Nobody who sits in traffic on Sedona, Arizona's main stretch or stands shoulder-to-shoulder in its many souvenir shops would call it a ghost town. Neither would anyone renting a room for \$2,000 a month or buying a house for a half-million dollars. And yet the people who built this small town and made it a community are being pushed further and further out. Their home is being sold out from under their feet. In studying the impact of short-term rentals, Brendan O'Brien saw something similar happening in places ranging from Bend, Oregon, to Bar Harbor, Maine. But it isn't just short-term rentals, and it's not just tourism towns. Neighborhoods in Austin and Atlanta have become rows of investment properties. Longtime residents in Spokane and Boston have been replaced by new, high-salaried remote workers. Across the country, a level of unaffordable housing that once seemed unique to global cities like New

York and San Francisco has become the norm, with nearly a third of all US households considered housing cost burdened.

This situation has been abetted by the direct actions of developers, politicians, and existing homeowners who have sought to drive up the cost of housing. But it's mostly happened due to a society-wide refusal to see housing as anything more than real estate, another product available to the highest bidder. This trend of putting local housing on a global market has worsened in recent years but is nothing new. Housing in the United States has always been marred by racial and income inequality that mocks the country's highest ideals. Deeply researched and deeply felt, Homesick argues that we can be so much better. And we can start where we live.

The COVID-19 pandemic caused a disruption for many industries at its emergence, including the rental industry. The rental industry consists of more than just car rentals. It also includes Airbnb, house rentals, cruises, and other means of transport. This industry, which relies on tourism, was negatively affected by the travel restrictions that were put in place due to the pandemic. As such, it had to quickly adapt and grow to abide by the rules of the "new normal" in order to survive both during the pandemic, as well as implement new models and strategies that would help it to regain its success post-COVID-19. *Socio-Economic Effects and Recovery Efforts for the Rental Industry: Post-COVID-19 Strategies* is a critical reference book that discusses the effects of the COVID-19 pandemic on the rental industry and

the ways in which the rental industry adapted under the new global restrictions affecting tourism. This book covers recovery efforts for the rental industry, analyzes global cases of the effects and adaptations the rental industry has undergone, and discusses the sociological aspects of the pandemic. While highlighting topics such as e-commerce, financial leasing, second home tourism, and sharing economies, this book is essential for executives, business owners, managers, rental agencies, ridesharing companies, academicians, researchers, and students interested in the current state of the rental industry and how it plans to overcome the challenges caused by the pandemic.

An eye-opening investigation of America's rural and suburban housing crisis, told through a searing portrait of precarious living in Disney World's backyard. Today, a minimum-wage earner can afford a one-bedroom apartment in only 145 out of 3,143 counties in America. One

of the very worst places in the United States to look for affordable housing is Osceola County, Florida. Once the main approach to Disney World, where vacationers found lodging on their way to the Magic Kingdom, the fifteen-mile Route 192 corridor in Osceola has become a site of shocking contrasts. At one end, global investors snatch up foreclosed properties and park their capital in extravagant vacation homes for affluent visitors, eliminating the county's affordable

housing in the process. At the other, underpaid tourist industry workers, displaced families, and disabled and elderly people subsisting on government checks cram themselves into dilapidated, roach-infested motels, or move into tent camps in the woods. Through visceral, frontline reporting from the motels and encampments dotting central Florida, renowned social analyst Andrew Ross exposes the overlooked housing crisis sweeping America's

suburbs and rural areas, where residents suffer ongoing trauma, poverty, and nihilism. As millions of renters face down evictions and foreclosures in the midst of the COVID-19 recession, Andrew Ross reveals how ineffective government planning, property market speculation, and poverty wages have combined to create this catastrophe. Urgent and incisive, Sunbelt Blues offers original insight into what is quickly becoming a full-blown national emergency.
