Interacting Gravitational, Electromagnetic, Neutrino And Other Waves: In The Context Of Einstein's General Theory Of Relativity McGraw-Hill Education (UK)

This landmark text discusses current issues and trends to help employee assistance and human resource professionals do their jobs better and help people live happier, more productive lives by providing them with the resources to deal with personal problems. The current spiraling and escalating rate of change within the business and working world, fueled by other events and phenomena since September 11, 2001, were the impetus and driving force behind the initiative and development of this

new fourth edition. This book contains 43 chapters; a total of 21 are from the first two editions, eleven were written specifically for the third edition, and eleven new chapters were exclusively written for this new fourth edition. While savoring the still pertinent, meaningful and relevant-to-today materials from the previous editions, there are nine new updates, written by an all-star team of experts in their respective areas. The topics include history and philosophy, structure and organization, client services and characteristics, program planning and evaluation, professional and paraprofessional training and development, special issues, selected examples and future directions. An excellent textbook for college and university courses and preparation source, this book is a must for professionals wanting to be up-to-date on employee assistance programming, for students in graduate courses and seminars, for college and

university courses, and in-service training and continuing education programs.

This book is devoted to researchers who would like to investigate interactions among gravitational waves and matter fields beyond linear order, including the phenomena of memory effects, gravitational Faraday rotation, soft theorems, and formations of spacetime singularities due to the mutual focus of gravitational waves. Readers only require a basic understanding of general relativity to understand the materials. The book starts with an overview on the fundamentals of the Newman-Penrose formalism and a brief introduction to distribution theory, with which the author systematically develops a mathematical description of spacetimes of colliding plane waves. Then, the author presents a frame-independent definition of polarization of a plane gravitational wave in a curved spacetime, studies in detail the gravitational Faraday rotation of two plane gravitational waves, and shows that each of them can serve as a medium to the other precisely due to their nonlinear interactions. Exact solutions are also presented, which represent a variety of models including the collisions of two plane gravitational waves and the collisions of a plane gravitational wave with a dust shell, a massless scalar wave, an electromagnetic wave, or a neutrino wave. The formation of spacetime singularities due to nonlinear interactions and the effects of gravitational wave polarization on the nature of singularities are also explored.

The Year-book of the Scientific and Learned Societies of Great Britain and Ireland John Wiley & Sons

This is the third volume in a four-book set covering all Egyptian

pottery, ranging from the earliest (Fayum A) ceramics to pottery made in Egypt today, organized by historical periods. The manuals are quick identification guides as well as starting points for more extensive research. For each period, ceramic types are illustrated with a line drawing, accompanied by a description that includes information on the pot's material, manufacturing techniques, surface treatment, and shape. Color plates of representative ceramic types are included to give the clearest sense of the color, composition, and surface treatment. All four volumes provide an extensive list of suggested readings as well as a bibliography for each period. Introductory chapters in each book discuss the basics of pottery manufacture and analysis. The first comprehensive guide to Egyptian pottery, this set will prove valuable to students as well as experienced field archaeologists. The volumes come in paperback and spiral-bound versions. The spiral bound versions, with hard laminated covers and tabs, are designed especially for the field and lab.

Sexual Bargaining in the Digital Era follows the evolution of genders/sexualities and so on away from their Old Normal (ON) pattern, which prevailed during the Agricultural Age and the Industrial Age, and into the New Normal (NN) pattern which is currently surfacing in concert with an emerging Digital Era. ON was based on the ancient traditional script governing how women, men, children ought to behave within the spheres of

genders/marriages/families/relationships/sexualities. Over the centuries, ON eventually modified into the familiar 1950s' style (nuclear) patriarchal, cisgender, husband/wife/with children and family. And now that style itself is fading away into NN. NN is based not on script but on improvisation—it is essentially a continual work-in-progress. To make it function the partners engage in ongoing negotiation governed by the principle that “everything is negotiable except the principle that everything is negotiable.” NN has thus far been pursued most frequently by persons (New Lights) who are educated and relatively advantaged. ON has been pursued mostly by persons (Old Lights) who are less educated and relatively less advantaged. ON is also strongly embraced by persons of a traditional religious bent—persons who tend to be rigid and unbending in their religious views. Currently, they tend to be extremely right-wing evangelicals and extremely right-wing Catholics. Importantly, their political clout far exceeds their relatively modest numbers within the larger population. In brief, the shift from ON to NN is a move away from the sanctity of a particular structure to the primacy of persons engaged in ongoing processes of inventing (and reinventing) certain arrangements of genders/marriages/families/relationships/sexualities, enabling them to fulfil their needs for primary (intrinsic/emotional) satisfactions such as liking, loving, empathy, companionship, sexual and so forth. Among other things, this shift replaces the preeminence of the historic binary or cisgender approach—heterosexual, legal, children and so on—in favor of the diversity/variety/multiplicity approach which incorporates under one conceptual umbrella all persons of whatever genders,

sexualities and so on. All persons are thus engaged in a common struggle to achieve personal satisfactions as well as contribute to the Greater Good.

How did the kings of England and France govern their kingdoms? This volume, the product of a ten-year international project, brings together specialists in late medieval England and France to explore the multiple mechanisms by which monarchs exercised their power in the final centuries of the Middle Ages. Collaborative chapters, mostly co-written by experts on each kingdom, cover topics ranging from courts, military networks and public finance; office, justice and the men of the church; to political representation, petitioning, cultural conceptions of political society; and the role of those excluded from formal involvement in politics. The result is a richly detailed and innovative comparison of the nature of government and political life, seen from the point of view of how the king ruled his kingdom, but bringing to bear the methods of social, cultural and economic history to understand the underlying armature of royal power.

From the start of the new Australian nation in 1901, to the use of the female contraceptive pill in 1961, Let's Talk About Sex explores the ways sexuality has been constructed, understood

and experienced in Australia. Far from being something hidden and private, this work brings sexuality out into the open, and explains why sex is of social, cultural, political and economic importance. *Let's Talk About Sex* is an inclusive history, surveying multiple and interwoven forms of sexuality, desire, pleasure, regulation and resistance. It begins with the long Victorian period: the hidden desires of women and the "hydraulic" sexual needs of men, both in the cities and on the frontier. It moves across the decades, considering heterosexuality, homosexuality, lesbians and nascent ideas about queer and sexual difference. Lisa Featherstone highlights the tensions of the ages: venereal disease, homophobia, birth control, rape and child sexual assault. She analyses the ways non-normative sexuality was constructed as evil and perverse, but also how men and women responded to this pathologising of their desires. *Let's Talk About Sex* provides a fascinating account of sex, gender, age and race, across the formative years of Australian society.

Yoga, Meditation, and Mysticism Cambridge University Press
In this deeply researched and vividly written volume, Melvyn Stokes illuminates the origins, production, reception and continuing history of this ground-breaking, aesthetically brilliant, and yet highly controversial movie. By going back to the original archives, particularly the NAACP and D. W. Griffith Papers, Stokes explodes many of the myths surrounding *The Birth of a Nation* (1915). Yet the story that remains is fascinating: the longest American film of its time, Griffith's film incorporated many new features, including the first full musical score compiled for an American film. It was distributed and advertised by pioneering methods that would quickly become standard. Through the high prices charged for admission and the fact that it was shown, at first, only in "live" theaters with orchestral accompaniment, *Birth* played a major role in reconfiguring the American movie audience by attracting more middle-class patrons. But if the film was a milestone in the history of cinema, it was also undeniably racist. Stokes shows that the darker side of this classic movie has its origins in the racist ideas of Thomas Dixon, Jr. and Griffith's own Kentuckian background and earlier film career. The book

reveals how, as the years went by, the campaign against the film became increasingly successful. In the 1920s, for example, the NAACP exploited the fact that the new Ku Klux Klan, which used Griffith's film as a recruiting and retention tool, was not just anti-black, but also anti-Catholic and anti-Jewish, as a way to mobilize new allies in opposition to the film. This crisply written book sheds light on both the film's racism and the aesthetic brilliance of Griffith's filmmaking. It is a must-read for anyone interested in the cinema.

Behavioral Addictions Cambridge Scholars Publishing

This book provides a holistic evidence-based perspective on conceptual, clinical, assessment, and treatment aspects of key non-substance-based addictive disorders related to: gambling, gaming, social media, smartphone, internet, love, sex, exercise, work, and shopping. Each chapter focuses on a different addictive disorder and is structured in a user-friendly way to enable the reader fast navigation, yet the main aspects of the respective disorders are covered in the necessary depth. All in all, this book offers a timely, self-contained introduction to both key concepts and the latest scientific developments in behavioral addictions. It addresses mental health practitioners, researchers in psychology, neuroscience and communication, and undergraduate and postgraduate students alike.

"Written by those who played leading roles in school mathematics, trained historians, and mathematics educators, this two-volume historical record of mathematics education in the United States and Canada serves not only as a partial guide to present actions but as a tool to better understand who we are. The first volume, organized in a roughly chronological manner, takes readers from the mathematics of the nineteenth century through the late-twentieth century. Themes discussed in the second volume include instructional materials, students and teachers, assessment, and the role of the government in

mathematics education. Additional chapters bring an international perspective to the history."

As gambling become ever more ubiquitous, more people are risking their finances, family lives, and health in their desire to be the winner that takes it all. This book brings together an international panel of experts to present a wide variety of perspectives on problem gambling, and test popular addiction and disease models in the field. Early chapters examine the psychology of gambling, before moving on to the pastime's associated irrational ideas. The seven chapters in the second half are devoted to evidence-based interventions from a variety of clinical orientations. Case examples, Q&A sections, and a glossary add extra readability to the coverage.
