Self-Doubt...Pressure...The men in our lives...Going back to work...Distractions...Forgetting Things...These issues and more are things that mompreneurs deal with, yet others simply don't understand how much they truly go through. Taken from her popular 2017 "Mama, Can We Talk About..." blog series, author Tammie T. Polk gets back to her start, talking about Mompreneur Engineers--the women who fight daily to make life and business balance out while still holding on to their sanity and their faith. This quick glimpse into the life of mompreneurs helps

readers to know that they aren't alone. Tammie shows her own level of vulnerability so that readers can see that her life hasn't always been sunshine and pine trees either. She's made many of the same decisions that some are wishing they didn't have to make.... you are NOT ALONE! So, Mama, Can We Talk?

In Kids on the Street Joseph Plaster explores the informal support networks that enabled abandoned and runaway queer youth to survive in tenderloin districts across the United States. Tracing the history of the downtown lodging house districts where marginally housed youth regularly lived beginning in the late 1800s, Plaster focuses on San Francisco's Tenderloin from the 1950s to the present. He draws on archival, ethnographic, oral history, and public humanities research to outline the queer kinship networks, religious practices, performative storytelling, and migratory patterns that allowed these kids to foster social support and mutual aid. He shows how they collectively and creatively managed the social trauma they experienced, in part by building relationships with johns, bartenders, hotel managers, bouncers, and other vice district denizens. By highlighting a politics where the marginal position of street kids is the basis for a moral economy of reciprocity, Plaster excavates a history of queer life that has been overshadowed by major narratives of gay progress and pride.

Snooze Money: the Simple Process to Making Money While You Sleep

When we have to know absolutely everything about what's going on with everybody, we start to suffer...and not in a good way! Based on the iconic social media phrase, "Mind the business that pays you," Author Tammie T. Polk brings us face to face with what happens when we make everybody's business our business. As good as being in the know can be, it's not always best because you might not like what you find out! Sometimes, minding your own business is the best thing you can do!

In Polk, Walter R. Borneman gives us the first complete and authoritative biography of a president often overshadowed in image but seldom outdone in accomplishment. James K. Polk occupied the White House for only four years, from 1845 to 1849, but he plotted and attained a formidable agenda: He fought for

and won tariff reductions, reestablished an independent Treasury, and, most notably, brought Texas into the Union, bluffed Great Britain out of the lion's share of Oregon, and wrested California and much of the Southwest from Mexico. On reflection, these successes seem even more impressive, given the contentious political environment of the time. In this unprecedented, long-overdue warts-and-all look at Polk's life and career, we have a portrait of an expansionist president and decisive statesman who redefined the country he led, and we are reminded anew of the true meaning of presidential accomplishment and resolve.

For millions, the very name "Polk Bros". evokes the excitement that surrounded the purchase of the family's first television set, first automatic washing machine, first dishwasher. It stirs memories of Polk's colorful army of "let's make a deal" salesmen; of promotions that included carloads of Georgia watermelons; of live television, midnight movies and Santa Clauses. Polk Bros. has been imitated many times over, but the extraordinary confluence of events, technologies, personalities, and places that created the Polk Bros. phenomenon is unlikely to occur ever again. Here for the first time is the story of how the Polk family developed the first modern retail appliance superstore.

The Power of Direct Selling. Direct selling is not an industry per se nor is it merely a go-to-market business model and channel to reach consumers. It is bigger than any of this - direct selling is people. The ability for people with entrepreneurial spirit to build a

successful business, whether it be from the ground up or by representing a company's product, is at the heart of direct selling and it is people who made (and continue to make) direct selling the successful marketplace that it is today. The direct selling marketplace is comprised of mission-driven and socially responsible companies offering a wide variety of product and services, and the list of direct selling companies is abundant with entrepreneurs who built their businesses by utilizing an independent salesforce channel to market and sell their products or services directly to consumers. Possibly one of the most prominent of these entrepreneurs is Mary Kay Ash, a legend as a glass-ceiling breaker and a woman who built a very successful business with a go-to-market strategy of direct selling. Unlike Mary Kay Ash, however, not all aspiring business owners are willing/able to invest their savings and time on a start-up business. These micro-entrepreneurs desire to have the economic and social benefits of managing their own businesses but do not want the startup costs and demands associated with traditional business planning. As such, becoming a direct selling distributor offers a low-risk, low-cost pathway to micro-entrepreneurship. The traditional barriers to small business ownership are removed when a micro-entrepreneur builds a direct selling business that is backed by established brands. These established brands, several of which are featured in this book, offer the micro-entrepreneurs quality products, business training, and technological resources to achieve a self-determined metric of success. Framed within the context of entrepreneurship and an historical overview of the long-term sustainability of this business model, this book is intended for

practitioners who want to read about the breadth and depth of direct selling. Importantly, this book provides considerable depth in terms of three particular issues associated with direct selling: Compensation, Ethics & compliance, and Global reach. For scholars, this book is built on a strong foundation of valid and reliable research endeavors. The authors have published research on direct selling in high quality, reputable and peer-reviewed academic and practitioner journals. Thus, this book can add foundationally to the research efforts of academics who are conducting research in a wide variety of topics (such as sales, women empowerment, business strategy, ethics, distribution models, gig economy, and global entry - to name a few), as well as to members of the press who want reliable and valid content upon which to build their stories. The book's content is also particularly informative for policymakers at the local, state, national, and international levels. For students, reading this book will offer a variety of insights, particularly related to the intricacies of channel selection and design. Direct Selling: A Global and Social Business Model is a collective project from eight academics and practitioners who have dedicated much of their careers to understanding direct selling as both a go-to-market strategy and a channel of distribution and to capturing the people who are the foundation of direct selling. The pages of this book bring together a wealth of research and knowledge that can inform a broad spectrum of constituents about the economic and social benefits of direct selling, while also providing detail and clarity on key issues related to direct selling as a sustainable business model.
