtual Staff to Buy More Time, Become More Productive, and Build Your Dream Business* is the step-by-step guide every entrepreneur needs to build his or her business with the asset of working with virtual employees. Focusing on business growth, Ducker explains every detail you need to grasp, from figuring out which jobs you should outsource to finding, hiring, training, motivating, and managing virtual assistants. With additional tactics and online resources, *Virtual Freedom* is the ultimate resource of the knowledge and tools necessary for building your dream business with the help of virtual staff.

Canvas for Cruisers is a complete guide to sewing for boats. With 768 illustrations and 81 photos, it is the only canvas book you will need. Starting with information about fabrics, notions and the tools you will need to get going, a detailed description of sewing techniques follows - such as how to sew different types of seams, installation of zippers, piping, hems, patches and reinforcing, binding edges and making patterns. Not only are these details described and illustrated, the reason why is explained. These important details are not covered in the other books. The book continues then, with how-to instructions for many projects inside and outside the boat. All types of covers to protect the boat and its equipment from sun and rain, followed by larger projects such as biminis and dodgers, awnings and sail covers. A separate section on cushions explains all you need to know about designing and constructing practical, comfortable and durable interior and exterior cushions that will stand up to harsh conditions. Also included are many interior projects to organize and beautify your interior space - storage bags, bedding, curtains, screens. The last section covers repairs - to sails, and canvas - and how to prevent the problem from re-occurring.

In developing countries, traditional fishermen are important food contributors, yet technological information and development assistance to third-world nations often focuses on agriculture and industrial fishing, without addressing the needs of independent, small-scale fishermen. This book explores technological considerations of small-scale, primitive fishing technologies, and describes innovative, relatively inexpensive methods and tools that have already been successfully applied in developing countries. It offers practical information about all aspects of small-scale fishing, including boat design and construction, fishing methods and gear, artificial reef construction and fish aggregating devices, techniques for coastal mariculture, and simple methods for processing and preserving fish once they are caught. *Fisheries Technologies for Developing Countries* is illustrated throughout with photographs of the devices and construction methods described in the text.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them

thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.
