Facilitating Interdisciplinary Research Simon and Schuster

"A remarkable work of slowed-down journalism...They are doing their jobs as journalists and writing the first draft of history." —Jill Filipovic, *The Washington Post* "...Generous but also damning." —Hanna Rosin, *The New York Times* From two *New York Times* reporters, a deeper look at the formative years of Supreme Court Justice Brett Kavanaugh and his confirmation. In September 2018, the F.B.I. was given only a week to investigate allegations of sexual misconduct against Brett Kavanaugh, President Trump's Supreme Court nominee. But even as Kavanaugh was sworn in to his lifetime position, many questions remained unanswered, leaving millions of Americans unsettled. During the Senate confirmation hearings that preceded the bureau's brief probe, *New York Times* reporters Robin Pogrebin and Kate Kelly broke critical stories about Kavanaugh's past, including the "Renate Alumni" yearbook story. They were inundated with tips from former

classmates, friends, and associates that couldn't be fully investigated before the confirmation process closed. Now, their book fills in the blanks and explores the essential question: Who is Brett Kavanaugh? *The Education of Brett Kavanaugh* paints a picture of the prep-school and Ivy-League worlds that formed our newest Supreme Court Justice. By offering commentary from key players from his confirmation process who haven't yet spoken publicly and pursuing lines of inquiry that were left hanging, it will be essential reading for anyone who wants to understand our political system and Kavanaugh's unexpectedly emblematic role in it. *A Historical Sketch of Johnson County, Indiana* National Academies Press
 A *New York Times* best-selling author explains how the physical nature of the brain affects people's political decisions, suggesting that changing one's mind is just as much a physical process as it is a psychological function. By the author of *Don't Think of an Elephant!* 60,000 first printing. *A Modern Symposium* Ballantine Books
 Women with muscles are a recent phenomenon. While generating a good deal of interest, both positive and negative, their importance to the cultural landscape has yet to be acknowledged.

Leslie Heywood looks at female body building as a metaphor for how women fare in our current political and cultural climate. *BODYMAKERS* reveals how female bodybuilders find themselves both trapped and empowered by their sport. 14 illustrations. *United States Senate Catalogue of Fine Art* Cornell University Press
 The notion of 'representative democracy' seems unquestionably familiar today, but how did the Victorians understand democracy, parliamentary representation, and diversity? *Information Feudalism* Routledge
 The Development of Parliament During the Nineteenth Century *The Lawbook Exchange, Ltd.* *Problems of the International Settlement* *Genesis of International Narcotics Control (the)* *Librairie Droz* *The Education of Brett Kavanaugh* Penguin
The Impeachment Report *The Lawbook Exchange, Ltd.*
 The Handbook of Historical Economics guides students and researchers through a quantitative economic history that uses fully up-to-date econometric methods. The book's coverage of statistics applied to the social sciences makes it invaluable to a broad readership. As new sources and

applications of data in every economic field are enabling economists to ask and answer new fundamental questions, this book presents an up-to-date reference on the topics at hand. Provides an historical outline of the two cliometric revolutions, highlighting the similarities and the differences between the two Surveys the issues and principal results of the "second cliometric revolution" Explores innovations in formulating hypotheses and statistical testing, relating them to wider trends in data-driven, empirical economics
Penguin

Volume 5, Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

Ensuring Safe Food National Academies Press

Based on extensive archival research, this book provides a new and stimulating history of International Relations (IR) as an academic discipline. Contrary to traditional accounts, it argues that IR was not invented by Anglo-American men after the First World War. Nor was it divided into neat theoretical camps. To appreciate the twists and turns of early IR scholarship, the book follows a diverse group of men and women from across Europe and beyond who pioneered the field since 1914. Like architects, they built a set of institutions (university departments, journals, libraries, etc.) but they also designed plans for a new world order (draft treaties, petitions, political commentary, etc.). To achieve these goals, they interacted closely with the League of Nations and its bodies for intellectual cooperation, until the Second World War put an end to their endeavour. Their story raises broader questions about the status of IR well beyond the inter-war period.

Rescue, Response, and Resilience: a Critical Incident Review of the Orlando Public Safety Response to the Attack on the Pulse Nightclub Rutgers University Press

The shooting attack on the Pulse nightclub in June 2016 claimed the lives of 49 individuals and injured 58 more. It was an event of extreme violence, carnage, and confusion. Yet the Orlando Police Department (OPD) performed with great courage and professionalism, averting a potentially greater loss of life. Recognizing that there were many lessons to be shared and learned from this incident, the OPD asked the COPS Office to conduct a Critical Incident Review of the attack. This Police Foundation report on the incident review details multiple aspects of the attack and response, including leadership, collaboration, tactics, equipment, training, emergency medical care, officer safety, public information, and community relationships. In so doing, it identifies best practices for planning, training, and procedures in all areas of response to a similar attack or mass casualty event and can serve as a valuable guide to law enforcement or first responders seeking to prepare for similar incidents.

Share-based Payment Cambridge University Press

In *Immigrant Acts*, Lisa Lowe argues that understanding Asian immigration to the United States is fundamental to understanding the racialized economic and political foundations of the nation. Lowe discusses the contradictions whereby Asians have been included in the workplaces and markets of the U.S. nation-state, yet, through exclusion laws and bars from citizenship, have been distanced from the terrain of national culture. Lowe argues that a national memory haunts the conception of Asian American, persisting beyond the repeal of individual laws and sustained by U.S. wars in Asia, in which the Asian is seen as the perpetual immigrant, as the "foreigner-within." In *Immigrant Acts*, she argues that rather than attesting to the absorption of cultural difference into the universality of the national political sphere, the Asian immigrant--at odds with the cultural, racial, and linguistic forms of the nation--displaces the temporality of assimilation. Distance from the American national culture constitutes Asian American culture as an alternative site that produces cultural forms materially and aesthetically in contradiction with the institutions of citizenship and national identity. Rather than a sign of a "failed" integration of Asians into the American cultural sphere, this critique preserves and opens up different possibilities for political practice and coalition across racial and national borders. In this uniquely interdisciplinary study, Lowe examines the historical, political, cultural, and aesthetic meanings of immigration in relation to Asian Americans. Extending the range of Asian American critique, *Immigrant Acts* will interest readers concerned with race and ethnicity in the United States, American cultures, immigration, and transnationalism.

Legislative Review Activities of the Committee on International Relations, One Hundred Fourth Congress Cambridge University Press

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Janet Reno's Stewardship of the Justice Department The Development of Parliament During the Nineteenth Century

How safe is our food supply? Each year the media report what appears to be growing concern related to illness caused by the food consumed by Americans. These food borne illnesses are caused by pathogenic microorganisms, pesticide residues, and food additives. Recent actions taken at the federal, state, and local levels in response to the increase in reported incidences of food borne illnesses point to the need to evaluate the food safety system in the United States. This book assesses the effectiveness of the current food safety system and provides recommendations on changes needed to ensure an effective science-based food safety system. Ensuring Safe Food discusses such important issues as: What are the primary hazards associated with the food supply? What gaps exist in the current system for ensuring a safe food supply? What effects do trends in food consumption have on food safety? What is the impact of food preparation and handling practices in the home, in food services, or in production operations on the risk of food borne illnesses? What organizational changes in responsibility or oversight could be made to increase the effectiveness of the food safety system in the United States? Current concerns associated with microbiological, chemical, and physical hazards in the food supply are discussed. The book also considers how changes in technology and food processing might introduce new risks. Recommendations are made on steps for developing a coordinated, unified system for food safety. The book also highlights areas that need additional study. Ensuring Safe Food will be important for policymakers, food trade professionals, food producers, food processors, food researchers, public health professionals, and consumers.

Urban Stormwater Management in the United States Cambridge University Press

"In today's economy, gaining and sustaining a competitive advantage is harder than ever. Strategic Management captures the complexity of the current business environment and delivers the latest skills and concepts with unrivaled clarity, helping students develop their own cutting-edge strategy through skill-developing exercises"--Publisher's website.

Divine Authenticity of the Book of Mormon Academic Press

Examining and historicizing the concept of "otherness" in both literature and criticism, Lisa Lowe explores representations of non-European cultures in British and French writings from the eighteenth through the twentieth century. Lowe traces the intersections of culture, class, and sexuality in Lady Mary Wortley Montagu's Turkish Embassy Letters and Montesquieu's *Lettres persanes* and discusses tropes of orientalism, racialism, and romanticism in Flaubert. She then turns to debates in Anglo-American and Indian criticism on Forster's *Passage to India* and on the utopian projection of China in the poststructuralist theories of Julia Kristeva and Roland Barthes and in the journal *Tel Quel*.

Genesis of International Narcotics Control (the) Government Printing Office

The official report from the House Intelligence Committee on Donald Trump's secret pressure campaign against Ukraine, featuring an exclusive introduction by Pulitzer Prize-winning author and biographer Jon Meacham For only the fourth time in American history, the House of Representatives has conducted an impeachment inquiry into a sitting United States president. This landmark document details the findings of the House Intelligence Committee's historic investigation of whether President Donald J. Trump committed impeachable offenses when he sought to have Ukraine announce investigations of former vice president Joe Biden and his son

Hunter. Penetrating a dense web of connected activity by the president, his ambassador Gordon Sondland, his personal attorney Rudolph Giuliani, and many others, these pages offer a damning, blow-by-blow account of the president's attempts to "use the powers of his office to solicit foreign interference on his behalf in the 2020 election" and his subsequent attempts to obstruct the House investigation into his actions. Published here with an introduction offering critical context from bestselling presidential historian Jon Meacham, *The Impeachment Report* is necessary reading for every American concerned about the fate of our democracy.

The Overworked Consumer Librairie Droz

This book uses empirical data to qualify contemporary social concerns regarding automation and jobs, while raising questions about the increasing creep of unpaid work into Americans' leisure time.

The Political Mind Currency

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

The Judicial and Civil History of Connecticut CreateSpace

Every politically sentient American knows that Congress has been dominated by special interests, and many people do not remember a time when Congress legislated in the public interest. In the 1960s and '70s, however, lobbyists were aggressive but were countered by progressive senators and representatives, as several books have documented. What has remained untold is the major behind-the-scenes contribution of entrepreneurial Congressional staff, who planted the seeds of public interest bills in their bosses' minds and maneuvered to counteract the influence of lobbyists to pass laws in consumer protection, public health, and other policy arenas crying out for effective government regulation. They infuriated Nixon's advisor, John Ehrlichman, who called them "bumblebees," a name they wore as a badge of honor. For his insider account, Pertschuk draws on many interviews, as well as his fifteen years serving on the staff of the Senate Commerce Committee that Senator Warren Magnuson chaired and as the committee's Democratic Staff Director. That committee became, in Ralph Nader's words, "the Grand Central Station for consumer protection advocates."

Human Capital Analytics Duke University Press

This publication introduces the reader to national human rights institutions (NHRIs). Its focus is on NHRIs as both cornerstones of national human rights protection and promotion, and links between States and the international human rights system. Respect for human rights requires the concerted effort of every Government, individual, group and organ in society. With this in mind, the publication is intended for all those who seek a basic understanding of NHRIs, the work they do, how they interact with States, civil society and the international community, and how to support their work.

Critical Terrains Rowman & Littlefield

The reign of Big Tech is here, and Americans' First Amendment rights hang by a keystroke. Amassing unimaginable amounts of personal data, giants like Google, Facebook, Amazon, and Apple—once symbols of American ingenuity and freedom—have become a techno-oligarchy with overwhelming economic and political power. Decades of unchecked data collection have given Big Tech more targeted control over Americans' daily lives than any company or government in the world. In *The Tyranny of Big Tech*, Senator Josh Hawley of Missouri argues that these mega-corporations—controlled by the robber barons of the modern era—are the gravest threat to American liberty in decades. To reverse course, Hawley argues, we must correct progressives'

mistakes of the past. That means recovering the link between liberty and democratic participation, building an economy that makes the working class strong, independent, and beholden to no one, and curbing the influence of corporate and political elites. Big Tech and its allies do not deal gently with those who cross them, and Senator Hawley proudly bears his own battle scars. But hubris is dangerous. The time is ripe to overcome the tyranny of Big Tech by reshaping the business and legal landscape of the digital world.
